O. 2.—Statement of work done by Non-Professional Survey Parties from 1st April 1866 to 31st March 1867 ...	lii

ANNUAL REPORT
ON THE
ADMINISTRATION OF THE BENGAL PRESIDENCY
DURING THE YEAR 1866-67.

INTRODUCTORY CHAPTER.

THE territories under the control of the Lieutenant-Governor of Bengal comprise both Regulation and Non-Regulation Provinces. The latter consist of the Divisions of Assam, Chota Nagpore, and Cooch Behar, each under a Commissioner; and the Sonthal Pergunnahs, the Chittagong Hill Tracts, and Cachar, subordinate to Commissioners of Regulation Divisions. The Regulation Provinces are divided into eight Commissionerships. These eight Divisions comprise thirty-six Regulation Districts, each district being under the control of a Magistrate-Collector. The Non-Regulation Districts number nineteen, including the native state of Cooch Behar; and each of these districts is controlled by a Deputy Commissioner. There are accordingly fifty-five districts within the limits of the Government of Bengal, exclusive of the city of Calcutta.

Table A in the Appendix exhibits the number of districts and divisions of districts in each Commissionership, and the area and population of each district as far as ascertained. The figures shewing area and population are, however, only approximate.

The salary of a Commissioner in the Regulation Provinces is Rs. 2,916-10-8, and in the Non-Regulation Provinces is Rs. 2,500, in addition, in both cases, to a travelling allowance of Rs. 250 per mensem. As one of the Commissioners of the Non-Regulation Provinces (the Commissioner of the newly-annexed territory of the Bootan Dooars) also administers the affairs of the Tributary State of Cooch Behar, the present chief being a minor, a portion of his salary is now paid from the revenues of that State.

In each of the Regulation Districts there is a Collector, who is also the Chief Magistrate of the district. There are two grades of Collector-Magistrates. The first grade consists of twenty-three officers, the second of thirteen; each of the former receives a salary of Rs. 1,916-10-8 a month; each of the latter Rs. 1,500. The Collector of Stamps in Calcutta, who is a member of the Subordinate Executive Service, receives a special salary of Rs. 1,000 a month.

Corresponding to the Collector-Magistrate of the Regulation District, but having more varied powers, is the Deputy Commissioner of

a Non-Regulation District. There are eighteen Deputy Commissioners, of whom three are in the first grade on a salary of Rs. 1,500 a month each; four in the second grade on Rs. 1,200; five in the third on Rs. 1,000; and six in the fourth on Rs. 800.

The jurisdiction of the Judge of Bhangulpore includes						six Regulation Districts, the jurisdiction of each Judge including but one district, except in the instances noted on the margin.

whom one (the Additional Judge of Hooghly, Burdwan, and the 24-Pergunnahs) receives a salary of Rs. 2,500 a month; the remaining three (the Additional Judges of Jessore, Tirhoot, and Dacca with Chittagong) get Rs. 2,166-10-8 a month each.

In each of the Non-Regulation Provinces of Assam and Chota Nagpore there is a Judicial Commissioner corresponding to the Zillah Judge of the Regulation Provinces.

The territorial jurisdiction of the Judicial Commissioner is coterminous with that of the Commissioner, and his salary is Rs. 2,000 a month. The Deputy Commissioner of the Cossyah and Jynteah Hills and the Deputy Commissioner of the Naga Hills have the powers of a Civil and Sessions Judge within their respective districts; the Assistant Commissioner of the Garrow Hills has the powers of a Sessions Judge; and all these officers, as well as the Deputy Commissioner of Luckimpore, and three out of the four Deputy Commissioners of Chota Nagpore, (namely, Hazareebaugh, Maunbhoom, and Singbhoom) exercise powers under Act XV. of 1862 to try all offences not punishable with death under the Code of Criminal Procedure, and to pass sentences of imprisonment not exceeding seven years. In the Cooch Behar Division the Criminal Sessions are held, and the judicial, appellate, and controlling authority exercised, in all the districts comprised in it, by the Commissioner.

The subordinate Civil Judges under this Government are classified as follows:—

- | | |
|----------------------------------|-------------------|
| 1. Judges of Small Cause Courts. | 3. Sudder Ameens. |
| 2. Principal Sudder Ameens. | 4. Moonsiffs. |

There are twenty-two Judges of Small Cause Courts, of whom four are Judges of the Court of Small Causes in Calcutta. The salaries of these four Judges are shewn on the margin.

1 on	... Rs. 2,000	1 on	Rs. 1,250
1 "	... " 1,500	1 "	" 1,000

Of the remaining eighteen Judges, who preside over Small Cause Courts in the Mofussil, one receives Rs. 1,500 a month, seven Rs. 1,000, and ten Rs. 700 a month each. The Cantonment Magistrates of Barrackpore, Dum-Dum, and Dinapore are also Judges of the Small Cause Courts in their respective Cantonments under Act XXII. of 1864. The Principal Sudder Ameen of Shahabad exercises the powers of a Small Cause Court Judge at Shahabad. The total number of officers performing the functions of a Small Cause Court Judge is accordingly twenty-six, and the total number of Small Cause Courts over which they preside is thirty-six.

In the Regulation Provinces there are nine Principal Sudder Ameens on Rs. 600 a month, and sixteen on Rs. 400. There is no separate officer of this class in Backergunge, Cuttack, Midnapore, Moorshedabad, and Tirhoot, where the duties of Principal Sudder Ameen are conducted by the local Small Cause Court Judges. On the other hand, Dacca has three Principal Sudder Ameens, and Chittagong, Hooghly, and the 24-Pergunnahs have two each. Adding to the number of Principal Sudder Ameens the eleven Small Cause Court Judges who are vested with the powers of the former class of officers, there are in the Regulation Provinces thirty-six officers to carry on the work of Principal Sudder Ameens.

In the Non-Regulation Provinces there is one Principal Sudder Ameen on Rs. 400, viz., the Principal Sudder Ameen of Kamroop in Assam. The existing appointment of Principal Sudder Ameen of Maunbhoom, in Chota Nagpore, is only temporary. But in the Non-Regulation Provinces the Deputy Commissioner is a Principal Sudder Ameen as well as a Magistrate and Collector. Two of the Assistant Commissioners and one Extra Assistant Commissioner exercise the powers of Principal Sudder Ameen. So that in the nineteen districts there are twenty-three officers to dispose of cases cognizable by a Principal Sudder Ameen, besides the Principal Sudder Ameen of Maunbhoom.

The powers exercised by a Principal Sudder Ameen are those defined in Regulation V. of 1831 and Act XXV. of 1837. One of the two Principal Sudder Ameens in the 24-Pergunnahs, and the Principal Sudder Ameen of Kamroop, in Assam, have in addition the full powers of a Magistrate. The Judge of the Small Cause Court at Dacca has the same powers.

There are twenty-eight Sudder Ameens in the Regulation Provinces. With the exception of Sylhet, which has no Sudder Ameen, and of Rajshahye, Rungpore, and Dinagepore, which have two each, there is one officer of this class in each zillah or Judge's district.

In the Non-Regulation Provinces there are two Sudder Ameens; with eighteen Assistant and four Extra Assistant Commissioners exercising the powers of a Sudder Ameen. The total number of officers in those Provinces competent to try cases cognizable by a Sudder Ameen is therefore twenty-four.

The salary of a Sudder Ameen is Rs. 250 a month.

In the Regulation Districts there are forty-seven Moonsiffs of the

(a) 1. Patna.	(f) 1. Sylhet.	first grade on Rs. 200, and
2. Gya.	2. Purneah.	ninety-five of the second
(b) Shahabad.	3. Bancoorah.	grade on Rs. 150 a month.
(c) 1. Jessore.	4. Beahboom.	There are two districts (a)
2. Cuttack.	5. Rungpore.	with one Moonsiff each ;
3. Sarun.	6. 21-Perannahs.	one district (b) has two
4. Tirhoot.	(g) Tipperah.	Moonsiffs; four districts (c)
(d) 1. Midnapore.	(h) Dacca.	have three Moonsiffs each ;
2. Moorshedabad.	(i) 1. Mymensing.	five districts (d) have four
3. Blangulpore.	2. Hooghly.	Moonsiffs each; and one (e)
4. Backergunge.	(k) 1. Burdwan.	has five. Six Moonsiffs
5. Rajshahye.	2. Chittagong.	
(e) Nuddea.	3. Dinapore.	

are attached to each of six districts (f), one district (g) has seven, another (h) eight, two (i) have nine, and three (k) ten each.

In the Non-Regulation Provinces there are six Moonsiffs of the first grade and fifteen of the second grade; and these twenty-one Moonsiffs are distributed as follows: *viz.*, ten in Assam, nine in Chota Nagpore, and two in Cachar.

Adding to this number the four Assistant Commissioners and three Extra Assistant Commissioners, who exercise the powers of a Moonsiff, it will be seen that there are twenty-eight officers to do the work of Moonsiff in the Non-Regulation Provinces. The powers exercised by Sudder Ameen and Moonsiffs are those defined in Regulation V. of 1831. Twelve of these officers hold additional powers, *viz.*, one the powers of a Magistrate, three the powers of a Subordinate Magistrate of the first class, and eight the powers of a Subordinate Magistrate of the second class.

In the city of Calcutta there are two Stipendiary Magistrates on Rs. 1,500 and Rs. 1,250 a month, and sixty-four Honorary Magistrates. There is also a Coroner on Rs. 300 a month.

In the interior the thirty-six Collectors, of whom mention has been already made, are the Chief Magistrates of their respective districts. There are thirty-three Joint-Magistrates and 336 Magistrates of lower grades. Of the thirty-three Joint-Magistrates, twenty-two in the first grade receive Rs. 900 a month, and eleven in the second grade Rs. 700 a month. Of the Magistrates of lower grades, sixty-two are Honorary, and 274 Stipendiary Magistrates. Of the latter, three are Military Officers, seventy-five Covenanted Civil Servants, and 196, designated Deputy Magistrates and Deputy Collectors, are members of the Subordinate Executive Service.

Of these officers sixty-seven are in charge of sub-divisions of Magisterial districts. There are sixty-nine such sub-divisions at present, of which two in Bhaugulpore are now under one officer, and one in Tirhoot is under the direct administration of the District Magistrate. The formation of several other sub-divisions has been sanctioned by Government, but the arrangements for opening these had not been completed at the close of the year. Much difficulty is found in providing officers to take charge of them.

Of the sixty-seven officers in charge of sub-divisions, three are the Cantonment Magistrates of Barrackpore, Dum-Dum, and Dinapore,

twenty-five are Covenanted Civil Servants, and thirty-nine are Deputy Magistrates and Deputy Collectors, or members of the Subordinate Executive Service. The Cantonment Magistrates and twelve Assistant and thirty-five Deputy Magistrates exercise full Magisterial powers; the remaining seventeen Sub-Divisional Officers have at present powers of a Subordinate Magistrate of the first class, with powers under Section 38 of the Code of Criminal Procedure to commit cases for trial to the Courts of Sessions. •

The salary of a Cantonment Magistrate of a first class Cantonment is Rs. 1,000; in a second class Cantonment it is Rs. 700. Barrackpore and Dinapore belong to the first class, and Dum-Dum to the second class. But the present Cantonment Magistrates under this Government continue to draw pay under the old scale, that is, a staff salary of Rs. 380 each, in addition to their Military pay and allowances.

The salary of an Assistant Magistrate ranges from Rs. 400 to 500. Assistant Magistrates with powers of a Subordinate Magistrate of the second class, to which they are restricted until they pass by the first or lower standard of examination, receive Rs. 400 a month. On passing this examination, and being vested with the powers of a Subordinate Magistrate of the first class, they become entitled to a salary of Rs. 450, which they continue to receive till they pass by the higher standard of examination, and are vested with the full powers of a Magistrate and Deputy Collector. Twenty-nine Assistant Magistrates receive at present Rs. 500, twenty-six Rs. 450, and twenty Rs. 400.

The Subordinate Executive Service, to which the Deputy Magistrates and Deputy Collectors belong, is divided into six grades—

10	in the First Grade	receive	... Rs. 700 a month.
15	„ Second „ „	... „	600 „
26	„ Third „ „	... „	500 „
42	„ Fourth „ „	... „	400 „
52	„ Fifth „ „	... „	300 „
67	„ Sixth „ „	... „	200 „

Eleven Supernumeraries receive salaries of Rs. 100 and 150, with the exception of two officers, whose salaries, Rs. 300 and 250, are paid by the Cooch Behar State in which they are at present employed.

Of these 223 officers 196, as has been already stated, are at present employed on Magisterial duties in the Lower Provinces. Of the rest some are on the administrative staff of the Non-Regulation Provinces, a few are employed as Personal Assistants to the Commissioners of Divisions, and the rest on work exclusively connected with the administration of revenue.

In the Non-Regulation Provinces, there are eighty-seven Magisterial Officers beside the Deputy Commissioners. Of these thirty-three are Honorary and fifty-four Stipendiary.

Of the fifty-four Stipendiary Magistrates of lower grades seventeen are in charge of sub-divisions of districts, of whom twelve are Assistant Commissioners and five Extra Assistant Commissioners.

The Assistant Commissioners, with the exception of the five officers of that class in the Sonthal Pergunnahs, are either Covenanted Civil Servants or Military Officers. The Assistant Commissioners of the

Sonthal Pergunnahs are members of the Subordinate Executive Service of the Regulation Provinces on deputation in the Non-Regulation Districts. This is also the position of several of the Extra Assistant Commissioners.

The Assistant Commissioners, with the exceptions mentioned above, are divided into two grades: seven in the first grade receive Rs. 600 a month, and twenty-two in the second from Rs. 400 to 500. Assistant Commissioners of the second grade, who are required to undergo the same examinations as Assistant Magistrates, are allowed Rs. 400 so long as they exercise powers of a Subordinate Magistrate of the second class, Rs. 450 when vested with first class powers and powers of a Moonsiff, and Rs. 500 when they have full powers of a Magistrate with those of a Sudder Ameen.

SECTION I.—JUDICIAL.

CIVIL JUSTICE.

THE statement annexed shews the cases under trial before the High Court.—Original Jurisdiction. Cases tried and disposed of during the year.

YEAR.	On the file at the commencement of the year.	Instituted during the year.	Received by transfer.	Total under trial.	Disposed of.	Pending at the close of the year.
1865 ...	389	1,211	1	1,601	1,192	409
1866 ...	409	1,056	2	1,467	1,023	444

against Rs. 78,06,491-12-10 in the previous year.

YEAR.	APPEALS.			Miscellaneous orders, including orders in equity cases.	Orders on claims to attached property.
	Order confirmed.	Order reversed or modified.	Cases remanded.		
1865 ...	84	15	1	2,233	17
1866 ...	27	17	3	1,859	21

under trial before the High Court on its Original side, under Act VIII. of 1859, during the years 1865 and 1866, as well as the cases disposed of in those years, and those pending at the close of each. The amount litigated in suits other than those for accounts, partition, and possession of lands was Rs. 77,40,642-13-11½

The results of appeals and the numbers of miscellaneous and other orders passed during the two years are shewn on the margin.

The working of the Court in its Testamentary and Intestate, as

Testamentary, Intestate, and other cases disposed of.

DESCRIPTION OF CASES.	1865.	1866.
Probates granted	149	128
Letters of Administration	226	222
Admiralty and Vice-Admiralty Suits...	12	5
Ecclesiastical Suits	7	1
Marriage Licenses granted	19	18
Miscellaneous orders	307	440
Insolvency cases	126	108
Protection orders	48	65
Vesting, hearing, dividend, and other orders	451	507

1,30,57,691-15-6½ against assets valued at Rs. 86,46,265, the figures being nearly double those of the preceding year, though the actual number of insolvency cases was fewer

On the appellate side of the High Court the total number of appeals

High Court.—Appellate Jurisdiction.

Appeals instituted during the year.

Description of Appeals.	1865.	1866.
Regular	441	460
Special	3,672	3,442
Miscellaneous	715	795

miscellaneous appeals, but a decrease in the number of special appeals.

Cases appealable.	1865.	1866.
In Regular Appeal	2,887	2,630
In Special Appeal	17,170	15,600

The number of appeals decided and pending in 1865 and 1866 are

Appeals decided and pending.

Description of Appeals.	DECIDED IN		PENDING ON 31st DECEMBER	
	1865.	1866.	1865.	1866.
Regular	529	374	252	338
Special	4,451	3,296	1,325	1,471
Miscellaneous	674	774	257	278

as well as in its Admiralty and Ecclesiastical Jurisdictions, and as a court for the relief of insolvent debtors, is exhibited in the annexed return, which shews at the same time a comparison of the results of 1866 with those of the preceding year. The amount of the debts set out in the schedules of insolvents in 1866 was Rs.

4,697, of which 460 were regular, 3,442 special, and 795 miscellaneous. A comparison with the results of the previous year shews a slight increase in the number of regular and miscellaneous appeals, but a decrease in the number of special appeals. The number of cases appealable to the High Court, disposed of by the Lower Courts, was fewer in 1866 than in the preceding year as noted on the margin.

The result shewn is a falling off in the number of cases disposed of in 1866, and an increase in the number of cases pending at the close of that year. Considerable progress has, however, since been made

in reducing the files, and it was expected that at the close of the current year the amount of the arrears would be very much reduced.

The years in which the appeals pending on the 31st December last were preferred are noted below :—

	1862.	1863.	1864.	1865.	1866.
Regular	2	3	10	23	300
Special	1	1	11	15	1,443

and the figures shew that the number of old cases has been reduced.

The following statement shows the results of the appeals decided. results of the appeals heard by the High Court in 1866 :—

	In Regular Appeal.	In Special Appeal.
Order of lower court confirmed	189	2,111
Ditto ditto reversed	98	168
Ditto ditto modified	33	66
Cases remanded	27	771
Cases struck off on default	25	173
Ditto ditto on compromise, or withdrawn	2	7

The amount of institution fees realized by the filing of appeals on the appellate side of the Court during the past year was Rs. 2,70,438, against Rs. 3,00,554 of the preceding year, the decrease being explained by the falling off in the number of suits instituted.

The value of the appeals decided in 1866 amounted to Rs. 1,22,86,631, against Rs. 2,40,96,356 of the previous year, the falling off in value being more than proportionate to the decrease in the number of appeals filed.

The amount of work which came before the Civil Courts subordinate to the High Court, during the years 1865 and 1866, is shewn in the annexed return. The total number of suits instituted shews an increase of 3,118 cases, but there was a decrease in the number of cases of the Small Cause Court Class to the extent of 940, the increase in other cases amounting to 4,058. The increase in the number

DESCRIPTION OF SUITS.	SUITS INSTITUTED IN		SUITS PENDING AT THE END OF	
	1865.	1866.	1865.	1866.
Small Cause Court Class Cases	81,862	80,923	6,445	6,147
Other Cases	56,757	60,815	17,642	18,847
Total	138,619	141,737	24,087	24,994

of pending cases was 907, which is accounted for by the increased number of cases instituted.

In the superior district courts, *viz.*, those of the Judges, Additional Judges, and Principal Sudder Ameens, the number of original suits exhibits a decrease for the first time in several years, the decrease as compared

Description of Suits.					1865.	1866.
Original					3,975	3,668
Appealed					10,928	20,866
Total					23,903	24,533

with the results of 1865 being to the extent of 309 cases; but the number of appeals shews an increase of 938 cases, the net result being an increase of 629 cases.

In the inferior courts, that is, in those of Sudder Ameens and Moonsiffs, who have jurisdiction respectively over claims not exceeding Rs. 1,000 and 300, the number of suits instituted was less in the former class of courts by 94 cases, but greater in the latter by 2,583 cases, as is shewn on the margin. It

In Courts of					1865.	1866.
Sudder Ameens					4,822	4,728
Moonsiffs					100,894	112,477
Total					114,716	117,205

may be here remarked that suits up to Rs. 300 in value were most numerous in the districts of Mymensing, Dacca, Tipperah, Chittagong, East Burdwan, and Dinagepore, and were fewest in Nuddea and Patna; suits in value between Rs. 300 and Rs. 1,000 were most numerous in Tirhoot, 24-Pergunnahs, Sarun, and Bhaugulpore, and were fewest in Cuttack, West Burdwan, and Tipperah; and suits above Rs. 1,000 in

value were most numerous in Cuttack, Tirhoot, 24-Pergunnahs, Dacca, Tipperah, and Bhaugulpore, and were fewest in West Burdwan, Chittagong, Dinagepore, Jessore, and Purneah.

The statement below shews the total number of suits instituted in the courts of several grades during 1866, and the number disposed of during the same period, distinguishing those which were decided on their merits :—

IN COURTS OF	SUITS INSTITUTED.			SUITS DECIDED ON THEIR MERITS.			TOTAL NUMBER OF CASES DISPOSED OF.		
	Original.	Appeals.	Total.	Original.	Appeals.	Total.	Original.	Appeals.	Total.
Judges ..	80	20,857	20,937	189	9,305	9,554	221	10,141	10,362
Principal Sudder Ameens ... }	3,606	9	3,615	3,609	9,469	13,078	4,027	9,831	13,858
Sudder Ameens ...	4,728	...	4,728	4,754	...	4,754	5,338	...	5,338
Moonsiffs ...	112,477	...	112,477	101,073	...	101,073	115,611	...	115,611
Total ...	120,871	20,866	141,737	109,625	18,834	128,459	125,197	19,972	145,169

A comparison of the number of suits decided by the courts of different grades of 1865 and 1866 is shewn on the margin.

Comparison of the number of suits decided in 1865 and 1866.

CASES DECIDED BY	1865.		1866.	
	Suits decided on their merits.	Total disposed of.	Suits decided on their merits.	Total disposed of.
Judges—Original ...	180	206	189	221
Judges—Appealed ...	11,163	12,096	9,305	10,141
Principal Sudder Ameens—Original ...	4,078	4,535	3,609	4,027
Principal Sudder Ameens—Appealed ...	9,441	9,867	9,469	9,831
Sudder Ameens ...	4,361	4,850	4,754	5,338
Moonsiffs ...	99,940	112,900	101,073	115,611
Total ...	129,163	144,454	128,459	145,169

the number of suits disposed of by the Moonsiffs. The cause of the falling off in the amount of civil business done by the Judges was, however, to be found in the exceptional circumstances of the year

The aggregate number of suits disposed of exhibits little variation, but the total out-turn of the courts of Sudder Ameens and Moonsiffs in 1866 was greater, while that of the District Judges and Principal Sudder Ameens was less than in the preceding year. There was a material decrease in the number of appeals disposed of by the Judges and a material increase in

the time of many of those officers having been occupied to a very unusual extent in Sessions trials on account of the increase of crime in the districts most affected by the scarcity of food.

An abstract of the arrears in the courts of several grades shews

Arrears.

In Courts of	1865.		1866.	
	Months.	Days.	Months.	Days.
Judges	3	35	6	98
Principal Sudder Ameens	2	30	9	94
Sudder Ameens	3	24	2	24
Moonsiffs	4	44	3	33
Total ...	6	43	7	49

Original Suits...	208
Appeals under Act X. of 1859 ...	80
„ from subordinate Civil Courts ...	316
Total ...	608

that those on the file of the Judges had increased, while those on the files of the Principal Sudder Ameens had been very much reduced. The files of the courts of lower grade were very light, as in previous years. The increased number of old cases on the files of the Judges was owing, in a great measure, to their time having been more than usually taken up by criminal work. An analysis of the cases in arrear before them is shewn on the margin.

The average duration of suits in 1866, as compared with the preceding

Average duration of suits.

year, shews an improvement in the disposal of business in every grade of court but the lowest. But there is still much room for improvement in this respect, particularly as the High Court state that considerable time is wasted at present by the repeated and unnecessary adjournment of cases to which many officers are too prone.

The value of suits decided in 1866 was Rs. 4,17,98,423, against

Value of suits.

Rs. 4,07,19,566 of the preceding year; and the value of suits pending was Rs. 1,93,23,927, against Rs. 2,21,10,556.

The account of stamp fees is given on the margin, the net revenue derived from this source amounting to Rs. 18,07,152-12. The cost of the Civil Courts is also shewn marginally, the aggregate expenditure being Rs. 17,41,949-5-10, or less by Rs. 65,203-6-2 than the income realized from stamp fees.

The annexed table shews the number of appeals preferred to the Lower Appellate Courts. The appeals under Act X. of 1859 have progressively decreased, and the number of appeals from Principal Sudder Ameens was also less in 1866 than in the previous year; but the appeals from the courts of the lower grade had considerably increased, owing mainly to the larger

YEAR.	Appeals under Act X. of 1859	Appeals from Principal Sudder Ameens.	Appeals from Sudder Ameens.	Appeals from Moonsiffs.

on trial was somewhat greater.

state of the miscellaneous files at the close of those years, are shewn on the margin. The total number of cases under trial during the year under review was smaller than in the preceding year, but the number pending was also less, while the number decided

A Statement (B. 1.) in the Appendix exhibits the number of suits of every description instituted in each district in 1866, and it will be perceived that, as in previous years, the characteristics of the litigation in different districts were generally preserved. In Tipperah claims in right of adoption formed the bulk of the subjects of litigation; in Chittagong and Bhaugulpore the most conspicuous cases were those connected with religion; in Cuttack suits for real property on conveyance by sale were most numerous; in Rungpore the litigation was confined almost entirely to suits on bonds and contracts, suits for personal property, and suits regarding dependent land tenures; in Sylhet money claims and boundary disputes were the most prominent causes of litigation; and in Nuddea there were not 100 suits of any description other than boundary suits and suits connected with subordinate land tenures.

The results of the original suits decided by the Judges of all grades in 1866 is shewn in the annexed return. In the preceding year the total number decided in favor of plaintiff was 81,016, and in favor of defendants 27,543, so that the results of the year under review were altogether less favorable to plaintiffs and more favorable to defendants.

Results of Original Suits decided.

DECIDED BY				In favor of Plaintiffs.	In favor of Defendants.
Judges	120	69
Principal Sudder Ameens	2,004	767

An analysis of the cases in which the parties appeared in person or by counsel, and a statement of the number of undefended cases, is given on the margin.

Non-receipt of statistics regarding the Extra-Regulation Districts.

The statistics of Civil Justice given above have reference only to the Regulation Districts of Bengal. No report on the Non-Regulation Districts was received from the High Court at the close of the year.

The total number of suits in which Government was concerned, that were pending on the 1st May 1866, was 479, of which 343 were original suits and 136 appeals. The number of suits instituted in the courts of first instance during the year under review was 322, and in the appellate courts 187, making a total of 509 suits, which with the suits previously pending shewed an aggregate of 665 original suits and 323 appeals, or altogether a total of 988 cases.

Of the original suits 185 were decided in favor of Government, 40 were compromised, and 120 decided against Government, making a total of 345 suits decided, which left 320 pending. Of the 120 adverse decisions 26 were appealed on behalf of Government and in 8 the decisions of the Lower Courts were reversed, the actual number lost in litigation being 112. Of the appeals 185 were decided in favor of Government, 29 against it, and 13 were remanded for re-trial, making a total of 227 cases decided, which left 96 pending. The total number of judgments favorable to Government was 370 against 149 judgments which were unfavorable to it, and the number of cases pending at the close of the year was 416. In 12 cases the Government was cast in the courts both of first instance and appeal.

		Rupees.	
Revenue decrees	71,838	
Salt ditto	68,666	
Opium ditto	2,808	
Total ...		<u>1,43,310</u>	

The amount expended in litigation during the year was Rs. 45,703 in the Land Revenue Department, and Rs. 418 in the Salt and Opium Departments, making a total of Rs. 46,121. The amount realized under decrees of Court was Rs. 56,987 in the Land Revenue Department, and Rs. 665 in the Salt and Opium Departments, which gave a total of Rs. 57,652. The outstanding balances due to Government are noted on the margin.

The number of suits instituted in the Calcutta Small Cause Court during the eleven months under review was 33,951, against 34,071 instituted during the same period in 1865-66, which shews a decrease of litigation to the extent of 120 cases. The amount of property under litigation was Rs. 17,32,378-12 as against Rs. 18,41,392-4-2 in the same period last year, which similarly exhibits a decrease in the value of property in litigation to the extent of Rs. 1,09,013-8-2. The average number of suits for each day during the year was 141.46.

* Pending from 1865-66...	1,184		
Instituted in 1866-67 ...	33,951		
Total ...	<u>35,135</u>		

The total number of cases set down for hearing during the year was 35,135,* of which 14,803 were decided in favor of plaintiffs, including 7,187 cases which were tried *ex parte*; 1,483 decided in favor of defendants; and 3,749 were non-suited. Of the rest, 10,253 were compromised, 3,181 were struck off for non-appearance of the plaintiffs, and 1,666 were pending trial at the close of the year.

Of the total number of suits instituted 44 were for sums in excess of a thousand rupees, and 578 others for sums in excess of 500 Rs. In one case of the first kind Rs. 5,469 were abandoned for the purpose of

bringing the case within the jurisdiction of the Small Cause Court; in three others sums ranging from Rs. 700 to 1,000, in two, sums from Rs. 200 to 500, in three more sums from Rs. 100 to 200, and in the remaining 35 sums less than Rs. 100 were given up in order to bring them within the jurisdiction of the court.

The receipts of the year on account of fees, &c., of all descriptions amounted to Rs. 2,05,228-8, while the cost of establishment, including house rent, was Rs. 1,41,246-9-4, which left a balance of Rs. 63,981-14-8 to the credit of the court, against a surplus of Rs. 77,136-15-8 during the corresponding period in 1865-66.

There were 22 Small Cause Court Judges holding their courts in 36 places in the Mofussil in 1866; and a Statement (B. 2.) in the Appendix exhibits the working of these courts in detail. The table on the margin shews the number of causes litigated under each of the four descriptions of cases cognizable by such courts during the past two years. There was a large falling off in the

Description of Cases instituted.				1865.	1866.
Money claims, &c.	34,244	34,904
House Rent	528	540
Personal Property	2,063	2,557
Damages	1,432	980
Total ...				38,266	39,080

number of claims for damages, but as regards the other classes of suits there was a moderate increase.

The total number of suits instituted in 1866 was 39,080, which, with 1,755 suits of the previous year, made a total of 40,835 cases under trial. Of these 38,498 were decided during the period under review, leaving 2,337 suits pending at the close of the year, of which 30 were pending for a period exceeding six weeks.

Of the suits decided 20,807, or about 50 per cent., were disposed of in the presence of both parties, 16,395 being decided in favor of plaintiffs, and 4,412 in favor of defendants. Of the former 10,643 suits were decided on confession, so that the decisions in favor of plaintiffs in cases which were actually contested were 5,752 only.

Amount of work done in different Courts.

Total ...	2,81,052	8	5

59,552-3, which is less than the net charge incurred in 1865 by Rs. 26,993-1.

A set of rules was passed by the High Court during the year, under

Rules for the admission and examination of Pleaders and Mooktears.

Section 4, Act XX. of 1865, for the qualification, admission, and enrolment of pleaders and mooktears in the Mofussil Courts of the Regulation Provinces, and these have, with certain exceptions, been further extended by Government to the courts of Assam and Chota Nagpore. Rules have also been laid down by Government, under Section 6 of the Act, for conducting the examination of applicants for admission as pleaders or mooktears in all the Mofussil courts, both in the Regulation and Non-Regulation Districts, and the first examination under these rules was held in January last. A great improvement in the working of the Subordinate Courts is expected to result from these measures, though it will doubtless take time to develope itself.

CRIMINAL JUSTICE.

The statement on the margin shews the number of persons com-

High Court—Original Jurisdiction.

YEAR.	Number of persons committed for trial.	Number of persons convicted.	Number of persons acquitted.	Number of persons discharged without trial.	Number of persons under trial at the close of the year.
1865 ...	279	197	76	6
1866 ...	355	257	86	12

mitted to and tried by the High Court in its Original Criminal Jurisdiction during the years 1865 and 1866, together with the results of those trials. Of the 257 persons convicted during 1866, 4 were sentenced to transportation for life, 17 to transportation for periods varying from 7 to 14 years, 11 to penal servitude for periods varying from 4 to 10 years, 18 to

rigorous imprisonment for terms of 3 to 7 years, 35 to the same punishment for two years, 31 for 15 to 18 months, and 128 for one year and under. Besides these 2 persons were sentenced to simple imprisonment, and 11 persons were whipped. No sentence of capital punishment was passed during the year, and only 2 of the convicts sentenced to transportation were also condemned to solitary confinement.

A comparison of the number of criminal appeals heard by the High Court—Appellate Jurisdiction. High Court during the two years alluded to is shewn below :—

	1865.	1866.
Trials referred under Chapter XXVIII of the Criminal Procedure Code	65	77
Trials referred under the old law	5	...
Trials revised under Chapter XXIX of the Criminal Procedure Code	97	107
Trials appealed under Chapter XXX of the Criminal Procedure Code	726	917
Miscellaneous cases not coming under the foregoing headings	105	98
Total	998	1,929

The 77 cases which came before the court in 1866 for confirmation of sentence of death under Chapter XXVIII of the Code of Criminal Procedure involved 103 persons, and the sentences in regard to 50 of them were confirmed, while in the case of 33 others they were commuted to the alternative punishment of transportation for life. As to the remaining persons, the finding of the Sessions Court was altered and the sentence modified in regard to one person, the Sessions proceedings were quashed and new trials ordered in the cases of 7 persons, 5 persons were acquitted, one person sentenced to capital punishment was reprieved by order of the Lieutenant-Governor, and the cases of 6 persons remained pending at the close of the year.

One hundred and seven cases were adjudicated by the High Court as a court of revision, and in 21 of these the sentences passed by the lower courts were confirmed, in 9 modified, and in 66 reversed ; while 11 cases remained under trial at the close of the year.

In appeals under Chapter XXX of the Criminal Procedure Code the order of the Sessions Judge was confirmed in 730 cases, modified in 57, and reversed in 56 ; while 5 cases were remanded for re-trial or for fresh evidence under Section 422 of the Criminal Procedure Code, and 99 remained undecided at the close of the year.

The total number of miscellaneous cases heard by the court was 98, in 32 of which the petitions were rejected, in 56 the orders of the lower courts were confirmed, in 2 modified, and in 7 reversed ; while one case remained pending at the close of the year.

Courts of Session—Original Jurisdiction.

	1865.		1866.	
	Cases.	Persons.	Cases.	Persons.
Convicted and sentenced to fine, imprisonment, or transportation ...	1,087	2,636	1,436	4,031
Referred for confirmation of sentence to High Court	56	99	62	84
Acquitted ...	447	1,312	590	2,098
Commitments pending at the end of the year ...	225	576	338	1,150
Total ...	1,815	4,623	2,426	7,963

The annexed return exhibits a comparison of the number of commitments tried by the Courts of Session during the past two years with the results of those trials, and the number of cases pending at the close of each year.

The number of appeals heard by the Sessions Courts during the same periods were as under :—

			1865.	1866.
Appeals in criminal trials	3,182	3,558
„ in miscellaneous cases	213	149
			<hr/>	<hr/>
Total	3,395	3,707
			<hr/>	<hr/>

Of the 3,558 appeals from orders passed by Magistrates in criminal trials 406 were rejected, while in 2,269 cases the orders were confirmed, and in 883 either modified or reversed. Of the 149 miscellaneous appeals 60 were rejected, while in 50 cases the orders appealed from were confirmed, and in 39 modified or reversed. The number of appeals pending at the end of 1866 was 107.

The different degrees of punishment awarded, and the number of persons sentenced by the Sessions Judges during the year 1866, were as follows :—

Sentenced to death	75
„ to transportation for life	274
„ „ for 14 years	15
„ „ for 12 „	5
„ „ for 11 „	1
„ „ for 10 „	294
„ „ for 9 „	2
„ „ for 8 „	42
„ „ for 7 „	989
„ „ for 6 „	45
„ „ for 5 „	501
„ „ for 4 „	180
„ „ for 3 „	446
„ „ for 2 „	314
„ „ for 1 year	269
„ „ for less than one year	533
Fined and discharged	99
					<hr/>
Total	4,084
					<hr/>

The number of cases in which capital sentence was passed was 54 in 20 districts, but the number of persons sentenced was 75. Capital sentences passed by the Sessions Judges were not, however, in all instances carried out, as the reference to the High Court resulted in some cases either in the acquittal of prisoners or in the alteration of the sentences passed on them.

The number of cases tried by the Magistrates during 1865 and 1866, and the results of the trials are noted on the margin. The comparison shews a large increase in the numbers of cases and persons tried during the year under review, which was probably due, at least in part, to the famine in Orissa and in other districts, one of the immediate

YEAR.	Number of cases tried by Magistrates.	Number of persons under trial.	Convicted.*	Committed.	Released.	Otherwise disposed of.	Remaining under trial, &c., at the end of the year.	Percentage of persons convicted and committed to total number under trial.	Percentage of persons released.
1865...	60,231	130,307	63,717	4,156	58,534	908	2,902	54	46
1866...	80,920	150,431	76,372	7,500	62,072	1,017	3,410	58	42

results of which was to drive the starving population to the commission of robberies and thefts to an unprecedented extent. The total number of cases pending before the Magistrates at the close of 1866 was 1,684 concerning 3,410 persons, of whom 1,020 were in jail, 1,603 on bail, and 787 on recognizance. Of these cases 57 had been on trial for more than 3 months, against 28, or only half as much as in the preceding year. The percentage of persons convicted and committed to the number tried was, as shewn above, 58 during the year reported upon against 54 in the preceding year, and of the persons released 42 against 46.

The total number of witnesses examined by Magistrates in 1866 was 279,074, of whom 253,095 were discharged on the first day, 21,305 on the second day, and 4,064 on the third day, the number detained for more than three days being 610. The total number of witnesses examined in 1865 was 257,771, or 21,303 less than in the year under review, while the total number of witnesses detained for more than 3 days was 1,604, or 994 in excess of the number in 1866.

Of the 76,372 persons convicted after trial, 21,301 were sentenced to various* terms of imprisonment, 12,129 were visited with lighter punishments, inclusive of whipping under Act VI of 1864, and 42,942 were fined. The Statements C. 1 and C. 2 in the Appendix shew that sentences of whipping were passed by Magistrates

Punishment awarded by Magistrates.

			Rs.
* For two years	262
" less than two years	1,805
" " one year	2,688

altogether on 9,317 persons, of whom 8,770 were adult and 547 juvenile

offenders, and the table on the margin distinguishes between the different

	Adult Offenders.	Juvenile Offenders.
Up to 10 stripes	2,396	287
" 20 "	4,133	184
" 30 "	2,241	76
Total	8,770	547

degrees of severity with which the punishment was awarded. The total amount of fines imposed was Rs. 4,51,959-0-9, of which Rs. 2,85,927-0-2½ was realized.

The attention of Government having been drawn to the large amount of criminal fines remaining unrealized in many districts, and enquiry into the matter having shewn that the existing checks for their realization were very imperfect, a scheme has been introduced which provides for a more accurate system of accounts and procedure, and will, it is hoped, prevent the undue accumulation of arrears.

The figures on the margin shew the average duration of each case before the Magistrates in 1865 and 1866 respectively. The general average for 1866 may be approximately taken at 12 days against 13½ days as the approximate general average in 1865, so that there has been an improvement in this respect to some extent.

	1865.	1866.
In which police agency was employed	16 days.	14 days.
In which police agency was not employed	11 "	10 "

The entire amount of criminal business disposed of and pending before the Magistrates during the past two years is shewn below:—

	1865.		1866.	
	Disposed of.	Pending.	Disposed of.	Pending.
Cases of non-bailable and bailable offences and appeals	68,960	1,627	80,159	1,708
Miscellaneous cases	183,891	2,683	179,098	2,602
Cases under Chapter XXII of the Criminal Procedure Code	624	52	452	36
Total	253,475	4,362	259,699	4,346

This return shews a material increase in the number of criminal cases, but a falling off both in miscellaneous cases and in the cases tried under Chapter XXII of the Code of Criminal Procedure.

The appeals from the orders of Subordinate Magistrates heard by Magistrates of districts during 1866 were altogether 1,333 in number, of which 96 were rejected, while in 828 the orders of the Subordinate Magistrates were confirmed, and in 409 modified or reversed.

In addition to the Stipendiary Magistrates in the service of Government, two gentlemen exercise the powers of a Subordinate Magistrate of the first class, and 17 the powers of a Subordinate Magistrate of the second class. These Honorary Magistrates decided 1,013 cases concerning 1,840 persons, of whom 416 were convicted and 1,424 acquitted. The appeals preferred from their orders were 29 in number, one of which was rejected, while their orders were confirmed in 17 cases and modified or reversed in 11.

The above statistics do not include the crime of the Non-Regulation Districts of the Lower Provinces, for which no returns had been received from the High Court.

Non-receipt of statistics regarding the Extra-Regulation Districts.

In approving a proposal to depute certain Judges of the High Court to visit and inspect the civil courts and offices in the Mofussil, the Government of India, in November 1865, took occasion to

Arrangements for the trial of European British subjects, by Special Commission, at or near the places of their alleged offences.

remark that the practice of bringing down European British subjects from long distances to be tried at the Presidency on criminal charges was both mischievous and unjust, and directed that arrangements should be made, if practicable, for their being tried at or near the place of their alleged offences, by a special commission issued under Act XIII of 1865. This being agreed to by the High Court the places named

Patna,
Bhaugulpore,
Moorsheadabad, and
Dacca.

on the margin were selected for the sittings of such commissions. Some delay has, however, occurred in carrying out the plan owing to the want of suitable accommodation in the jails at these places for the reception of European prisoners under trial. To obviate this difficulty the construction of additional accommodation has been authorized, and steps were being taken for their speedy completion at the close of the year.

The introduction of the jury system in some of the districts of the Lower Provinces was noticed in the

Views of the Lieutenant-Governor on the subject of extending the jury system to all districts in the Lower Provinces and to the trial of all offences.

report for 1862-63, its operation being confined in the first instance to the trial of the offences defined in Chapters 8, 11, 16, 17 and 18 of the Penal Code. It was subsequently proposed that the system should be extended to other districts, and that it should be made applicable to the trial of offences other than those to which it had been at first restricted. In connection with these suggestions, it was also proposed that Judges should be empowered to empanel Special Juries for the trial of cases of peculiar difficulty, and

that arrangements should be made for preventing access being had to Jurors during the continuance of a trial. All these questions are still under the consideration of the Government of India, but in the meantime the Lieutenant-Governor (Sir Cecil Beadon) before retiring from office, considered it right to place on record his conviction that the trial of offences of all classes before the Courts of Session in all parts of the Lower Provinces ought to be by jury, and that the system can be generally adopted without prejudice to the administration of criminal justice, and would be attended with decided benefit to the courts, and increased confidence of the public in their judgments.

The High Court on the contrary maintain, in their annual report on Criminal Justice for 1866, that the working of the system in the seven regulation districts* in which it has been already introduced has not been so successful as to warrant its extension to other places at present.

POLICE.

The Police Establishments in Bengal generally are of three kinds, *viz.*, (1) the Regular District Police, which is paid entirely from the imperial revenues; (2) the Municipal Police, which is paid partly by Government and partly from the Municipal Funds; and (3) the Village Police, which is appointed either by the zemindars or the village community, and paid, as was explained in the report for 1864-65, either in money, or in kind, or by the assignment of lands held on condition of service.

Of these bodies the first and a great portion of the second are enlisted and organized under the provisions of Act V. of 1861. It has been further decided during the year that the whole of the second, whether maintained under Act XX. of 1856 or Act III. (B. C.) of 1864, should be amalgamated with the Regular Police; and the Inspector-General of Police has accordingly been authorized to carry out this measure district by district within the several Police Circles, in communication with the Magistrates and Commissioners. A bill was at the same time introduced in the Lieutenant-Governor's Council to legalize the amalgamation and reconcile the discrepancies between Acts XX. of 1856 and V. of 1861, and this has been passed into law since the close of the year.

The position of the Village Police was fully explained in the report for 1864-65; but no further measures than those then described have yet been taken to remedy the defects of its organization, the whole question being still under consideration.

The table on the margin exhibits the strength and cost of the entire Police Force, exclusive of the Village Police, as it stood at the end of 1866, and further detailed information in regard to the force will be found in Statements D. 1 to D. 3 in the Appendix. The strength of the force has been reduced to a minimum, so much so in fact that some difficulty was experienced during the pressure caused by the famine in supplying men for carrying on the extra duties entailed on the Police in the distressed tract, and extra men had to be employed for the performance of those duties, the cost incurred on this account amounting to Rs. 49,398-11-10, as noted on the margin.

Total	39,30,256	33,95,136	86·3	5,35,120	13·7

It will be seen that of the entire sum expended upon Police Establishments, about 13·7 is paid from funds raised by local taxation. This proportion will shortly be further augmented by the towns being, in accordance with the orders of the Government of India and the provisions of the new law, called upon to pay the greater portion of the cost of the Police employed within their boundaries; and a scheme is being prepared for carrying out this principle in communication with the Municipalities concerned.

The subject of placing at the disposal of the East Indian Railway an efficient force of Government Police has been under the consideration of Government for some years, in connection with the numerous thefts and trespasses committed on the Railway line and the attempts made from time to time to throw carriages off the line. The difficulty which long delayed the carrying out of the measure was the objection of the Railway Company to receive the assistance of any Government Police, on the ground that they had a Police of their own; and they declined to employ any other unless the Government would hold itself responsible for all losses. After a prolonged correspondence on this point the Company have at last been induced to accept the offer of Government, the more readily as the so-called Railway Police had no legal status and difficulties constantly met them in carrying on their

duties. A force of the strength noted on the margin has been organized under Act V. of 1861, under the direction of a Special Superintendent, and made available to the Company, and this force will act on the main line and on all its branches to the east of the Kurrumnassa River. Similar arrangements have at the same time been made on the west side of the Kur-

Superintendent	...	1

Total 747

rumnassa, in the North-West Provinces' division of the line. The Bengal portion of this special Police came on duty from the beginning of January last, and the force having been organized mainly for meeting the requirements of the Railway, the contribution of the Railway Company towards its expenses has been fixed at three-fourths of the entire cost, which, inclusive of all expenses, will amount to Rs. 1,21,120 per annum.

The ordinary work of the Police was much augmented during the year in consequence of the increase of crime resulting from the scarcity prevailing in most of the districts of the Lower

Work performed by the Police Force, and conduct of the force during the year.

Provinces. The Police were also employed in guarding 57 jails, 103 lock-ups, and 141 treasuries and sub-treasuries. Various extra duties, such as the escorting of rice and the guarding of relief stores, were also thrown on them in consequence of the famine; but, notwithstanding all this pressure, the work of the Police generally was well and efficiently performed. The general conduct of the Police force was also reported to be good. In seven cases of torture or maltreatment the persons charged were convicted and punished.

The total number of Police cases under trial in the Criminal Courts and the manner in which they were disposed of is shewn in the comparative table annexed, from which it

	Cases cognizable by the Police.		Cases not cognizable by the Police without special orders of a Magistrate which the Police were directed to take up.	
	1865.	1866.	1865.	1866.
Number of cases reported ...	63,289	73,118	91,505	78,817
" " persons arrested ...	60,124	91,135	88,573	80,003
" " convicted and committed ...	31,240	53,502	48,062	43,172
Number of persons acquitted ...	18,832	32,025	28,439	32,613
" " otherwise disposed of, pending trial, &c.	10,052	5,608	14,072	4,218

will be seen that, although the number of cases cognizable by the Police had increased from 63,289 to 73,118, and the number of persons arrested from 60,124 to 91,135, the number of convictions had increased in still greater proportion, viz., from 31,240 to 53,502. The number of arrests in cases cognizable by the Police was to the number of crimes returned in the ratio of 124 to 100, and the number of convictions was 53 per cent. of the number of

persons apprehended and tried. The total number of cases, including both those cognizable and those not cognizable by the Police, was 1,51,935 against 1,54,794 of the preceding year, which exhibits a small diminution, owing to the non-cognizable cases having decreased by 12,688. But the total number of convictions was 96,674 against 79,302, the percentage of convictions being as 60 to 51. The general results of the Police operations with regard to the principal classes of crime usually dealt with by the Police is shewn in Statement D. 4 in the Appendix.

The table on the margin shews the number of persons arrested and tried, and the number convicted or committed for the more heinous offences during 1866 as compared with the preceding year. The increase in the number of offences against property and in the number of arrests made on that account was mainly attributable to the famine. The greatest number of dacoities occurred in the districts named on the margin, and most of these cases were grain robberies committed by starving people in search of food, and the statistics of crime rose and fell with the price of grain.

The people of the poorer and laboring classes having in many

Release of prisoners convicted of grain robbery and similar offences to which they were driven by want only.

districts been driven to the commission of grain robbery and dacoity by the actual pressure of want felt in consequence of the scarcity, a mitigation or remission of punishment was authorized by Government in every case to which it was found practicable to extend such indulgence. The principles on which these remissions were based were as follow : Where the prisoners were not professional dacoits, and the crime of which they had been convicted was simple dacoity unattended by any aggravating circumstance, the unexpired portion of their sentences was at once remitted ; and the prosecution of such offenders was ordered to be dropped in all cases where release would under these orders follow conviction. Where the crime was attended with aggravating circumstances, the sentence, if not exceeding six months' imprisonment, was allowed to stand ; if exceeding six months, the excess was remitted. Where the crimes had been committed by habitual thieves and robbers the sentences passed by the Sessions Courts were not interfered with.

The value of property stolen during the year was Rs. 12,18,995 against Rs. 9,18,578 in the preceding year, and the value of property recovered was Rs. 3,51,354 against Rs. 2,41,924,

Recovery of stolen property during the year. the percentage of recovery being as 29.31 to 26.33. The Police was also unusually successful in prosecuting receivers of stolen property, the number of cases having been 2,702 against 1,556 of the previous year, and the number of convictions 3,776 against 2,230

The following is a brief sketch of the working of the Detective Department during the year :—

	Number of cases.	Number of persons arrested.	Number of person discharged.	Number of persons made witnesses for the Queen.	Number of prisoners committed.	Number pending trial.

Murders	3	7	1	2	4
Dacoities	13	109	33	14	62
Disrailing Railway Trains..	1	2	2
Post Office cases	1	2	2
Total ...	28	136	38	16	84

The abolition of the Dacoity Department and the institution of a special detective force as part of the new Police were noticed in the report for 1863-64. The plan on which the detective force was organized was however subsequently found to be essentially defective, in as much as, being under the management of one officer of the status of a District Superintendent, it did not work altogether harmoniously with the Regular Police. To remedy

Re organization of the Detective Department.

this defect the Detective Department was re-organized during the year, and a certain number of men, (*viz.*, one extra Assistant Superintendent, one Head Constable, and eight Constables) were placed as Special Police under the immediate orders of the Deputy Inspector-General of each circle, for the purpose of being solely employed in the investigation of serious crimes under the direction of the District Superintendents. This arrangement came into effect in the 1st, 3rd, 4th, and 5th Circles from the 1st April 1867, or immediately after the close of the year, the 2nd or Assam Circle being

excluded from the present from the operation of the scheme owing to the comparative absence of organized crime in that province. The Detective Superintendent has been retained as a special Deputy Inspector-General, and will ordinarily be employed at the head office in Calcutta, but will also

take up the investigation of specially difficult cases from time to time. The financial result of the new scheme has been a saving of Rs. 430 per mensem, as noted on the margin. A code of Rules has been sanctioned for the guidance of the Special Police.

The attention of Government was drawn in March 1866 to a series of dacoities committed by the Rajwars of the Nowadah Sub-Division of the Behar District upon travellers and others in the vicinity of the Grand

Dacoities committed by Rajwars in the neighbourhood of the Grand Trunk Road.

Trunk Road, and it was proposed by the Police authorities, under an impression that the landholders were acting in collusion with the robbers, that under Section 15 of Act V. of 1861 the zemindars and villages should be taxed for the maintenance of extra Police to repress this out-break of crime. Before assenting to this proposal, Government considered it expedient to warn the zemindars and villages of the steps that would be taken in the event of depredations being continued; and this warning has apparently had the effect of putting a stop to the dacoities for the time. It was considered doubtful whether a fresh out-break might not be expected in the beginning of 1867, but no further outrage has been reported up to date. In the meantime it has been ordered that the provisions of the existing law declaring the responsibility of zemindars for reporting the congregation of bad characters in their estates should be strictly enforced, and the District and Assistant Superintendents and the Magistrate and his assistants have been directed frequently to visit the neighbourhood where the robberies usually occur. The Police out-posts in the vicinity have also been ordered to be strengthened from the reserve if necessary, that they may be able to send out regular patrols along the principal passes of the hills.

The table on the margin exhibits the nature and number of heinous crimes ascertained to have been committed in Calcutta and the Suburbs during the year 1866.

Calcutta and Suburban Police.				Calcutta.	Suburbs.
Murder	3	2
Attempt at ditto	3	1
Ditto suicide	5	6
Culpable homicide	7	2

Causing grievous hurt	17	37
Other cases	1,072	241
Total	4,385	1,555

The total number of cases of all descriptions brought to trial in Calcutta during this period was 19,589; while the total number of persons who passed through the hands of the Police was 34,309, of whom 308 were convicted and 114 acquitted by the High Court; 26,185 were convicted and 6,659 acquitted by the Magistrates.

Magistrates; 26 were awaiting trial before the Magistrates at the close of the year; and 1,017 were released by the Commissioner of Police without having been brought to trial. The total number of convictions was 26,493 and of acquittals 6,773, shewing a ratio of 77½ per cent. convictions to 19½ per cent. acquittals. The computed value of property stolen in Calcutta was Rs. 2,06,660-10-4, of which property to the value of Rs. 1,39,485-4-2, or 67½ per cent., had been recovered by the Police.

In the Suburbs the total number of cases brought to trial was 4,506, while the total number of persons arrested was 6,941, of whom 10 were convicted and 10 acquitted at the Sessions, and 3 were awaiting trial at the close of the year; 5,700 were convicted and 755 acquitted by the Magistrates, and 28 awaiting trial; and 435 were released by the Commissioner without being brought to trial. The total number of convictions was 5,710, and of acquittals 765, convictions being to acquittals in the ratio of 82½ per cent. to 11 per cent. The computed value of property stolen in the Suburbs was Rs. 44,305-5, of which property to the value of Rs. 21,694-13-4, or 49 per cent., had been recovered.

The correspondence relative to the payment of the cost of the

Calcutta Police by the Municipality, including the decision of the Government of India on the subject, was noticed in last year's report. It was subsequently

represented by the Justices that, in the absence of any provision for the purpose, they found it quite impracticable to meet the charge from the commencement of the year 1866-67; and, as all the taxes raised by the Municipality could by law be devoted only to the special purposes for which they were imposed, the permission of the Government of India was obtained to the existing arrangements being continued for the current year, pending the introduction of a Bill in the Bengal Council to enable the Justices to raise taxes for purposes of Police. A Bill to this effect has accordingly been introduced, and has been passed since the close of the year. As the cost of the River Police was also to have been borne by the Municipality, another Bill was introduced to amend

the law relating to ships lying in the port, with a view to the imposition of a fair portion of the tax on the shipping ; but it has been since determined by the Government of India that this charge will, for the present, be paid from the general revenues. As to the charges for the Town Police the Government of India has decided that they are to be paid by the Municipality from the commencement of 1867-68, the Government contributing thereto the cost of the Police employed as guards for the Jail and all public offices, and also one-fourth of the remaining charges of the Police to the extent that they may be passed by the Government of India in the Annual Budget Estimate. But this concession was made conditional on the Municipality undertaking to bear all expenses required for the maintenance of the existing Pauper Hospital in Calcutta.

The re-organization of the Calcutta and Suburban Police was noticed in last year's report. The principle of that revision has since been further extended to the Police establishments employed in guarding Government buildings,

Revision of the Police Establishments employed in guarding Government buildings.

the rates of pay allowed to the men having been raised so as to place them on the same footing in that respect as the Executive Police. Their number also has been increased. The total increase of expenditure involved in these arrangements amounts to Rs. 2,605 per annum.

It having been brought to the notice of Government that Magisterial Officers other than Magistrates of the district were in the habit of originating prosecutions against Police Officers for offences under Section 29 of Act V. of 1861, and of punishing them under that section without reference to the District Superintendent, instructions have been issued that the punishment of these offences which are against discipline shall be left entirely to the discretion of the superior officers of Police.

Prosecution of Police Officers under Section 29 of Act V. of 1861.

Clothing for the Bengal Police.

A less expensive uniform for the Police, in which the Native has been preferred to the European style of dress, has been approved during the year.

In connection with the settlement of four Ghatwali tenures in the zemindary of Beerbhoom, which had lapsed under Section 5 of Regulation XXIX. of 1814, the question was raised whether, having regard to the conditions of Police Service attaching to such tenures, they could be settled with non-resident or European holders. It has been decided that in all cases of re-settlement of lapsed Ghatwali tenures in Beerbhoom a money payment may be accepted by Government in lieu of service, such payment being quite distinct from the rent paid on behalf of the zemindar. The sum thus secured to Government will be applied to the purposes of Police.

Rule regarding money payments in lieu of personal service due from Ghatwals.

The Government of India invited the opinion of this Government in regard to the adoption of certain rules proposed by the Government of the North-Western Provinces for the pursuit and apprehension of offenders absconding into native states, the principal object of which was to enable Police Officers

Rules proposed for the pursuit and apprehension of offenders absconding into Native States.

to pursue offenders in heinous cases into native states and there obtain their apprehension through the officials of the state. In reply it was explained that, in regard to Nepal, which has a considerable slip of terai in the plains, and the boundary of which is for the most part an arbitrary line separating villages occupied by a homogenous population, it is very desirable that there should be some understanding between the two countries under which the police of both should co-operate for the prevention of heinous crime on the border, and that, if the Nepalese Government should be unable or unwilling to co-operate effectually for this purpose, it is very necessary that it should be pressed to agree to some such arrangement as that proposed in the rules. As to the other native states contiguous to Bengal the treaties with Bootan and Sikhim (like that with Nepal) already bind those states to give up heinous criminals on the requisition of the British Government, and the Rajah of Sikhim being always very willing to do all in his power to assist the British authorities, no further arrangement is necessary in regard to that state; while, as to Bootan, it being hopeless to expect the co-operation of any local Booteah official, the Police have already been authorized to pursue offenders across the border under certain restrictions, and, if they are unsuccessful in their pursuit, the only remedy is to seek reparation from the Government of Bootan. The same rule, it has been suggested, should also be made applicable to Manipore. As to the frontier tribes bordering on Assam and Eastern Bengal, these having no organized Government and being incapable of co-operation with our Police, the rules proposed by the Government of the North-Western Provinces are altogether inapplicable to them.

PRISON DISCIPLINE.

Sixteen Jails were visited during the year 1866 by the head of the Department; and twenty-six Jails, ten Lock-ups, and three Lunatic Asylums were inspected during the first four months of 1867.

The total number of prisoners in custody in 1866 was 114,870*				against 90,333 in the preceding year.
Prisoners in custody.				Of these the number remaining in Jail
* Male	108,914	on the last day of the previous year was
Female	5,956	18,919, while the number admitted into
				Jail during 1866 was 95,951, against
				72,617 admitted in 1865. The admis-
				sions into Jail during 1866 exceeded
Total	...	114,870		therefore the exceptionally high number
				of the preceding year by 23,334 pri-
				soners, the increase being mainly due

to the scarcity and high cost of food consequent on the drought which prevailed in many districts impelling many to commit crimes in order to obtain food at once, or to secure it in Jail should they be convicted and imprisoned.

Fifty-seven of the above prisoners were capitally punished, 2,347

Disposal of prisoners.

*	1865.	1866.
Executed	70	57
Died in prison	1,129	2,317

Jails to an extent that could not fail to be followed by its usual consequences among an exceptionally sickly population. The average rate per cent. of mortality for the last six years is given on the margin.

Of the 95,951 prisoners admitted into Jail during the year 324 were fairly educated for their position in life, 5,384 could barely read and write, while 90,243 were entirely ignorant.

Education of prisoners.

The annexed table exhibits a comparison of the escapes and re-captures that occurred in 1866 as compared with those in 1865. The increase in the number of escapes was due to out-breaks in the Bancoorah, Balasore, Maunbhoom, and Singbhoom Jails, from which 195 prisoners escaped during the year, but of these 105 were re-captured, and the percentage of re-captures altogether was more satisfactory than in the preceding year :—

YEAR.	Daily average strength in Jail.	Number of escapes.	Ratio of escapes to daily average strength.	Number of re-captures.	Ratio of re-captures to escapes.
1865	18,842	291	1.54	154	52.92
1866	22,151	457	2.06	304	60.52

The daily average of prisoners sentenced to labor was 18,035, against 15,882 in the preceding year; and the annexed statement shews the manner in which these prisoners were employed. The number sentenced to labor being considerably higher, there was a corresponding increase of prisoners under every head of labor and also in the number inefficient for work from sickness and other causes. The increase in the number of prisoners hired to Public Departments was due in a great measure to the over-crowded state of the Jails rendering

Disposal of the laboring strength in Jail.

it necessary to employ the surplus prisoners on out-door work. In all these particulars the year was exceptional :—

	In 1865-66.	In 1866-67.
Employed in ordinary manufactures	9,418	10,488
" in the Alipore Jail Press	289	325
Hired to Public Departments	496	917

The annexed statement shews the results of the labor of the 10,488 prisoners who were employed in ordinary manufactures, as compared with eleven-twelfths of the results in 1865-66. The gross out-turn produced by the prisoners during the year under review was, it will be perceived, considerably in advance of that of the previous year, the result being an increase of profits to the extent of Rs. 9,306-1-2½. The average earning of each prisoners was, however, less than in 1865.

The out-turn of the typographic and lithographic departments of the Alipore Jail Press amounted to Rs. 1,53,844-8-5 at an outlay of Rs. 53,925-9-6, which gave a net profit of Rs. 99,918-14-11. The

number of prisoners employed in the press was 325. The average earning of each prisoner therefore was Rs. 307-7-1.

The cost of maintaining the prisoners during the year is shewn on the margin.

Increase			3,57,910	7	1

The increase was very considerable, the greatest increase being in the cost of food, which was entirely due to the higher price of the necessaries of life throughout Bengal consequent on the famine. The immediate influence of the scarcity was so great that the mean cost of

maintenance in the Jails in the Cuttack Division and the districts adjoining it, where the distress was most severe, amounted to about Rs. 60 per prisoner.

In addition to the above outlay an expenditure of Rs. 1,90,733-4-1 was incurred for Police guards required for Jails, and of Rs. 18,928-10-3 for general superintendence, the total expenditure for the year being thereby raised to Rs. 13,92,890-4-6½.

The most expensive Jail during the year was the European Penitentiary at Hazarcebaugh, in which each prisoner cost Rs. 331, while the prison most economically managed was that at Tirhoot, where the outlay per prisoner amounted to Rs. 28.

Net expenditure of the year.

The net expenditure incurred by the State is shewn in the subjoined return :—

It will be seen that more than one-fourth of the expenditure was covered by the produce of the labor of a portion of the prisoners.

The Jails throughout the Lower Provinces were seriously overcrowded during the year, principally, as stated above, on account of the scarcity of grain which drove the poorer classes to the commission of crime. To obviate the evil consequences of this over-crowding early orders were issued by Government to provide temporary shelter and special guards for the excess number of prisoners; and, with a view to economize guards as much as possible, it was suggested that these additional buildings should be constructed only at a few of the larger Jails, *viz.*, such as had the largest enclosed space available for sheds, the prisoners from neighbouring Jails being transferred thereto for safe custody. On this plan accommodation was provided for 600 additional prisoners in the Decgah Jail, 200 additional prisoners in the Hooghly Jail, and 500 additional prisoners in the Beerbloom Jail.

The numerous convictions of dacoity and grain robbery in the districts afflicted by famine having led to the incarceration of more prisoners than could be profitably provided with in-door labor, the rules of the Jail Code prohibiting out-door employment were temporarily suspended during the year, and gangs of prisoners under proper guards were placed at the disposal of the Magistrates of districts for employment in the cleansing of stations and removal of the jungles in their vicinity.

The temporary suspension of the general rule prohibiting the extra-mural employment of prisoners in Assam was noticed in the report for 1864-65. The reasons for which this suspension was sanctioned were the unhealthy condition of the stations and the extreme difficulty of procuring free labor in the province; and the order directed that convict labor should be made available for improving the stations as soon as a scheme for carrying out the necessary works could be matured by the Public Works Department. Much time, however, having been lost in preparing the scheme, and the stations in the meantime becoming overgrown with jungle, it has been since ordered that the plan for improving each station shall be devised by the Deputy Commissioner of the district in communication with the Civil Assistant Surgeon and the Executive Engineer, and that convict labor shall be employed in carrying it out to the extent available after providing for the necessary works inside the Jails.

Several escapes having taken place from among prisoners entrusted to the keeping of convict work-overseers, warders, and guards, and the High Court having decided that, in the absence of any provision to that effect in the Jail Rules, convicts thus employed were not legally bound to keep in confinement the prisoners committed to their care, an additional rule has been laid down by which all convict work-overseers, warders, and guards are bound to prevent and report all escapes or attempts to escape

which may fall under their notice. Instructions have been given at the same time to the effect that, as a general rule, convicts should not be employed as guards when it can be avoided, except in places from which the prisoners in their custody cannot escape without great difficulty.

The rules regarding the removal to the Alipore Jail of prisoners under sentence of transportation were recast during the year, and a few additional rules laid down for the purpose of preventing irregularities which had crept in of late.

Revised rules for forwarding prisoners under sentence of transportation to the Alipore Jail.

To prevent overcrowding of convicts at Port Blair, and in accordance with the orders of the Government of India, no convicts sentenced to transportation for periods of less than fourteen years have been sent to that settlement during the year.

Order for the detention of convicts sentenced to transportation for less than fourteen years.

A revised set of rules for convict ships and for the management of convicts under sentence of transportation in transit to the Penal Settlements was under consideration at the close of the year.

Revised rules for convict ships and for the management of convicts in transit to Penal Settlements.

The question of introducing a system of education in Jails was considered during the year. It was found upon enquiry that under existing arrangements the usual plan adopted in those Jails which had taken any steps at all in this direction was that the educated convicts were employed at odd hours in instructing the others. On the withdrawal of these convict teachers from any Jail, either by transfer or release, a complete stop was put to the course of instruction in that particular Jail. To meet this difficulty and reduce the body of convicts receiving instruction to a manageable number, it has been ordered that in future the privilege of learning to read and write shall be confined to well-conducted prisoners, and that at each Jail an educated convict shall be employed in teaching them the elements of Vernacular education, a paid teacher being employed where such educated convict is not available. The instruction is to be conveyed in a room set apart for the purpose, and all expenses incurred for the erection of such rooms and on account of paid teachers, where they are required, are to be debited to the Convict Labor Fund.

Jail Schools.

concerned; and of the optional registrations again 45,215 were of instruments affecting immovable property, and 29,196 of simple money bonds or other personal contracts.

The aggregate receipts of the department amounted to Rs. 2,93,108-8-8, and the aggregate expenditure to Rs. 2,07,122-9-10, which left a surplus of Rs. 85,985-14-10. By the reduction of fees under the new scale the average cost to the public generally of registering each document was during the year reduced from Rs. 3-5 to Rs. 1-12; and the cost to Government was reduced* from Rs. 2-5 to Rupees 1-4. But the loss to revenue thus occasioned was made up by the extra and additional fees and penalties realized during the same period. It has, however, become apparent that the minimum fee of four annas is too low, and since the close of the year the permission of the Government of India has been received to its being doubled.

Representing the aggregate results as to the works, receipts, and

charges of the department by 100 in each case the annexed table exhibits the proportion of registrations effected, fees realized, and expenditure incurred in the different Divisions of the Lower Provinces and in the General and Calcutta Registry Offices. The receipts were the greatest in Calcutta, and the Patna, Bhaugulpore, and Rajshahye Divisions; and they

were the least, as compared with the work performed, in the Chittagong and Cuttack Divisions.

Two special Sub-Registrars were appointed during the year, *viz.*, one in Chittagong and the other in Balasore.

By the arrangements sanctioned on the introduction of the Registration Act the registration districts were made conterminous with the districts in executive charge of Magistrates and Collectors, and those officers were appointed District Registrars ex-officio. This plan however, was soon found to work badly, as owing to the other important and heavy duties devolving on them the ex-officio Registrars were not able to exercise a proper supervision either over their own or the subordinate registry offices. It was therefore determined to reduce the number of registration districts and place them under special officers as soon as the financial position of the department should allow of it. The receipts from registration having since considerably exceeded the expenditure of the department, it has accordingly been proposed to the Government of India that, as an experiment, three special registration districts should be formed conterminous with the Divisions of Patna, Nuddea, and Burdwan respectively, and that special officers should be attached to these, selected ordinarily from the covenanted service, their salaries being fixed according to their standing, but not to exceed Rs. 1,000 per mensem. The work of registration having much increased in many sub-districts it has at the same time been proposed to extend the principle of appointing special Sub-Registrars to those sub-districts or groups of sub-districts in which the registration work cannot be performed with efficiency by the ordinary executive agency, and permission has been asked for the appointment of eight additional officers for this purpose, who are to be included in the subordinate executive service, and who with those previously appointed are to be distributed over the last three grades of that service.

The officers employed in the Non-Regulation territories under this Government, of grades below that of

Re-organization of the salaries of the officers employed in the Non-Regulation Districts.

Judicial Commissioner, were amalgamated into one service by a Resolution dated 19th April 1864, when a new scale of salaries for all grades was also laid down. The Deputy Commissioners and Assistant Commissioners in Oude and the Punjaub having subsequently received an augmentation of salary under the sanction of Her Majesty's Government, it has been since proposed to modify the above scale and to place the officers of the same grades in Bengal on an equality in regard to pay with those in Oude and the Punjaub, the duties performed by the former being analagous to and not less arduous than those required of the latter. It has at the same time been recommended that the Commissioners and Judicial Commissioners in the Non-Regulation Provinces under this Government should, in respect of emoluments, be placed on a par with the Commissioners and Judges of the Regulation Districts, in order that the services of officers of thorough experience and training in revenue and judicial business may be available for the Non-Regulation Provinces, where qualifications of the highest standard are required even in a greater degree than in an ordinary Divisional

Commissionership and Zillah Judgeship. The total increase of expenditure involved in the scheme proposed amounts to Rs. 1,89,600 per annum.

The Uncovenanted Officers of the Judicial Service in Assam, who were hitherto in a very inferior position in respect to emoluments as compared with officers of the same class in the Regulation Districts, have been placed on the same footing with them in regard both to salaries and grades. This will allow of the selection and appointment of the Assam Officers being made upon the same considerations and under the same rules as in the Regulation Districts; and the vacancies in Assam are accordingly to be filled up in future from the general service, the officers employed in Assam having similarly claim to promotion to vacancies in Bengal.

The scale of establishments maintained in the Chota Nagpore Division having become insufficient for its present requirements, and it having been at the same time found inconvenient

Assimilation of the Uncovenanted Judicial Service in Assam with that in the Regulation Districts.

to depute at all times from the Executive Service of the Regulation Provinces the number of additional officers required to meet the increased work of the Division, a scheme has been proposed for re-organizing the entire Judicial and Executive Service of the Province, by which the staff at present attached to it will be increased by eight additional officers, (*viz.*, five of the grade of Assistant Commissioners, one of the grade of Principal Sudder Amcen, and two of the grade of Sudder Ameen,) and a Moonsiff be also attached to the important sub-division of Palamow. The additional expenditure involved in these arrangements amounts to Rs. 51,708 per annum.

The appointment of a Committee for the revision of Magistrates' office establishments in Bengal was noticed in the report for 1864-65. A scheme of revision was submitted by this Committee in January 1866, but, while it was still under consideration, the Government of India communicated to this Government a note by Mr. J. Strachey proposing a general revision of the salaries of all the ministerial establishments attached to the divisional and district courts in Bengal—Criminal, Civil, and Revenue. The particular question of Magisterial offices was thus merged in the wider proposition raised by Mr. Strachey. Another Committee was accordingly appointed during the year for considering and reporting on the whole question of increasing the salaries of the ministerial officers attached to the courts of Judges, Magistrates, and Collectors in the several districts of the Lower Provinces. But they had not concluded their labors at the close of the year.

The amalgamation of the offices of Magistrate and Collector, which had been successfully carried out in all the other districts of the Lower Provinces was a year or two since effected also in the 24-Pergunnahs. Experience shewed, however, that the heavy work of that district was too much for one officer to carry on even with the aid of a large staff of Covenanted and Uncovenanted Assistants. A proposition

Revision of the Judicial and Executive Establishments in Chota Nagpore.

Committee for the revision of Ministerial Establishments attached to the courts of Judges, Magistrates, and Collectors in Bengal.

Proposed re-establishment of the district of Baraset.

has accordingly been made to the Government of India for reviving the district of Baraset which was amalgamated with the 24-Pergunnahs in 1861. It has now been proposed to re-construct it so as to include the sub-divisions of Busseerhaut and Satkhira and the Cantonments of Dum-Dum and Barrackpore, in addition to the sub-division of Baraset itself.

The plan on which the re-adjustment of thannah and sub-divisional boundaries has been carried out in the several Divisions of the Lower Provinces has been frequently referred to in the reports for previous years. During the year under review a similar scheme was sanctioned for the Cuttack Division, in which the existing arrangement of three districts has been retained, but the number of sub-divisions has been increased from four to five, by the creation of a new sub-division (that of Juggutsingapore) in the Cuttack District, with a view to reduce the extent of the Kendrapara Sub-Division. These new arrangements have been duly notified, but the geographical details were still in the hands of the Boundary Commissioner at the close of the year.

A scheme of sub-divisions has also been sanctioned for the Dacca Division, by which the number of sub-divisions has been increased from eleven to eighteen. The re-adjustment of jurisdictions involved in this scheme had already been partially carried out from time to time, and was being completed at the close of the year, but much difficulty is found in supplying officers to take charge of the sanctioned sub-divisions.

In order to enable the Joint-Magistrate, or senior officer exercising the powers of a Joint-Magistrate, to render more useful assistance to the Magistrate than heretofore, a plan was devised during the year for placing every such officer in charge of the Sudder or Principal Sub-Division of the district to which he stands appointed, to exercise therein the powers of a Magistrate as defined in Act XXV. of 1861, for the purposes of that Act. The scheme was at once carried out in all the districts of Patna, Bhaugulpore, and the Presidency, Divisions, where the sub-divisional system had been carried out. It was also subsequently introduced in the districts named on the margin, where temporary sub-divisions were formed pending the completion of the sub-divisional scheme. Since then the sub-divisional scheme for Cuttack has been sanctioned as stated above.

The sanction of the Government of India has also been obtained to the establishment of a sub-division in the Hylakandy Valley of the district of Cachar, a step which is rendered necessary by the existence of numerous Tea Gardens in the valley. The sub-division will be placed in charge of a

First Class Extra Assistant Commissioner, and every Tea garden at the south end of the valley will thus be within convenient reach of a Magistrate. For the same reasons a sub-division has likewise been established at Bishnath, in the district of Durrung, and placed in charge of an additional Assistant Commissioner.

Some disputes arose during the year with regard to the cultivation of indigo between the ryots and the managers of the Pandoul factory, in the Durbungah Estate, in Tirhoot, the principal points at issue between the conflicting parties being as follows: The factory maintained that in addition to the *neejabat* indigo lands, or lands undoubtedly in possession of the factory and cultivated by factory ploughs, there were in every village other lands equally in the possession of the factory which were cultivated in indigo for the factory by the ryots, and in respect of which the ryots were not cultivators of indigo in their own lands for the factory under contract, but merely hired laborers cultivating *zerat* lands on behalf of the factory and receiving wages in return. The ryots, on the other hand, asserted that the lands thus described were not factory *zerat* but formed part of their own proper holdings; that the factory people prevented them from cultivating these with cereals and other crops which paid them better than indigo, by falsely claiming these lands as *zerat* and accusing the ryots of criminal trespass when they attempted to cultivate them in the manner they liked best; that they were also very much oppressed by their ploughs and plough bullocks being taken away from them during the manufacturing season for the purposes of the factory, and that while the factory leased villages from the Durbungah Estate on the same rent as before, the rates levied from the ryots had been considerably enhanced by the introduction of a system of sub-letting the villages to the factory servants who were rapacious in their demands. The result of these differences was that the ryots of a number of villages, who had been in the habit of cultivating indigo for the factory under the conditions current in all Tirhoot, and who had this year, up to the time when the disputes broke out, been engaged in preparing the lands for indigo, suddenly united in refusing either to finish the preparation of the lands or to allow the factory to do so, and this led to one or two collisions with the planters' servants, which, however, were not of a serious character.

On these disputes being reported to Government the local officers were at once directed not to interfere executively in the matter further than by maintaining the actual possession of individuals and preventing any breach of the peace. They were to leave all questions of right to land and of the legal obligation of the ryots to cultivate indigo for the factories to the decision of the courts, and to impress on the planters the wisdom of viewing the subject in a broad and conciliatory spirit, especially with reference to the statement that the cultivation of cereals and other crops offered larger inducements to the cultivators than indigo at the rates now paid for it. The Police were ordered to be strengthened in all villages where disputes had arisen.

The aspect of affairs has since apparently changed. In most of the early cases which came up for adjudication the decisions of the courts

were in favor of the factory, the ryots being convicted of criminal trespass under Section 447 of the Penal Code; and this at once led to a more submissive tone being assumed by the ryots and to the compromise of many of the pending suits. The necessity of increasing the rates paid for indigo has been at the same time recognised by several of the Tirhoot planters, and the Pandoul ryots have come to terms with the factory. In connection with the system of sub-letting, and its attendant evils which obtained in the Pandoul concern, which holds most of its lands in farm from the estate of the minor Raja of Durbungah, which is now under the management of the Court of Wards, an enquiry was being made at the close of the year into the entire question of the relation subsisting between the farmers and ryots in the Durbungah Estate.

An article having appeared in a native newspaper condemnatory of the Hindu practice of taking sick people to the river side to die, which was believed to hasten or even to cause many deaths, enquiries were made unofficially with a view of ascertaining the prevailing feeling of the Hindu community on the subject, and the expediency or otherwise of Government interfering to put a stop to the custom. The information obtained shewed that the practice was confined to the districts bordering on the river Ganges, from the confluence of the Great Gunduck opposite Patna to the defluence of the Bhagiruttee below Rajmehal, and thence along the course of the Bhagiruttee by Calcutta to the sea; that the orthodox Hindus drew a distinction between *gungajatra*, the practice of taking sick persons to the river side to die, and *antarjali*, that of immersing the lower half of the body of the sick person in the water of the river, (the latter practice being not absolutely enjoined by the Shastras though believed to carry with it a certain promise of salvation;) and that the educated portion of the Hindu community considered the whole ceremony repulsive, though they did not wish that the Government should interfere with it. The conclusion arrived at, on these premises, by the Lieutenant-Governor (Sir Cecil Beadon) was that though it was not expedient absolutely to prohibit the practice at present, the Government could safely take measures to discourage it openly, and also to regulate it by requiring that in every such case a notice should be given to the Police of the intention to carry a sick person to the river side, such notice being in the form of a declaration signed by the nearest relatives of the sick man to the effect that there was no reasonable hope of his recovery. It was directed that where practicable this should be accompanied by a certificate to the same effect from the medical attendant of the sick person. The Government of India, however, did not consider it advisable to follow the course proposed.

Hindu practice of taking sick people to the river side to die, and the expediency of adopting measures for putting a stop to it.

Several petitions having been presented to Government for the enactment of a law to restrain the abuses attending the practice of polygamy among certain classes of Hindus, and it appearing from these and from the

Proposal for restraining the abuses attending the practice of polygamy among the Hindus.

Several petitions having been presented to Government for the enactment of a law to restrain the abuses attending the practice of polygamy among certain classes of Hindus, and it appearing from these and from the

notices taken of them by the Native Press that the great bulk of the more advanced section of the native community were anxious to have some check placed on a social abuse which had become intolerable, an application was made to His Excellency the Governor General, under Section 43 of the Indian Council's Act, for permission to introduce into the Bengal Council a Bill for the prevention of polygamy among the Hindus in Bengal, except under certain specified circumstances. The Government of India, however, doubted whether the popular feeling in Bengal was sufficiently prepared for legislation on this subject, and also remarked that the proposed measure, at the same time that it would restrain the excesses of polygamy, would have the effect of giving legal sanction to its adoption within the prescribed limits, an objection which, in the opinion of the Government of India, was entitled to ~~greater~~ weight than the Lieutenant-Governor appeared inclined to concede to it. On these considerations the Governor General in Council desired that no Bill should be at present introduced, but that further enquiries should be prosecuted. Acting under these directions the Lieutenant-Governor appointed a Committee, consisting of some of the leading members of the native community in Calcutta, associated with Messrs. Hobhouse and Prinsep, with instructions to mature a scheme which would put a stop to the evils complained of, without, on the one hand, affecting the general liberty possessed by all Hindus of taking more than one wife, or on the other giving express sanction to that liberty by a legislative enactment. The report of the Committee was submitted towards the close of the year. The Koolin Brahmins being the class to whom the excesses complained of were almost exclusively confined, the Committee gave a sketch of the origin of this denomination of Brahmins and of the various classes of Koolins existing at the present day. They also enumerated the customs now prevalent, from which the alleged abuses (which they believed to be exaggerated and on the decline) took their rise. They further proved very clearly that these customs had for the most part no warrant among the approved authorities of Hindu theology. Thus far, in the opinion of the Committee, the path for legislation was smooth enough, as a declaratory act might be passed setting forth the law on the subject of polygamy and making any infraction of it penal. But the report further shewed that, although the chief abuses of polygamy would be condemned by a reference to the authorized Hindu law, this law at the same time warranted the supersession of one wife and the contraction of subsequent marriages on many grounds which in the eye of English law were frivolous or untenable. They therefore pointed out that, owing to the restriction imposed upon them that legal sanction to polygamy was not to be conveyed, they were unable to recommend even the passing a declaratory Act of the kind stated above, and in this view the Lieutenant-Governor now concurred. In the meantime a Despatch was received from the Secretary of State, in which he objected to any measure of a legislative character being adopted at present, as it did not appear that a large majority of the people even in Bengal were against the practice of polygamy, apart from the special abuses practised by the Koolin Brahmins.

SECTION II.—LEGISLATIVE.

THE Council of the Lieutenant-Governor of Bengal for making Laws and Regulations met, pursuant to Proclamation, on the 15th December 1866, and continued its sittings beyond the termination of the official year 1866-67, the proceedings up to which date, however, are alone included in this report.

Act I of 1867 was passed to remove some obscurity in the language of Act VI of 1863, which had been held to impose upon the Justices of the Peace for the Town of Calcutta the necessity of maintaining the existing arrangements

for the supply of water until works similar in character to those abandoned were substituted. Act I of 1867 declares the intention of the former Act to have been merely that the Justices should substitute some other work, so that upon its completion the supply of water should not be less than it had been before, and requires the Justices to obtain the sanction of the Lieutenant-Governor for the substitution.

Act II of 1867. The Governor General of India in Council having passed an Act for the punishment of public gambling in certain territories subject to his immediate Government, this Act was passed to extend similar provisions to Bengal. Accordingly by

An Act to provide for the punishment of public gambling and the keeping of common gaming houses in the territories subject to the Lieutenant-Governor of Bengal. (Received the assent of the Lieutenant-Governor on the 30th March 1867, and of the Governor General on the 1st April 1867.)

this Act power has been conferred on the Lieutenant-Governor to apply its provisions to any place in the territories under his control save the town of Calcutta, and penalties are imposed upon every person who may be the owner or occupier of a common gaming house or found in one. Power is given to certain officers to search houses suspected of being common gaming houses. Penalties are imposed upon persons refusing to give their names and addresses and on persons gambling in public places. Provisions are made for evidence and procedure under the Act, and for the repeal of some provisions in former Acts inconsistent with or superseded by it.

Act III of 1867 provides for the more efficient regulation of ships lying in ports in Bengal and for the maintenance in those ports of such Police as may be necessary and of hospital accommodation for sailors. Serious disasters having

An Act to amend the law relating to ships lying in ports in the provinces under the control of the Lieutenant-Governor of Bengal. (Received the assent of the Lieutenant-Governor on the 20th March 1867 and of the Governor General on the 30th April 1867.)

occurred in consequence of ships being left afloat in harbours without crews, or with insufficient crews, a penalty is imposed for leaving ships with less than a minimum crew provided in the Act; but power is given to the Conservator of a port to license vessels to remain without a crew on board when from any reason this may be permitted without danger to the shipping in harbour. Masters of ships are subjected to penalties for wilful neglect to extinguish fires. Power is given to the Lieutenant-Governor to charge upon the fund of every port the expense of port

Police and the expense of such additional Police in any town as may be rendered necessary by the resort of shipping thereto. Very heavy expenditure had been incurred by several hospitals in the support and medical treatment of sick seamen under circumstances which did not impose upon any particular ships the expense of the medical care of such seamen: and difficulties had been found in recovering such expense even where ships were by the Merchant Shipping Act bound to pay. This Act provides for levying a port-due upon ships to be applied towards support of hospitals suitable for seamen, and gives power to refuse port-clearance to a ship until all expenses of sick seamen chargeable against it shall be paid.

The above are the only Acts which had at the close of the official year been passed.

In addition to the above Acts the following Bills had been introduced but were still pending before the Council at the close of the official year :—

On the 15th December 1866 a Bill was brought in by which it was proposed to authorize the Justices of the Peace for the Town of Calcutta to apply a portion of the municipal fund of the town to purposes of public benefit not contemplated by the Municipal Acts, and

A Bill to provide from the Municipal Fund of the Town of Calcutta the expense of the Municipal Police of that Town, and to enable the Corporation of the Justices of the Peace for the Town of Calcutta to apply a portion of the said Fund to certain purposes.

to impose upon that fund the expense of the Municipal Police of the town. The Bill was considerably modified by a Select Committee, and on the 4th April was again referred to the same body for further consideration.

Grave complaints had been made of the evil effects produced by the overcrowded state of lodging-houses in Pooree during certain festivals, and this Bill was introduced to enable the local authorities to check such overcrowding. The

A Bill for the better regulation of Lodging-houses at Pooree.

Select Committee in their report of the 29th January 1867 recommended a total alteration of the principle of the Bill, and it was on the 23rd day of February 1867 referred to them for further consideration. On the 23rd March they made their further report:

This Bill was introduced on the 11th February 1867. By it, it is proposed to constitute the Police force in all towns, except Calcutta, a portion of the General Police Establishment, and to provide for

A Bill for the better regulation of the Police in Towns and Municipalities in the territories under the control of the Lieutenant-Governor of Bengal.

the payment of such Police force out of local rates. This Bill was referred to a Select Committee on the 23rd day of February 1867.

This Bill was introduced on the 16th February 1867. The purport of the Bill is to make all

A Bill to provide for the recovery of rates for water supplied by the East India Irrigation and Canal Company.

rates for water supplied by the East India Irrigation and Canal Company for purposes of irrigation payable to the Government, and to assimilate the mode of collection of such rates to that of collecting land revenue. The Bill was on the 23rd day of February 1867 referred to a Select Committee.

On the 2nd March 1867 this Bill was introduced. It was necessitated in consequence of a question raised respecting the jurisdiction of Deputy Collectors under Act VI of 1862. Acting upon a decision of the

A Bill to explain and amend Act VI of 1862 passed by the Lieutenant-Governor of Bengal in Council, and to give validity to certain judgments.

High Court, many Covenanted Deputy Collectors who had been authorized by the Collector of the district, or were in charge of a sub-division of a district, had assumed that they had power to exercise appellate jurisdiction in rent cases. A subsequent decision of the High Court ruled that they had no such power. The Bill proposes to give validity to all such judgments which had been so passed by Deputy Collectors, but to prohibit future exercise of appellate jurisdiction by them. This Bill was referred to a Select Committee on the 9th day of March 1867.

On the 16th March 1867 this Bill was brought in. By it, it is proposed to consolidate and amend the law relating to the transport of laborers to the districts of Assam, Cachar, and Sylhet, and their employment therein. The Bill was referred to a Select Committee on the 30th day of March 1867.

A Bill to amend Act III of 1863 and Act VI of 1865 passed by the Lieutenant-Governor of Bengal in Council.

This Bill was introduced on the 23rd March 1867. It merely proposes by this one general enactment to avoid the necessity of repeating in each separate Act certain clauses which are almost invariably introduced in legislation. The Bill was referred to a Select Committee on the 30th day of March 1867.

A Bill for shortening the language used in Acts passed by the Lieutenant-Governor of Bengal in Council.

This Bill was introduced on the 30th March 1867. By it, it is proposed to enact provisions for the regulation of boats plying for and carrying passengers within the Port of Calcutta. The Bill was referred to a Select Committee on the 6th day of April 1867.

A Bill for making better provision for the regulation of boats plying for and carrying passengers within the Port of Calcutta.

SECTION III.—REVENUE.

LAND REVENUE.

The annexed statement shews the demands, collections, remissions,

Demands and collections of Land Revenue.

YEAR.	Number of Estates.	Current Demand.	Total, including Arrear Demand.	Collections.	Remissions.	Balance.
		Rs.	Rs.	Rs.	Rs.	Rs.
1851-52 ...	215,667	3,69,13,128	4,02,91,909	3,58,72,705	3,14,888	41,04,816
1856-57 ...	181,590	3,65,11,820	3,96,73,425	3,62,59,235	1,31,071	32,43,119

and balances of Land Revenue for the year 1866-67, as compared with the year immediately preceding it and with three anterior years at quinquennial intervals. The comparison however is so far inaccurate that the results of only

eleven months are shewn against 1866-67. Taking the results of twelve months for comparison, that is, from April 1866 to March 1867, as noted on the margin, the current demand exhibits a steady increase, and the collections a small decrease, principally in the Cuttack Division, and attributable to special causes. The remissions and balances were both less than in the preceding year; the advance payments on the other hand were greater, being Rs. 4,42,873, against Rs. 2,01,433.

A Statement (F. 1) in the Appendix exhibits the results of the year in detail on account of each division separately.

The number of petty estates redeemed during the year was 234, with

Redemption of Government Revenue.

Total ..	234	320	9	5½	4,557	2	3½

and the payment made for redemption was Rs. 91,631-11-3½.

The redemption of the land revenue of petty estates at ten years' purchase was originally sanctioned in 1852 in the exceptional case of Chittagong, and afterwards extended in 1854 to all petty estates in the Lower Pro-

vinces, on the ground that the small profit which they yielded was quite insufficient to cover the expenses of collection, and when sold by public auction there was no competition for them, so that in many cases they did not fetch even two years' purchase. The progress made in redeeming these estates has, however, not been so considerable as was originally expected, and has had no effect whatever in reducing the cost of collection. The practice of redemption has, moreover, in some districts, such as Monghyr, been found to be disadvantageous when viewed in connection with the working of the Butwarrah law, since the process of minute sub-division necessarily reduces the jumma on some shares to an exceedingly small amount, and the end sooner or later would be the redemption of such shares at sums less than their worth; and for these reasons the order of 1854 has been formally rescinded, leaving only the previous order in respect to Chittagong in force. The permission to redeem

an aggregate revenue of Rs. 320-9-5½, the price of redemption amounting to Rs. 4,557-2-3½. The rates of redemption were twenty years' purchase of the revenue in Chinsurah, 15 years' purchase in Calcutta, and ten years' purchase elsewhere. The total number of estates redeemed up to the close of the year was 15,054, bearing an aggregate yearly revenue of Rs. 8,031-0-10½.

petty estates has thus been withdrawn in all places with the exception of Chittagong, Calcutta and its Suburbs, and Chinsurah.

The sale of proprietary rights in Government estates during the

Up to the end of 1866-67	56	236	23,487

The annexed return exhibits the results of the sale of plots made over temporarily to the Railway Company and since relinquished by them.

The Statements F. 2 to F. 5 in the Appendix give all the particulars relating to the sale and lease of Waste Lands during the year.

Sale and lease of Waste Lands, and commutation of revenue of Waste Lands.

The number of grants under the old rules made during the year was 23, having an area of 80,078 acres, with an eventual maximum revenue of Rs. 22,193; the number of these grants altogether up to the end of the year was 519, with an area of 1,315,778 acres, the present revenue received from them being Rs. 29,051, and the eventual maximum revenue Rs. 3,90,511. The number of grants under the old rules redeemed during the year was 16, with an area of 32,131 acres, for which the price of commutation paid already amounted to Rs. 40,980, while the balance remaining unpaid was Rs. 44,862; and the total number of these grants redeemed up to the end of the year was 95, with an area of 242,676 acres, for which the price of commutation paid already amounted to Rs. 2,54,819, while there still remained unpaid a balance of Rs. 3,38,519.

The sales of Waste Land during the year were few as compared with previous years, the number of lots sold being 15 only, with an area of 13,057 acres, the price already paid for which amounted to Rs. 37,404, while the balance remaining unpaid was Rs. 31,185. The total number of lots sold up to the close of the year was 620, having an area of 641,293 acres, the price already paid for which amounted to Rs. 6,63,636, while the price remaining to be paid was Rs. 26,71,047.

The cultivation leases taken up under the ordinary settlement rules of the several districts was 86, with an area of 9,832 acres, of which the initial revenue was Rs. 2,809, and the eventual maximum revenue Rs. 14,845; and the number of these leases altogether taken up to the end of the year was 761, with an area of 103,370 acres, of which the present income was Rs. 70,352, and the eventual maximum income Rs. 1,01,962.

The Secretary of State having given instructions for the preparation of a pamphlet which shall comprise in a concise form all the rules now in force for the disposal of Waste Lands in India, including the rules and conditions on which Waste Lands may be obtained on lease, a revised copy of the rules in force in Bengal for the sale of unassessed Waste Lands has been communicated to the Government of India, with an intimation to the effect that no formal rules have been published for the lease of Waste Lands, as the rates, and in some matters the particulars of the leases, vary in different districts, but the general principles on which cultivation leases as they are called are granted have been notified, and are as follows:—

The rates are to be fixed from time to time by the Board of Revenue in communication with the local authorities; the leases to convey a proprietary title subject to a fair and moderate assessment, which is not to exceed half the proceeds from the land, but not to be redeemable under the Waste Land Rules; and the terms as to survey, demarcation, &c., to be the same as those required under the Waste Land Rules. The rates now current are given below, the term of lease being for thirty years:—

For the district of Chittagong.

For the	1st five years	1 anna	per acre.
"	2nd "	2 annas	"
"	3rd "	3 "	"
"	4th "	4 "	"
"	5th "	5 "	"
"	6th "	6 "	"

For the districts of Cuchar and Sylhet.

For the	1st three years	Rent-free.
"	next five "	3 annas per acre.
"	" "	6 " "
"	" "	12 " "
"	next twelve "	1 rupee and 8 annas per acre.

For Darjeeling.

Terai lands, and dale lands or lands in bottoms between the hills	...	{ The term of lease is ten years, two of which are rent-free, and the remaining eight years at 6 annas per acre.
---	-----	--

There are no fixed rates in the Assam Province, which has a vast area of available Waste Lands. The practice in this province is to permit any one to break up Waste Land at his pleasure, under the only condition of paying rent at a fixed minimum district rate for whatever land is cultivated. If the lands are retained the cultivator obtains at once a transferable title, subject to any tax the Government may

impose; but the lands may be relinquished without any responsibility whenever the cultivator likes.

With a view to afford relief to the owners of tea plantations who were suffering from the depreciation of that description of property, and were embarrassed by the payments they had to make to Government in respect of the unpaid purchase money due on their grants, a rule has been added to the Waste Land Rules by which the sale of a lot purchased previous to 1st January 1867, which has become liable to be sold for arrears of purchase money and interest, is held to be a sufficient satisfaction of the claims of Government against the defaulting purchaser on account of such lot, and a purchaser of more than one lot is permitted on application before 1st July 1867 to relinquish any entire lot and to transfer all sums paid on behalf of it to the credit of other lots in his occupation, the payments for which have not yet been completed.

The terms on which the unappropriated lands in the Soonderbuns were proposed to be granted to Mr. Schiller were noticed in last year's report. The Secretary of State subsequently directed that the precise conditions on which it was intended to place Mr. Schiller in possession of the lands should be submitted for his approval, and that there should be a distinct provision for the payment of the first subscription promised by Mr. Schiller of £150,000 to £180,000 within a reasonable time, as evidence of good faith of the projected Company in carrying out their operations. Mr. Schiller has been accordingly asked to organize a substantial Company within a year, and he has been informed at the same time that, on the Company paying down the specified deposit within two years from the date of the Despatch of the Secretary of State, pottahs will at once be issued in their favor for the lands to be made over to them, either under the Rules of 1853, or under any modification of those rules which may be specially arranged. In the meantime no fresh grants of land in the Soonderbuns are to be made to other parties within the year allowed to Mr. Schiller for organizing the Company.

Mr. Schiller's application also included the lease of the fisheries in the streams traversing the Soonderbuns, with *manorial* rights. The rights referred to having been thus vaguely specified, it has not yet been decided whether the concession asked for should be granted.

While these questions were pending consideration, leases of the forest products of the unallotted portion of the Soonderbuns were put up to auction, in convenient blocks, for terms of five years, with a reservation to Government of the power to cancel any lease on giving six months' notice; and all these blocks, with the exception of six, were, for want of higher bidders, knocked down to the Port Canning Company. Subsequently, on the grant of the entire tract of unallotted Soonderbuns being promised to Mr. Schiller on behalf of a new Soonderbuns Reclamation Company which he was about to form, six months' notice of cancellation was given to the Port Canning Company as required by the terms of their lease. The formation of the new Company being afterwards temporarily postponed, the Government of India

wrote that "it will be no more than just and equitable to allow the notice to remain inoperative, and to permit the lease of the forest products to run on for the present, in the expectation that Mr. Schiller will form a Company to whom the unappropriated Soonderbuns will be granted; or that, if necessary, a fresh lease should be given, as suggested by the Board, sufficiently guarded by a clause enabling Government without question to re-enter on possession on six months' notice." On this, instructions were issued to the Board to prepare a lease in the manner laid down, the lease being not for five years from the date of this order, but for the unexpired portion of the term of five years for which the original lease was granted.

A suggestion was also made by Mr. Schiller that the Soonderbuns should be formed into a separate district with Port Canning as sunder station. This was still under consideration at the close of the year.

Seven hundred and eighty-five estates, with a revenue of Rs. 46,723, were sold for Rs. 4,53,515 for the recovery of their own arrears, and of these 76, bearing a revenue of Rs. 9,838, were purchased on behalf of Government for Rs. 57, while the remaining 709, bearing a revenue of Rs. 36,885, were bought by private individuals for Rs. 4,53,458. The balance for which these estates were sold was Rs. 17,298. The only Regulation District in which there were no sales was Balasore.

In 86 cases purchasers forfeited their deposits under Section 23 of the Act, and in 26 the proprietors regained their estates. Fourteen estates, separated under Sections 10 and 11, were sold with a revenue of Rs. 21,739 for Rs. 3,51,870, for dues amounting to Rs. 1,578. The rights and interests in nineteen estates were sold for Rs. 2,250 to recover arrears due from other estates amounting to Rs. 2,325. The rights and interests in thirty-one other estates were sold for Rs. 26,470, for the recovery of demands other than land revenue amounting to Rs. 45,038. 4,474 estates, bearing a revenue of Rs. 6,25,139, were exempted from sale under Section 18 of the Act.

There were 20 appeals against sales preferred under Section 25, and in two of these cases the sales were annulled. In five cases the annulment of the sale of petty estates was recommended to Government under Section 26.

One hundred and ninety-five separate accounts were opened under Section 10, bearing a revenue of Rs. 87,191. The total number of such accounts opened to the end of the year was 3,044, bearing a revenue of Rs. 16,07,728, of which four accounts, bearing a revenue of Rs. 1,536, were closed by the sale of the whole estate under Section 14, leaving open 3,040 accounts, bearing a revenue of Rs. 16,06,192.

The separate accounts opened under Section 11 were 46, bearing a revenue of Rs. 4,647. The total number of accounts of this description opened during the year was 508, bearing a revenue of Rs. 1,15,844.

Thirty-five tenures were admitted to common registry, making a total to the close of the year of 2,096 tenures, paying a rent of Rs. 14,13,971, on an area of 3,757,466 acres. The parent estates affected were 1,178 in number.

A Statement (F. 6) in the Appendix gives an abstract of the proceedings under the Rent Laws during the year. The number of suits instituted was 98,120, against 123,103 of the previous year. The figures on the margin exhibit a comparison under each head. A comparison is also shewn on the margin of the number of applications and notices during the year under review and during the preceding year. The number of suits revived during the same periods was 3,259, against 3,324, and the number of suits reheard 1,931, against 2,568.

The number of suits disposed of during the year was 114,231, and the number of applications 2,412, against 128,562 suits and 2,161 applications disposed of during the preceding year. 81,309 suits were disposed of after formal proceedings, against 91,011 similarly disposed of in the previous year. The number of suits pending on the file at the close of the year was 9,024, against 19,915 of the previous year, and of these 7,127 were instituted within the month. The decrees executed through the Collector had fallen from 66,500 to 62,194. The appeals filed before the Collector were 6,186, against 6,788 of the preceding year, and of these 5,531 were disposed of during the year. Of the 605 appeals pending at the close of the year 445 were filed within the month.

The number of officers engaged in the service of processes during the year was 2,261, of whom 565 were paid at the rate of Rs. 6 a month, 1,071 at the rate of Rs. 5, and 625 were hired as required. The processes paid for during the year were 325,983 in number, and those issued free of charge 25,537. A classification of these processes is shewn on the margin. The number of processes actually served during the year was 345,276, of which 36,307 were served singly. On 21,874 journeys two processes were served, on 13,777 journeys three, and on 34,586 more than three, the entire number of processes being served in 106,544 journeys.

noted on the margin. The districts shewing a debit balance were those of Balasore, Bograh, Maldah, Soonderbuns, Darjeeling, Singbhoom, Goalparah, and Luckimpore. The greatest profits were shewn in the districts of Bhulloah, Chittagong, Tipperah, Backergunge, Jessore, and Tirhoot.

The daily wages of supernumerary peons have been raised during the year from three to four annas.

The present settlement of Cuttack, which had been made for a term of thirty years, being about to expire, the question of giving that province a permanent settlement was considered during the year, but, owing partly to the backward state of cultivation in many of the districts, and partly to the inexpediency of undertaking immediately after the recent famine such an enquiry as would be a necessary preliminary to a permanent settlement, it was proposed to the Government of India that the province generally should be settled again for a further period of thirty years, the settlement being based on the enquiry made on the last occasion, but modified so as to suit the altered circumstances of the times, and the general knowledge now possessed of the condition of the country. The changes suggested accordingly were (1) the imposition of an additional assessment of four annas in the rupee on cultivated lands, the price of all produce having immensely increased; (2) the relinquishment of 50 per cent. of the gross rental in favor of the zemindars and intermediate holders, with a view to give them a larger interest in the improvement of their estates than they have hitherto enjoyed; and (3) permission to make a permanent settlement of those estates, the zemindars of which might either now, or during the currency of the proposed thirty years' settlement, be able to shew that their estates were in a sufficiently advanced state of cultivation to warrant such a settlement without any undue sacrifice of revenue.

The Government of India, however, was of opinion that the modifications proposed by this Government could not well be authorized without making a detailed enquiry into the actual condition of the estates at the present time, and, as it was inexpedient to subject the agricultural population of the province to the harassment and annoyance of such an enquiry, it was decided that the existing settlement should be renewed exactly as it stood for a period of twenty years. The term of the new settlement has since been extended to thirty years. This decision has been communicated to the people of Orissa, and measures were being taken for carrying it out at the close of the year.

CUSTOMS.

A Statement (G. 1) in the Appendix shews the entire revenue derived from duties of Customs at Calcutta and the out-ports of Chittagong, Balasore, Cuttack, and Pooree, together with the expenditure incurred, and the net revenue realized during 1866-67, as compared with eleven-twelfths

Results of the year.

of the revenue realized in the previous year, and also with the entire results of 1865-66 and four preceding years. The total net revenue

derived during the year under review was Rs. 2,54,59,985, against Rs. 2,53,57,994 which represents eleven-twelfths of the results of 1865-66, the increase amounting to Rs. 1,01,991. The gross collections in Calcutta exhibit a decrease of Rs. 6,99,110, as noted on the margin.

The total value of the trade of Calcutta during the year, as compared with eleven-twelfths of the

Trade of the Calcutta Port.

Value of	Eleven-twelfths of 1865-66.	1866-67.	Increase.	Decrease.

large increase in value is also shewn in the importations of the dutiable articles named on the margin, and it was expected that the revenue derived from these sources, which has been in reasing progressively, would be still further augmented in future years. An increase* in value is also shewn in the importations of twist, lead, tobacco, provisions, and groceries, but this was in some measure attributable to the smallness of the importations of those articles in 1865-66, when there was a large fall^{ing} off as compared with the figures of the previous year. Similarly the reduced importations of iron, copper, wines, rum, millinery and haberdashery during the year under review, to the extent shewn on the margin, was attributable to a great extent to the large and increased importations of those articles in 1865-66, as compared with previous years, and in excess of the actual demand. Of the free imports there was an increase to the extent of Rs. 4,13,177 under the head of machinery, but a heavy falling off^{ing} in agricultural implements and books and paper. The imports of gold had increased by Rs. 25,76,706, while those of silver had decreased by Rs. 94,48,215. The imports of precious stones shewed an increase of Rs. 11,314, and of coke and coal an increase of Rs. 2,70,349.

The export trade shews a large increase† in value among dutiable articles in the exports of indigo, oil-seeds, and gunnies; and in free articles in the exports of jute, hides and skins, tea, silk, wool, and unmanufactured tobacco. Among dutiable exports there was a decrease§ in the value of the exports of saltpetre, rice, other grains, lac-dye, and shell-lac; and in free exports in the exports of sugar, manufactured tobacco, and Bengal rum. The exports of cotton shewed a decrease in value to the extent of Rs. 1,03,75,387, of opium to the extent of Rs. 14,60,645, of gold to the extent of Rs. 37,80,746, and of silver to the extent of Rs. 71,89,350.

The annexed comparative table shews the principal heads from which collections were realized other than from duty, the total receipts in 1866-67 amounting to Rs. 1,28,338, against Rs. 1,61,132, which represents eleven-twelfths of the receipts of the previous year, giving a decrease in collection of Rs. 32,794. The receipts from wharf rents and hire of cranes shew a satisfactory increase. But there was a falling off on the other hand in the collections of golah rents, fees for the supervision of private warehouses, and from licenses for private warehouses, which was owing only to the decrease of bonding operations and to the reduction of the charges for bonding in the Government Golahs, a more detailed notice of which latter subject will be found under the head of Salt.

Miscellaneous Receipts of the year.

	Eleven-twelfths of 1865-66.	1866-67.
	Rs.	Rs.
Salt Golah rents	54,670	22,890
Wharf rents	53,371	56,157
License for private warehouses ...	6,323
Requization from fees	4,116	3,921

Supervision of private warehouses	6,643	1,392
Fees for registry of cargo boats ...	4,824	5,008
Straits' light dues	5,888	3,094
Crane hire	284	2,085
Other items	8,540	14,526
Total	1,61,132	1,28,338

The total disbursements of the Department during the year amounted to Rs. 8,73,869 as compared with Rs. 13,60,216, being eleven-twelfths of the disbursements of the previous year, which shews a decrease of Rs. 4,86,347.

Total Disbursements.

The value of the interportal trade, both in imports and exports, has fallen off very much during the past two years—a fact attributable to over speculation and mercantile failures. The total imports in 1866-67 amounted to Rs. 1,12,04,019 as compared with Rs. 1,46,23,983, which represents eleven-twelfths of the value of the imports in 1865-66; and the total exports were Rs. 4,21,66,500, against Rs. 4,96,10,682, the decrease in imports being to the extent of Rs. 34,19,964, and in exports to the extent of Rs. 74,44,182. A comparison of the principal items of import and export under this head is shewn in Statement G. 4 in the Appendix.

Trade with America.

Value of	Eleven-twelfths of 1865-66.	1866-67.
	Rs.	Rs.
Dutiable Imports	2,87,133	4,64,311
Free Imports	1,87,999	97,085
Dutiable Exports	68,03,282	74,89,109
Free Exports	13,85,142	18,33,489
Total	87,53,556	98,83,994

The total value of the trade with America is shewn on the margin, and exhibits an increase under every head except that of free imports. The chief items of import and export are compared with eleven-twelfths of the results of the preceding year in the Appendix, in Statement G. 5.

Trade with Australia.

Value of	Eleven-twelfths of 1865-66.	1866-67.
	Rs.	Rs.
Dutiable Imports	30,02,703	21,74,449
Free Imports	2,41,222	5,02,513
Dutiable Exports	9,61,998	10,58,322
Free Exports	8,540
Total	42,04,923	40,43,824

The annexed table shews the results of the trade with Australia, which has considerably fallen off in value. A more detailed Return (G. 6) in the Appendix exhibits a comparison of the principal items, both dutiable and free.

In the Appendix will also be found a Comparative Statement (G. 7) of the Shipping and Tonnage of the Port of Calcutta. The number of vessels which arrived at the port during the year was 785, and their total tonnage 686,441 tons. Of these 653 were British, 80 French, and 40 American, the aggregate tonnage represented by them amounting to 678,692 tons. The number of vessels which left the port during the same period was 779, with a total tonnage of 674,684 tons. Of these, 642 were British, 82 French, and 39 American; their aggregate tonnage amounting to 664,327 tons. The number of native craft which entered the port was 93, and the number which left it 98.

The gross receipts of the Port of Chittagong amounted to Rs. 5,80,762, and the aggregate charges to Rs. 29,738, leaving a net revenue of Rs. 5,51,024, as is shewn in Statement G. 1 in the Appendix. The net revenue in 1865-66 was Rs. 2,39,463, and in 1861-65 Rs. 69,769 only.

The chief exports of this port are rice and paddy, and the annexed statement shews a comparison of eleven-twelfths of the quantity exported during each of the last five years, with eleven-twelfths of the amount of duty realized in each, the figures for 1866-67 being for eleven months which

YEAR.	Rice.	Paddy.	Total.	Duty.
	Mds.	Mds.	Mds.	Rs.
1862-63	611,654	45,758	657,412	49,528
1863-64	733,997	42,784	776,781	74,255
1864-65	748,693	55,550	804,243	74,761
1865-66	689,357	119,480	788,837	63,966
1866-67	846,323	107,956	954,279	89,360

constituted that official year. The duty realized from all other articles of export in 1866-67 was Rs. 357, against Rs. 1,872 in the preceding year.

The principal article of import in Chittagong is salt, and the quantity imported during the eleven months under review was 269,420 maunds, of which 118,192 maunds were passed out of bond for consumption, and paid duty amounting to Rs. 3,84,127. The receipts on account of import dues from all other articles were Rs. 5,984, against Rs. 5,915 of the preceding year.

The number of European ships that visited the Port in 1866-67 was 30 with a tonnage of 13,347 tons, against 31 ships with a

tonnage of 11,385 tons which came in in the previous year. The total number of vessels that visited the Port, including native craft, was 619 against 855; and the total amount of port dues realized was Rs. 14,045 against Rs. 14,573.

The Government of India having ordered the formation of a Committee for instituting a thorough revision of the existing tariffs of valuation all over India, the Collector of

Revision of Customs Tariffs.

Calcutta Customs, and the Junior Secretary to the Board of Revenue were appointed to represent this Government on the Committee, and Mr. F. Schiller to represent the mercantile interest of Bengal. The report of the Committee was submitted direct to the Government of India and has been dealt with by that Government. The Tariffs, as now sanctioned, are laid down in Act XVII of 1867. The principal alterations introduced by the Act are that the export duty on grain of all kinds has been raised from two to three annas per maund, the export duty on saltpetre and the import duty on all machinery have been removed, and the import duty on sparkling wines and liquors raised to one rupee and eight annas per imperial gallon.

The expediency of imposing a higher duty than two annas per maund on the export of grain from Bengal was also recommended to the Government of India in a minute recorded by the Lieutenant-Governor on the 28th of November last. The suggestion was made not only as a permanent increase of finance rendered necessary by the growing expenditure of Government and the difficulty of devising new and appropriate methods of taxation, but also as a means of checking the exportation of the staple food of the people when prices had risen so high as to indicate the approach of scarcity. The rate of duty was proposed to be augmented from two to six annas per maund. The report of the Tariff Committee above noticed, which was submitted to the Government of India on the 7th of January last, proposed however an increase of one anna per maund only, that is from two to three annas, and this having been adopted in the Budget Statement for 1867-68, has been legalized by Act XVII of 1867.

The East Indian Railway Company, being desirous of using Johore teak sleepers on their line, suggested that the import duty levied on Singapore timber should be removed. As there was no reason for treating that timber differently from the timber imported from other places, it has been recommended to the Government of India that the levy of import duty on all timber from foreign ports should be abolished.

Much inconvenience having been felt for want of sufficient wharf accommodation at the Custom House, the Collector of Customs was authorized, in September last, to double the wharfage rates, as a temporary expedient for affording immediate relief, it having been first ascertained that ample godown accommodation was available to the merchants at the Calcutta Bonded Warehouse at the same rates as those heretofore charged at the Custom House. Since

Raising of the wharfage rates.

then, orders have been issued to the Public Works Department to expedite the construction of the new sheds at the Custom House which are urgently required, and one of those buildings has already been commenced.

SALT.

The total quantity of Salt cleared during the eleven months under

* Exclusive of sales at local depôts, the quantity of which is included in the statement for 1865-66 but has not been included in the statement for 1866-67 owing to the value only having been as yet returned. From 200,000 to 400,000 maunds should be added on this account.

Clearance of Salt during the year.

YEAR.	Government Salt.	Excise Salt.	Imported Salt.	Total.
	Mds.	Mds.	Mds.	Mds.
1845-46 ...	3,954,955	...	1,450,154	5,405,109
1855-56 ...	3,471,149	49,989	3,300,117	6,821,255
1865-66 ...	1,184,514	7,087	5,494,158	6,685,759
1866-67 ...	1,800,712	1,772	5,523,701	7,326,185

report was 7,326,185* maunds, against 6,685,759 maunds, which represents eleven-twelfths of the total quantity cleared during the preceding year. The statement on the margin exhibits a comparison of the results of 1866-67 with eleven-twelfths of the results of the closing years of the three preceding decades.

The net revenue of 1866-67 was Rs. 2,51,85,766† against Rs. 2,19,84,492 during eleven-twelfths of the preceding year, shewing an increase of Rs. 32,01,274, which is mainly caused by increased sales of Government Salt, the proceeds of which amounted to Rs. 72,42,805 against Rs. 31,20,512.

Net Revenue realized. Increase in receipts from sales of Government Salt.

† This includes local depôt sales.

Increase in duty realized from clearances of imported Salt.

‡ Eleven-twelfths of
 1865-66 Rs. 1,78,50,013
 1866-67 1,79,52,028

There was also a slight increase‡ in the duty realized from clearances of imported Salt, while the charges debitable against this item had decreased by about 8 per cent.

On the other hand there was a decrease in the revenue derived from

Decrease in receipts from Local and Excise Salt.

				Proceeds of Local sales.	Duty on Excise sale.
				Rs.	Rs.
Eleven-twelfths of					
1865-66				16,10,484	23,032
1866-67				8,55,054	5,759

local sales to the extent of about 50 per cent, and in the duty realized on Excise sales to the extent of about 75 per cent, the result in the former case being attributable to the famine in Orissa and other places, and in the latter case

partly, as stated in last year's report, to the destruction of a large private stock of Salt at Hazipore by the cyclone of October 1864, and

partly to the manufacture of the year under report not having been available for sale up to the 3rd March last.

There was also a falling off under the head of Miscellaneous Receipts from Rs 2,34,979 to Rs. 73,253, one item under this head, *viz.*, that of Golah Rents, having decreased to the extent of Rs. 43,236.

A Statement (H) in the Appendix exhibits a detailed comparison of the financial results of the year under report with those of three previous years.

The stock of Government Salt in store at Sulkea and the several out-depôts on the 31st of March last, or at the close of the year, should have amounted to 2,488,387 maunds, but deducting the loss caused by the cyclone of 1864, which was estimated at 135,000 maunds, the actual stock is probably not more than 2,353,387 maunds. The selling prices were the same as those stated in last year's report.

The subject of the allowance made for the wastage of Salt in bond was noticed in the report for 1864-65. A memorial was subsequently addressed to the Secretary of State by the Salt Chamber of Commerce at Norwich, complaining (1) of the insufficient rate of wastage allowed in Calcutta on imported Salt warehoused under bond, and (2) of the high rates of warehouse rent charged at the Sulkea Golahs. The first of these complaints was answered by the Under-Secretary of State precisely in the manner in which the question was reviewed in the report for 1864-65, and does not require further notice in this place. As to the second, it has been explained that the rents for the warehouses at Sulkea, which were never exorbitant, were raised in 1863 from 6 to 7 Rupees for 1,000 maunds in consequence of the demand for bonded accommodation having considerably increased, but that even then it was only one rupee in excess of the rate charged for private golahs, this distinction being observed to avoid any appearance on the part of Government of competing with the owners of private warehouses. The rent of private golahs having since fallen, the Government rates have also been reduced from 7 to 5 Rupees for 1,000 maunds from December 1865, so as to equalise them with those of private golahs. The rates charged by private parties from time to time have varied from those charged by Government to the extent of Re. 1 to Rs. 1-8 per 1,000 maunds.

Under Section 3 of Act VII of 1863 all cases, however trivial, coming under the Act have to be tried by the Magistrate of the district, or by an officer exercising the full powers of a Magistrate. As this necessarily throws a large amount of work on the hands of Magistrates exercising full powers, and takes up a considerable portion of time required for other and more important duties, it has been proposed that the trial of Salt cases should be allowed to be taken up by any Magistrate as defined in Section 14 of Act XXV of 1861, and an amendment of the Salt Law to this effect was under the consideration of the Legislative Department at the close of the year.

OPIUM.

The net revenue derived from Opium during the eleven months of 1866-67 was Rs. 3,67,43,536 against Rs. 4,12,42,915, which represents eleven-twelfths of the net revenue derived in 1865-66, thereby shewing a decrease to the extent of Rs. 41,99,379. The net revenue derived from Abkaree Opium during the same period was Rs. 18,91,532 against Rs. 19,38,723, the reduction in revenue under this head amounting to Rs. 47,191. The aggregate decrease of revenue under the two heads therefore amounted to Rs. 45,46,570.

A detailed comparison of the results of the eleven months under review with eleven-twelfths of the results in five previous years respectively, is exhibited in the Statements I. 1 and I. 2 in the Appendix, and a third Statement (I. 3) in the Appendix shews a similar comparison of the number and value of provision chests sold, the number sold during the eleven months of 1866-67 being 38,680 against 51,343 the eleven-twelfths proportion of the number sold in 1865-66, thereby shewing a decrease to the extent of 12,663 chests.

The receipts from Opium sales were estimated in the Budget of 1866-67 at Rs. 3,24,00,000, but the actual receipts amounted only to Rs. 4,82,33,136, as is shewn on the margin, the decrease being owing partly to the loss of a month in the official year just closed, and partly to a decline in the auction prices. The gross yield of Opium during the year, that is inclusive of miscellaneous receipts on account of Opium supplied for Abkaree and Medical purposes, &c., was Rs. 4,94,40,136, and the gross charges were Rs. 1,26,96,600.

The Government having resolved to bring forward about 48,000 chests of Provision Opium every year for sale, the Opium Agents of Behar and Benares were authorized to extend the area of their cultivation during the season 1866-67 from 7 to 7½ lakhs of beegahs, that there might be no difficulty in manufacturing the quantity required.

The total quantity of land engaged for the cultivation of Opium in both agencies in accordance with the above order is shewn on the margin, and exceeded that of previous years by 33,196 beegahs. The out-turn of the season was estimated at 48,500* chests of Provision Opium and 3,523 chests of Abkaree Opium. There were besides in reserve 409 chests of Behar and 20 chests of Benares Provision Opium of the past season.

Deduct charges	3,43,276	3,66,245	22,969	...
Net Revenue	49,13,222	43,09,845	...	6,03,377

It will be seen that the gross revenue in 1866-67, after deducting the cost price of Opium, was Rs. 46,76,090, against Rs. 52,56,498, which represents eleven-twelfths of the gross revenue realized in 1865-66; the charges of collection Rs. 3,66,245 against Rs. 3,43,276; and the net revenue Rs. 43,09,845 against Rs. 49,13,222, the decrease in net revenue amounting to Rs. 6,03,377. The main cause of this decrease was, as was explained in last year's report, the reduced condition of the people in consequence of the scarcity of food felt in so many districts.

The increase in the charges of collection was also noticed in last year's report, and was explained to be due to the cessation of the Income Tax, it having been found impossible to reduce the expenditure incurred in the collection of Excise and Income Tax together, in proportion to the revenue lost by the abandonment of the latter impost. The percentage under this head had risen during the year under review from 6·5 to 7·8, the entire cost of establishment being now charged to Excise and none of it to Income Tax as before. The result was also partly owing to increased expenditure incurred both for the maintenance of the numerous public distilleries provided in the Lower Provinces, and the purchase of a large number of hydrometers, &c., supplied for testing spirits manufactured in these distilleries.

The only increase of revenue during the year was in Tari, which had risen by Rs. 4,156, in Chandu and spirits used in arts, &c., which together shewed an advance of Rs. 353, in miscellaneous receipts which exhibited an excess of Rs. 938, and in Opium which had advanced by Rs. 1,06,032, though the quantity consumed had decreased by 60 maunds. The increase in Opium was apparently attributable to the raising of the price of that drug in Assam to Rs. 22 a seer, which was noticed in last year's report. It is now reported from Assam that the consumption of Opium in that province is decreasing.

STAMPS.

The revenue realized from the sale of Stamps in the Lower Provinces during the year under review was Rs. 55,29,468, and a Statement (J) in the Appendix shews a comparison of results for each district with three antecedent years, the figures for 1866-67 being for eleven months only, while those for the other years are for twelve months.

Receipts from sale of Stamps.			Rs.
Eleven-twelfths of 1865-66	54,93,169
1866-67	55,29,468
Increase	36,299
Eleven-twelfths of 1851-52	19,73,241
1866-67	55,29,468
Increase	35,56,227
Eleven-twelfths of 1861-62	50,49,508
1866-67	55,29,468
Decrease	4,20,040

increase of Rs. 36,299 as compared with 1865-66, and of Rs. 35,56,227 as compared with 1851-52; while the comparison with 1861-62 shews a decrease of Rs. 4,20,040.

The detailed results shew a falling

	Rs.		Rs.

Shahabad	5,888	Howrah	737

off in the Calcutta collections to the extent of Rs. 1,64,655, and in the Mofussil districts to the extent noted on the margin; while in the remaining districts there was an increase, particularly in Chittagong,

Cuttack, Moorshedabad, Rungpore, and Sylhet.

The realizations from fines levied in civil suits under Section 17 of Act X of 1862 and remitted to the district collectorates amounted to Rs. 9,576, and added to the revenue derived from the sale of stamps gave a total gross revenue of Rs. 55,39,044,* against

Realizations from fines.		Rs.
* Revenue from sale of Stamps	...	55,29,468

1866-67 ...	2,617	14,264
Decrease ...	879
Increase	868

The number of stamps affixed to deeds in the Superintendent's Office is given on the margin, and compared with the results in 1865-66 shews a falling off to the extent of 879, but with a slight increase in value.

The penalties imposed by Civil Courts on account of infringements of the law amounted to Rs. 9,576, against Rs. 4,635, the eleven-twelfths of 1865-66, which gave an increase of Rs. 4,941. On the other hand the amount of duty refunded in cases adjusted by razeenamahs was Rs. 14,473, against Rs. 26,989, and gave a decrease of Rs. 12,516, and in cases remanded for retrial Rs. 53,887 against Rs. 77,065 which gave a decrease of Rs. 23,178.

The expediency of increasing the stamp fees in judicial proceedings by somewhat raising the charge on the larger class of suits on a plan proposed by Mr. A. A. Roberts, Judicial Commissioner of the Punjab, was considered by this Government at the requisition of the Government of India, and a scheme prepared by the Board of Revenue was recommended for adoption. The scheme of the Board differed from that of Mr. Roberts in this, that, while the latter afforded relief only to suitors for the very smallest claims, and imposed a gradually increasing institution fee beginning at suits of the value of Rs. 12, the former afforded some

Proposed revision of the scale of stamps in Civil Suits.

relief to suitors up to the value of Rs. 100, and even higher, and indeed as far as Rs. 5,000 followed the existing scale as closely as a scale regulated by percentages could follow one of increments *per saltum*. Neither the Board nor Mr. Roberts had however noticed the anomaly inherent in every percentage scheme when the percentage itself is not constant, *viz.*, that near the points of transition of the percentage the institution fee for a suit of higher value will be actually less than that for a suit of lower value; and, in recommending the Board's scheme for adoption, it was proposed that it should be so far modified as to avoid this anomaly.

Subsequently the Government of India has dealt with this question comprehensively, and an Act (XXVI of 1867) has been passed for the purpose of re-modelling the entire system of stamp fees in judicial proceedings.

	<u>1,97,568</u>

The sale of postage stamps yielded Rs. 12,73,643,* against Rs. 12,05,998, which shews an increase of Rs. 67,645. Besides this the Presidencies of Madras and Bombay were supplied with stamps to the extent of Rs. 4,38,658 and Rs. 7,29,450 respectively, against Rs. 2,81,556 and Rs. 5,98,988, the eleven-twelfths of 1865-66.

The use of service postage stamps was introduced during the year under review, and came into operation from August last. The sales amounted in value to Rs. 1,97,568, as detailed on the margin. The supplies despatched to Madras and Bombay amounted to Rs. 2,39,000 and Rs. 4,10,950 respectively.

VARIOUS.

The Act for the licensing of trades and professions having been passed towards the close of the year, the following measures were taken for carrying out the provisions of the law in the several districts of the Lower Provinces: In Calcutta and the Suburbs, including Howrah, the administration of the Act has been entrusted to the Collector of Calcutta; the Commissioner of the Division taking up the appeals from Calcutta and the Suburbs, leaving the station of Howrah to the Deputy Collector there, who has been appointed a Commissioner under Section 22 of the Act. For the Presidency Division (exclusive of Calcutta and the Suburbs) an Assessor Deputy Collector has been authorized to be appointed to each Sub-Division on a salary of Rs. 150 per mensem, with two per cent commission on all sums collected upon his assessment; and for the other districts of the Lower Provinces an Assessor Deputy Collector on Rs. 200 in each, with an allowance of Rs. 50 a month for

establishment. These Assessor Deputy Collectors when appointed are to be vested with the powers of a Collector for the purposes of the Act; and, in the meantime, all Collectors in the Regulation Districts and all Deputy Commissioners in the Non-Regulation Districts have been vested with the powers of a Commissioner for the hearing of appeals. In Assam the classification of tax-payers has been authorized to be entrusted to the mouzadars under the supervision at head-quarters of the district officers; and in the Sonthal Pergunnahs the entire work of collecting the tax has been ordered to be placed in the hands of the Assistant Commissioner.

The Government of India having ordered that the official year in India, as in England, shall terminate on the 31st of March, instructions have been issued to officers and departments subordinate to this Government that all official reports and returns are henceforth to be made up to the 31st of March instead of the 30th of April.

The contract entered into with the East India Irrigation Company for the construction of canals and irrigation works in the province of Orissa was noticed under the head of Public Works in the report for 1864-65, and an account was given under the same head in last year's report of the works carried on during that year in furtherance of the scheme. The further progress made during the year under review will be found narrated in the chapter on Public Works. It is only necessary here to mention that a Bill having been introduced in the Council of the Lieutenant-Governor for making Laws and Regulations, to provide for the recovery of rates for water supplied by the Company, the attention of the Legislative Department was directed to the two following points, that they might be considered in connection with the Bill, *viz.*, (1) whether, in the event of a ryot obtaining a decree against Government in consequence of a failure of the supply of water from the Company's works, Government should not be empowered by law at once to recover the amount of such decree from the Company by a deduction from the collections; and (2) whether the Company should not be relieved of all liability for damage done or communication obstructed by their works by reason of the supply of water being diverted.

SECTION IV.—FINANCIAL.

A Statement (K. 1) in the Appendix exhibits in detail the revenue and expenditure of the year, as compared with two preceding years; but the figures for 1866-67 are for eleven months only, while those for 1864-65 and 1865-66 are for twelve months.

The total revenue for the eleven months of 1866-67 was Rs. 13,91,03,745, against Rs. 15,85,99,901 in 1865-66; and the total expenditure Rs. 4,30,66,807, against Rs. 5,18,75,492, which left a surplus in 1866-67 of Rs. 9,60,36,938 against Rs. 10,67,24,409 of the

preceding year. This comparison, however, is throughout between the results of eleven months on the one hand with those of twelve months on the other. Deducting one-twelfth from the surplus of 1865-66 the decrease in surplus for the year under review amounted to Rs. 17,93,771 only, as is shewn on the margin.

The Statement K. 2 in the Appendix shews the movement of currency

Circulation of Government Currency Notes.

	Rs.	
Eleven-twelfths of the surplus in 1865-66...	9,78,30,709	
Surplus in 1866-67	9,80,36,938

Total Issues	1,64,34,424	1,67,97,420

notes in the districts of the Lower Provinces during the year under review. A comparison of the transactions of the year with those of the preceding year is here given on the margin for easier reference, the figures for 1866-67 being only for the eleven months which constitute the official year, and those for 1865-66 shewing the results of the

whole year reduced by one-twelfth. The largest issues from the Bank of Bengal, Calcutta, during the year under review, were made to the districts of Bhaugulpore, Midnapore, Balasore, Cuttack, Dacca, Jessore, and Behar. The receipt of currency notes in payment of Government dues was large in the districts of Bhaugulpore, Darjeeling, Monghyr, Purneah, Bancoorah, Beerbhoom, Burdwan, Hooghly, Midnapore, Maunbhoom, Backergunge, Cachar, Shahabad, Tirhoot, Dinagepore, Moorshedabad, Rajshahye, Rungpore, and the districts of the Presidency Division. Receipts from the public in exchange for silver were large in Kamroop, Nowgong, Deoghur, Chittagong, Pooree, 24-Pergunnahs, Behar, and Sarun.

The largest transmission of notes to the Bank of Bengal, Calcutta, was from the districts of Luckimpore, Purneah, Burdwan, Hooghly, Howrah, Chittagong, Backergunge, Cachar, Nuddea, 24-Pergunnahs, Tirhoot, Dinagepore, Moorshedabad, Rajshahye, and Rungpore. The issues from one minor treasury to another were largest from Burdwan and Hooghly. The issues to the public in payment of Government dues were large in Bhaugulpore, Darjeeling, Bancoorah, Beerbhoom, Burdwan, Hooghly, Midnapore, Maunbhoom, Backergunge, Dinagepore,

Moorshedabad, Rajshahye, Rungpore, and the districts of the Presidency Division. The issues to the public in exchange for notes and silver contrast favorably with the transactions of the preceding year; and were largest in Kamroop, Bhaugulpore, Purneah, Burdwan, Midnapore, Chittagong, Hazareebaugh, Balasore, Cuttack, Backergunge, Cachar, Dacca, Mymensing, Jessore, Nuddea, Patna, Tirhoot, Bograh, Moorshedabad, and Mynagoorie.

The notes remaining in store at the several treasuries at the close of the year amounted to Rs. 17,29,570, against Rs. 9,95,270 of the preceding year.

The attention of all treasury officers has been directed to the Financial Notification of the Government of India, dated 14th January last, by which they are required to keep up their supply of currency notes of the circle within which their districts are situated, by ordinarily cashing all such notes freely on demand.

The statement below exhibits a comparison of the transactions of the Money Order Offices in the Lower Provinces, during the year under review, with eleven-twelfths of the results of the preceding four years :—

YEAR.	Total number of orders issued.	Gross amount.			Average amount.			Gross commission realized.			Gross receipt by commission, profit accruing from lapsed orders, &c.			Gross expenditure.			Surplus.		
		Rs.	As.	P.	Rs.	As.	P.	Rs.	As.	P.	Rs.	As.	P.	Rs.	As.	P.	Rs.	As.	P.
Eleven-twelfths of	1862-63	11,172	6,81,971	7 10	55 15 4			7,336	5 0		7,336	5 0		2,961	15 6		4,374	5 6	
	1863-64	23,863	11,31,739	4 2	55 0 0			16,462	10 4		16,462	10 4		8,100	14 8		8,361	11 8	
	1864-65	34,089	19,44,330	12 6	50 7 3			23,198	7 9		23,198	7 9		8,776	13 6		15,421	10 1	
	1865-66	35,883	18,67,603	9 9	48 3 7			21,333	0 8		22,811	12 3		9,806	6 2		13,027	6 1	
	1866-67	36,038	19,40,339	14 0	53 3 6			21,162	14 6		23,838	1 6		12,544	2 3		11,293	15 3	

Of the total number of orders issued in 1866-67, 2,325 were issued at Calcutta, the aggregate value of which amounted to Rs. 2,15,662-5-0.

Of the total number of orders paid during the same period 17,162 orders were paid in Calcutta, amounting in aggregate to Rs. 9,63,913-3.

The amount of commission realized during the year was Rs. 20,894-12-0. A further sum of Rs. 238-2-6 was realized on account of commission on duplicate orders; and, besides this, a sum of Rs. 2,705-3-0 was carried to the credit of Government on account of lapsed orders, that is, of orders for which payment had not been demanded for a period of twelve months. The total sum available for meeting the expenses of the Department amounted thus to Rs. 23,838-1-6, while the amount actually disbursed was Rs. 12,544-2-3, which left a surplus of Rs. 11,293-15-3.

There were three cases of embezzlement by Money Order Agents during the year as noted on the margin. In one of these (the Balasore case) the agent has been criminally punished, and in another (the Gowalparah case) a great portion of the amount due from the agent, who has died, has

	Rs.	As.	P.
By Balasore Agent ...	607	14	0
„ Darjeeling Agent ...	8,975	11	0
„ Gowalparah Agent ...	185	11	0

been recovered by the sale of his property. The Darjeeling case, the most important of the three, was still under enquiry at the close of the year; but in the meantime the agent, Mr. Counsell, had absconded, and hitherto no trace of him has been obtained. Measures have been adopted to prevent the recurrence of such cases in future.

SECTION V.—EDUCATION.

At the close of the year under review the number of colleges and

General Statistics.

Colleges and Schools under inspection on the 31st March 1867.	Number of Institutions.		Number of Students.

		425		13,460
		3,332		134,640

schools, Government and aided, was 2,907, and the number of students in them 121,180, against 2,561 schools and 113,848 students at the end of the preceding year. The returns of the year under review exhibit, therefore, an increase of 346 schools and 7,332 scholars. In addition to these institutions 425 private schools which receive no pecuniary aid from Government have been brought under the cognizance of the Education Department, and the number of students in them was returned as 13,460. The total number of colleges and schools under the inspection of the Education Department was therefore 3,332, and the number of students in them 134,640.

* Inclusive of 1st Arts classes attached to the Anglo-Persian Department of the Calcutta Mudressa which contained six students at the end of the year.

The total expenditure of the Education Department for the eleven months ending 31st March last was estimated at Rs. 22,90,691, of which Rs. 9,04,929 was contributed from local sources of income, the estimated net charge upon the public revenue amounting to Rs. 13,85,762. The cost for each student was Rs. 11-6, or about £ 1-2-9. The above figures refer solely to Government schools and to institutions which receive pecuniary aid from the State; the charges incurred on purely private institutions which have accepted the inspection of the department are not taken into account.

1863-64	3,48,576
1864-65	4,44,227
1865-66	5,13,238
1866-67 (eleven months)	4,96,713

The number of candidates for the Entrance Examination was 1,350,

University Examinations.

Entrance Examination.

against 1,500 of the preceding year, the reduction being the direct result of a new regulation of the University by which admission to the examination is made dependent on the opinion of the teacher that there is a reasonable probability that the candidate will pass. This check has been imposed in consequence of the very large proportion of failures in previous years. The results of the year under review were better to some extent, * but not altogether satisfactory.

The total number of candidates from Bengal was 1,147, and of these 561 were successful, 69 being placed in the first, 255 in the second, and 237 in the third division. 254 of these students were from Government schools, 153 from private aided schools, and 143 from private unaided schools, while 8 were private students and 3 were school masters. A classification of the successful candidates according to creed shews that 452 were Hindus

	1865-66.	1866-67.
Number of candidates from Bengal ...	1,321	1,147
Number that passed ...	433	561

14 Mahomedans, and 35 Christians, while the remaining 60 described themselves as Brahmists and Deists.

The result of the Entrance Examination decided the award of the 160 Government Junior Scholarships, 100

Award of Junior Scholarships. of which were gained by pupils of Government schools, 37 by pupils of aided schools, and 23 by pupils of unaided schools. On the application of the successful candidates 132 of these scholarships were made tenable in Government colleges, 26 in aided colleges, and 2 in independent institutions.

The number of candidates for the First Examination in Arts was 426,

First Examination in Arts.

of whom 393 were from Bengal. Of these latter 120 were successful, 13 being placed in the first division, 40 in the second, and 67 in the third. 78 of the entire number came from Government colleges, 37 from private aided colleges, 4 from independent institutions, and one was a school master. In creed, 85 of the successful candidates described themselves as Hindus, 24 as Brahmists or Deists, and 11 as Christians.

The results of this examination determined the award of the 24 Government Senior Scholarships, 20 of which were gained by students from Government colleges, 3 from aided colleges, and one from an independent college.

Award of Senior Scholarships.

The number of candidates for the B. A. Examination was 141, of

B. A. Examination.

whom 138 were from Bengal. Of these latter, 58 passed successfully, viz., 10 in the first, 27 in the second, and 21 in the third division. 39 of these were students of Government colleges, 13 belonged to aided colleges, and 6 were school masters. In creed, 29 of them were Hindus, 24 Brahmists or Deists, 4 Mahomedans, and one Christian.

For the examination for Honors in Arts there were 31 candidates, of

M. A. Examinations.

whom 18 were successful, 3 having passed in Languages, 8 in History, 4 in Mental and Moral Philosophy, and 3 in Mathematics. Of the entire number of successful candidates 13 were graduates of the Presidency College, 2 of the Dacca College, 2 of the Sanscrit College, and one of the Free Church Institution. In creed, all the successful candidates were Hindus.

For the ordinary M. A. degree there were 8 candidates, 4 of whom were successful, one having passed in History and 3 in Mental and Moral Philosophy. Of these, 3 were school masters and one a graduate of the Doveton College. In creed, 3 were Hindus and one was a Christian.

At the examination in Law there were 53 candidates, of whom 22

Law Examinations for the degree of B. L. and the L. L.

were passed for the degree of Bachelor in Law, 3 being placed in the first division and 19 in the second division. 14 were also passed for a License, and of these 5 were subsequently declared entitled to the degree of B. L. under clause 7 of the B. L. regulations.

Two candidates presented themselves at the first B. M. Examination,

Medical Examinations for the degree of B. M. and the L. M. S.

of whom one was declared successful and placed in the second division. There were 2 candidates also for the second B. M. Examination, one of whom passed in the first division, and

one in the second. For the first examination for the License in Medicine and Surgery there were 44 candidates, of whom 17 were found qualified and placed in the second division. For the second or final examination there were 18 candidates, of whom 15 were successful, 5 being passed in the first and 10 in the second division.

The number of candidates for the License in Civil Engineering was 9, but none of these were successful.

The number of under-graduate students attending the Government Colleges affiliated to the University in Arts was 718, against 749 of the preceding year. The statement below exhibits a comparison of the distribution of the students among the several colleges for the last five years, and the expenditure of each college for the last year :—

GOVERNMENT COLLEGES—GENERAL.	Average of monthly Fees.	NUMBER OF UNDER-GRADUATE STUDENTS ON THE ROLLS AT THE END OF THE YEAR.					Monthly average number of Students in 1866-67.	EXPENDITURE IN 1866-67.		
		1862-63.	1863-64.	1864-65.	1865-66.	1866-67.		Imperial Funds.	From Fees and Endowments.	Total.
	Rs. As.							Rs.	Rs.	Rs.
Presidency College	12 0	280	360	323	310	271	278	65,515	27,872	93,387
Sanskrit College ...	3 0	16	22	26	20	24	19	5,782	618	6,400
Hooghly College ...	5 0	65	82	133	141	134	120	20,119	20,119
Dacca College ...	5 0	128	111	129	110	123	110	19,295	6,363	25,658

Kurroonamoy Banerjee ...	30	Hindu College Foundation Scholar.	Mathematics.
Bany Madhub Dutt ...	30	Ditto ...	Mental and Moral Science.
Fara Prossunno Banerjee ...	30	Ditto ...	History and Political Economy.

The opening of 3rd and 4th year classes in the Government Colleges at Kishnagar, Berhampore, and Patna was noticed in last year's report. Additional Professors for the Colleges at Kishnagar, Berhampore, and Patna. A second professorship has been sanctioned by the Secretary of State for each of these colleges, but the professors had not yet been appointed at the close of the year.

With a view to meet the wishes of the Mahomedan community the college classes of the Anglo-Persian Department of the Calcutta Mudressa have been affiliated to the University up to the lower standard in Arts. They contained six under-graduates at the end of the year.

Sanction has been given to the raising of the existing assignment of the Cuttack school from Rs. 3,616 to Rs. 12,000 per annum, with the view of placing the institution on the footing of a collegiate school, as a preparatory step towards the foundation of a college for the province of Orissa. For the present it is intended that the school shall educate up to the standard of the First Examination in Arts.

The number of under-graduates attending the private colleges receiving aid from Government was 409, as is shewn in the statement below, which also exhibits the expenditure of the colleges for the past year :—

Name of College.	Amount of monthly grant.	Amount of monthly fees.	NUMBER OF STUDENTS ON THE ROLLS AT THE END OF THE YEAR.		Monthly average number of Students in 1866-67.	EXPENDITURE IN 1866-67.		
			1865-66.	1866-67.		From Imperial Funds.	From Fees and Endowments.	Total.
	Rs.	Rs.				Rs.	Rs.	Rs.
Devoton College	380	12	23	30	20	4,180	11,858	16,038

Total	479	355	20,810	65,446	86,256

The average cost for each student in these colleges amounted to Rs. 242, of which Rs. 58 was derived from Imperial Funds and Rs. 184 from fees and endowments.

The following table gives the classification of the under-graduates in the several colleges for general education on the 31st March last, according to the social position of their parents :—

Description of College.	Zemindars, Talookdars, and men of independent income.	Merchants, Bankers, and Banians.	Professional persons.	Government servants and pensioners.	Shop-keepers.	Others.	Total.	REMARKS.
Government Colleges ...	220	62	69	228	9	126	714	Exclusive of 4 out-students in the Presidency College.
Aided Colleges ...	109	59	46	95	5	95	409	

The number of under-graduate students attending the colleges or departments of colleges for special education at the close of the year was 553, as shewn in the following table :—

Government Colleges—Special.	Monthly fee.	Monthly average number of Students on the Ralls in 1866-67.	EXPENDITURE IN 1866-67.		
			From Imperial Funds.	From Local Funds (fees.)	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.
Law Department, Presidency College ...	5 & 10	261	...	10,850	10,850
Ditto, Dacca College ...	5	35	1,009	1,101	2,200
Ditto, Patna College ...	5	9	1,252	948	2,200
Ditto, Hooghly College ...	5	40	...	3,417	3,417
Ditto, Kishnagar College ...	5	16	1,788	412	2,200
Ditto, Berhampore College ...	5	21	1,770	097	2,476
Medical College ...	5	128	80,899	6,065	86,904
Engineering Department, Presidency College ...	5	43	30,565	2,640	33,214
Total	553	1,17,202	35,320	1,52,521

It will be seen from the above that the Law Departments of the Presidency and Hooghly Colleges have now become self-supporting. Taking the average of the six Law Departments the total cost of each law student during the year under review was Rs. 84-10-6, and of this amount Rs. 69-5-3 was paid by fees, and only Rs. 15-5-3 by Government. The expenditure in the Medical and Engineering classes was very much higher. The charge for each medical student was Rs. 679, of which no less than Rs. 632 was paid by Government and only Rs. 47 by fees. An engineering student cost Rs. 772, of which Rs. 710-8 was defrayed by Government.

The statistics of the Bengali and Military classes of the Medical College and of the Government Art School are shewn on the margin. The Bengali Medical classes are increasing in popularity, and form a most important department of the Medical College. A new section of the department, called the Vernacular Li-

Government Schools, Special.	Monthly fee.	Monthly average number of Students.	EXPENDITURE IN 1866-67.

School of Arts ...	1	82	17,600	195	17,795

centiate Class, which was organized for the first time at the

commencement of last Session, to provide a higher course of Vernacular instruction than has hitherto been offered for students who desire to qualify themselves for independent practice, has opened with every prospect of success.

The School of Art has been making steady progress, and some remarkably good work was executed during the year. The students,

however, are too commonly tempted away from the school at an early stage by the prevailing demand for work of an inferior order. The best results would be obtained if they could be prevailed on to remain at the institution for a longer period.

Twenty-six Government Normal Schools, or departments of schools, for the training of masters were in operation during the year, and one

Normal School for mistresses. The statistics for these institutions are

given on the margin. The new schools of this class which were opened during the year are one at Mozufferpore of the same standard as those established at Bhaugulpore, Chuprah, Gya, and Purneah, and two in Assam, at Tezporo and Seebasgur, of a lower standard, for the training of teachers for the elementary village schools of the province. Taking the expenses of the several schools together the average cost of each student was Rs. 91, of which Rs. 85 was derived from Imperial Funds, and about Rs. 6 from fees or other private sources.

The girls' schools in operation in connection with the Education Department, including private house-schools conducted by zenana associations, were 281 in number, shewing an increase of 64 schools during the eleven months under review, the number of pupils having risen during the same time from 5,559 to 6,531. In many of these schools the managers have now adopted the principle of fee payments, which proves incontestably the reality of the demand for the means of instruction. The quality of the instruction now given is, however, susceptible of much improvement.

The introduction of schooling fees in the Bethune School came into operation from December last, the fee having been fixed at one rupee a month. The immediate effect of the measure was the withdrawal of no less than 60 children from the institution, but they have since been gradually returning to it.

The Bethune Female School.

Miss Carpenter having, on the occasion of her visit to Calcutta, proposed that, with a view to assist the spread of female education in Bengal, the Government should undertake the establishment of a Normal School for the training of native female teachers, the Director of Public Instruction has been called upon to report generally what prospects of success there are for an institution of the kind at the present moment, and whether it is practicable to engraft it as an experimental measure on the Bethune Female School.

A scheme has been submitted for the sanction of the Government of India for the establishment of night schools under the management of patshala gurus, and for making the patshalas at the same time available for the instruction of native girls. The number of night schools proposed to be opened at the outset is 100, but the scheme, if successful, will be eventually extended by the establishment of 500 schools at an average cost of Rs. 35 per annum for each, or a total expenditure of Rs. 17,500 a year. The object held in view is to impart elementary education to the masses of the people, who have no time in the day to devote to the acquisition of letters. The plan to be adopted for making the patshalas available during the day time for the instruction of girls is to allow a fee of one rupee per mensem to each guru who should succeed in attracting five female pupils to his school. The number of patshalas likely to be attended by girls is 400, and the average number of girls likely to attend each patshala is estimated at six. The average amount payable at each patshala is thus estimated to amount to about Rs. 12 a year, which gives a total of Rs. 4,800 for all the schools.

The Missionaries of Jessore having offered to pay monthly stipends to some of the certified gurus of village patshalas in that district, and also to supply the schools with maps, globes, &c., on the condition of their introducing the Bible into those schools, and some of the gurus wishing to accept these offers, permission to do so was accorded on the recommendation of the Director of Public

Introduction of the Bible in Village Patshalas.

Instruction, with the proviso that no objections were raised by the villagers who support any school thus aided, and the reading of the Bible was not made compulsory on individual children whose parents objected to it.

The number of institutions of all classes receiving regular monthly assignments of public money under the grant-in-aid rules has been increased from 1,213 to 1,393, and the amounts of the grants from Rs. 3,47,591 to Rs. 3,97,687 per annum. The new and augmentation grants amount in the aggregate to Rs. 59,864,* while some former grants have been cancelled or reduced to the extent of Rs. 9,768, so that the net increase of expenditure amounted to Rs. 50,096.

	Rs.
* To London Missionary College, Bhowanipore	3,600
New grants to 220 schools	48,758
Augmentation grants to 45 schools	7,506
	<u>59,864</u>

In addition to the above, casual grants for special purposes have been sanctioned during the eleven months under review for 69 schools to the extent of Rs. 26,212.

Casual grants for special purposes.

The passing of a law for educational purposes in connection with the system of grants-in-aid was proposed during the year by the Director of Public Instruction, with a view to provide a special cess for the maintenance of local schools, and to set at rest certain difficulties which were constantly arising as to the person or persons to be held liable for the debts of schools aided by Government. The measure, however, appeared to the Government to be premature at present.* The principle of a local compulsory education rate was admitted to be a perfectly sound one, but it was believed that the imposition of such a rate would be extremely unpopular, and the Government preferred waiting for the further development of the voluntary principle which under the grant-in-aid system is now in a state of growth, before coming to the conclusion that a compulsory system must be resorted to. The question of removing the difficulties experienced in the recovery of money due to aided schools and in their proper management generally was still under consideration, the Director having been asked to report further in communication with the Remembrancer of Legal Affairs.

The number of Senior Scholarships opened to public competition in Bengal has been increased from 24 to 40, at an additional expenditure of Rs. 574 per mensem, the number hitherto available being considered quite inadequate for the large and increasing

Former Scale.			Scale now sanctioned.

number of under-graduate students who compete for these prizes at the first examination in Arts. The alteration in the scale of stipends is shown on the margin. The change will necessitate

a revision of the scholarship rules now in force, and the new scholarships will not be awarded till January 1868.

The trustees of the "Gilchrist Educational Trust" having expressed a wish to establish two annual scholarships of £100 each, tenable for three years, to be held by natives of India at the Universities of London and Edinburgh, and the Government of India having asked for the opinion of this Government as to the best mode of giving effect to the plan, it was stated in reply that what appeared to be necessary was to notify the scheme in the *Gazette of India* and the *Gazettes* of the several Presidencies for general information, and that the selection of candidates for Bengal could easily be made by the officers of the Education Department, and their examination conducted without difficulty. It was stated at the same time that the inducements offered were not likely to attract any large number of candidates, as a stipend of £100 was not enough to enable a native student to proceed to England or Scotland for a three years' course, since nearly two-thirds of the whole amount would have to be expended on the voyage to and fro, and only one-third would remain for his support. It was added that, if the trustees had the means of expending £600 a year on the higher education of natives of India in England, it would probably be more advantageous to endow one annual scholarship of £200 tenable for three years and to assign it to each of the three Presidency towns in turn; and that in that case the trustees might not be unwilling to connect the Gilchrist Scholarship with the three Indian Universities and leave the selection and examination of candidates to those bodies.

SECTION VI.—PUBLIC WORKS.

GENERAL.

The expenditure on Public Works in Bengal has been somewhat under a million sterling, and compared with the expenditure of the previous year would indicate that there has been less done during the year 1866-67 than was done in the year preceding, in which the expenditure was over a million sterling. Such is not in reality the state of the case, for the commencement of the official year having been advanced one month, there have only been eleven months of actual work in the year 1866-67, the month omitted being one of the good working months of the year. It may be said that the expenditure was about the same in both years.

The principles on which the expenditure was made are very much the same as those of the previous year. The restriction placed by the Government of India on the amount appropriated for Military works necessarily prevented any portion of this sum being diverted to other purposes, and after setting this aside and duly attending to the ordinary wants of the various departments and branches of the administration, the remaining sum has been devoted to meeting the more urgent wants

of buildings required to carry out the improved administration of the Civil Department, and to pushing on the various lines of communication in the territories under this Government.

The greater part of the expenditure on new works has taken place in this direction, over 33 lakhs of Rupees (£330,000), or about one-third of the total expenditure having been spent in communications; or, if repairs be included,—and they, *i. e.*, the maintenance of old roads, are perhaps of more importance than the construction of new lines,—the total expenditure on this head becomes nearly 42½ lakhs of Rupees (£425,000) which is very little short of half the actual expenditure.

A considerable sum (£150,000) has been spent in Civil Buildings.

Large as these sums are they go but a small way towards keeping pace with the development of the country, and they barely meet the most urgent wants of the provinces under the Bengal Government. Local Funds for the construction of roads and other works of public improvement have unfortunately been falling off of late through causes which need not be entered into here, but the subject has occupied much attention, and it is expected will shortly be met to some extent. The provision of the large sums of money required is undoubtedly a question of very great difficulty.

Work has been carried on this year under special difficulties, though these arose from different causes to those noticed last year. Last year's work was considerably paralyzed from the want of officers withdrawn for the Bootan campaign, or absent from their duty in consequence of illness contracted on that service. This year the famine in Orissa has produced the same effect, as it became necessary to largely reinforce the establishments in that Province, and early in the working season officers and subordinates were sent to assist in the relief operations. As other considerations were not allowed to interfere with supplying men for the famine relief works, the consequence has been that the work of the Department elsewhere has been carried on under great disadvantages, both as regards the actual number of persons available to superintend and carry on the work, and also as regards efficiency, for the officers sent to Orissa were picked men. The difficulties have been increased by the Engineer Establishment being generally short-handed during the most valuable part of the year.

The progress of work in the Province of Assam has been facilitated by the importation of labor, but the exact results of the measure have not yet been fully ascertained.

There were several changes determined on or carried out in the arrangements of the Department during the year.

The Cuttack Circle was reduced by the transfer of three Divisions* to the Presidency Circle. This was done in order to leave the Superintending Engineer of the Cuttack

* Tumlook.
Midnapore.
Hidgellee.

Circle free to give his undivided attention to the relief and embankment operations in Orissa. With the same object the relief of the Superintending Engineer from his duties of Consulting Engineer of Irrigation was determined on and approved by the Government of India. It was not, however, practicable to provide an officer for the new post during

the year. The works at Barrackpore, Ishapore, and Chinsurah were separated from the Garrison Engineer's Division, and formed into a separate Division in order to provide more efficiently for the construction of the new Barracks at Barrackpore and the Powder Works at Ishapore. The Jessore Roads Division was abolished and the works thrown into the Nuddea Local Roads Division, the progress of the Railway Feeders in both Divisions having been sufficient to allow of this being done.

The operations of the Department will now be noticed in detail following the same order of the main heads into which the work is usually divided as last year :—

MILITARY.

It has not been possible to carry out much actual work on the new Barracks to be erected for the European Troops in Bengal in consequence of the length of time taken up in the settlement of preliminaries, but much as this delay is to be regretted, it is indispensable before incurring so large an expenditure as will be called for on account of these buildings to investigate all circumstances and to weigh all objections most thoroughly to avoid wasting public money, or frustrating the object of so much expense by carrying out the work in an imperfect manner.

The report of the Local Authorities at Hazareebaugh was submitted to the Government of India early in the year and the question seemed virtually to have been settled; the manufacture of bricks was pushed on, and two obnoxious bazaars were removed; but the question of the fitness of Hazareebaugh for English Troops has recently been reopened by His Excellency the Commander-in-Chief and must await further discussion.

The sites at Sinchall and Jullapahar near Darjeeling were visited in May 1866 by the late Lieutenant-Governor in company with the principal officials concerned. The question was discussed and considered, and His Honor's opinion and recommendations were at once communicated to the Government of India, the levelling of the sites was put in hand and a special Officer was appointed to pursue certain necessary investigations and to arrange the details. On consideration of the information thus obtained and on the report of the usual Committee it was determined to reduce the Garrison, and on His Excellency the Commander-in-Chief subsequently visiting the place the question has come forward for fresh discussion. There has not however been any real delay in consequence of this, as timber cutting and seasoning has been in progress and the manufacture of bricks has been pushed on. The brick season at Darjeeling is limited by climate to five months in the year and the season of this year was very bad, owing to frost and latterly to rain.

The thorough reconstruction required for Dinapore, and the limited ground available at that place, together with other causes, raised the question of whether, since so much had to be done, it would not be best to remove the Cantonment to a new situation on the Railway, and a carefully selected Committee was appointed to report on this question. It was necessary, however, to observe the extent of the floods at each

proposed new site, and the Committee could not report until after the rainy season. The report was unfortunately incomplete in some important points, and further information had to be obtained.

At Barrackpore the arrangements were settled, a large quantity of material was collected and work commenced. In future, progress should be good.

The alterations and additions to the Berhampore Barracks progressed fairly during the year, but the work was retarded by delay at the Cossipore Foundry in supplying the girders.

The water-supply of Fort William has been brought to a successful issue and is now in active operation; the following interesting remarks have been extracted from a memorandum by Captain S. T. Trevor, R. E., Garrison Engineer, the officer who has designed and carried out the work :—

“ According to the last census, the population of Fort William comprised 2,050 Europeans and 1,828 Natives, which, with the Military men residing in the Conductors’ Barracks in Hastings, make a total of say 4,000 souls who are supplied with water. The actual daily consumption of water measured from the distributing reservoir is as nearly as possible 64,000 gallons, which gives a rate of 16 gallons per head. This is a much smaller consumption than was anticipated, and it includes all such uses as watering roads, flushing drains, &c., &c. The average time taken to pump the day’s supply of water into the distributing reservoir is four hours, and the average height to which the water is raised is 70 feet. The cost of pumping, i. e., of coals, labor, grease, &c., actually used in pumping, is Rs. 10 a day, which gives

* Three-eighths of a penny.

a rate of one pice* per 100 gallons of water. The whole cost of maintenance of the water-supply, including cleaning and repairing buildings, tanks, pipes, &c., &c., is estimated at Rs. 500 per mensem, at which rate the cost of the water is raised to one pice† per 60 gallons, which is equal to about five mussucks.‡ The water is thus about five times as cheap as it could be supplied by bheestees.|| But comparing its cost

with that supplied by some of the large water works in England, it is about ten times greater, which is due to the very small scope of the works here.”

The completion of the work renders it unnecessary now to employ at times brackish water of the river for any purpose.

The additions and alterations to the Cartridge and Percussion Cap Factory at Dum-Dum, which were required for the improvement of these important manufactures, have been completed. Good progress has been made in remodelling the Gunpowder Factory at Ishapore, which is being greatly enlarged and improved to bring it up to the state of efficiency necessary to meet the requirements of the present day. These improvements are very extensive and involve much work.

Up to the close of the year 1866-67, some 2½ lakhs of Rupees had been expended on the new buildings. Many of these are completed, and others in good progress. Almost all the new buildings have been roofed with teak shingles, a mode of construction not previously

practised in Bengal, but required by the peculiar nature of the work and necessary in order to diminish, as far as possible, the liability to danger from an explosion.

Various circumstances have combined to delay the report of a Committee on the arrangements required for a large Military Hospital at the Presidency. A very complete but expensive scheme was received just after the completion of the year under review, and will receive notice in the next report.

A new Racket Court has been built, and a new Rifle Range has been nearly completed at Chinsurah. At Dinapore, a Five's Court, Slaughter-house, and Hospital Guard-room were completed during the year. The General Hospital was altered and improved in accordance with the special wishes of His Excellency the Commander-in-Chief. Stables for the Artillery are in progress. The Drainage works in the Cantonment of Cuttack have been all but completed.

The Post of Dewangiri was abandoned in November 1866, but that at Buxa is still held. The defences of the place have been improved, and many buildings of a temporary character erected.

Many minor works of small individual importance, but costing a considerable sum in the aggregate, have been carried out at the various Military Stations in Bengal.

CIVIL BUILDINGS.

Considerable progress has been made during the year, with the large buildings at the Presidency, the most important works of their class at present in Bengal.

The whole of the stone and brick-work of the "High Court has been completed up to the cornice, first floor, with the exception of the south verandah arcade, which was delayed owing to the non-arrival of the carved caps from England. The groining of all verandahs is complete, and the first floor girders have been hoisted and fixed.

In the New Post Office, the brick-work of the rotunda has been completed and is ready to receive the dome. The six columns which were dismantled in the east verandah have been rebuilt. Progress has been made in paving and other minor matters. It appears probable that the Telegraph Department cannot be accommodated in this building as was originally intended, and the question of erecting a suitable building for that Department is under consideration.

The Sailors' Home for unemployed seamen has been completed during the year, and arrangements made for the out-offices. As soon as these have been built the Home may be entered upon.

The foundation and brick-work up to ground level of the Imperial Museum has been completed during the year. This work should now make rapid progress.

In the New University also the foundation is nearly complete notwithstanding delay in acquiring the land and great difficulties from the unfavorable soil.

The eight Sheds of the Pauper Hospital and the Steward's House have been completed. Temporary out-offices were erected for the use of the sick of the famine.

A new Assay Office has been constructed and improvements have been carried out in the Mint, the Lunatic Asylum at Dullundah, and in several other Civil Buildings at the Presidency. These alterations and improvements have added considerably to the usefulness of the buildings concerned, while they have cost a considerable sum of money.

The report of the Committee on the Civil and Military Hospitals has already been noticed under the head Military; the remarks there made apply here.

The works in the various districts of Bengal under the head of Civil Buildings, though individually smaller, have not perhaps been of less importance than those at the Presidency.

Court-houses.—The improvements in the Civil and Criminal Court-houses which were commenced in former years have been systematically carried on during the past year. The following have been completed :—

Collector's Court-house at Dacca.

Guard-house for ditto at Rampore Beaulah.

And the following have been in progress :—

Court house for Deputy Commissioner at Dibrughur.

Ditto	ditto	at Yeodo.
Ditto	ditto	at Cachar (nearly complete.)
Ditto	ditto	at Chybassa (commenced.)
Ditto	Judge	at Sooree (walls 12 feet high).

Provision was made in the Budget of the year for a new Court-house at Gowhatty, but the work was not commenced, because it was thought more desirable to expend the money in improving the communications of the district. A Record-room at Gawalparah has been completed during the year, and the commencement of another at Nowgong has been found necessary and ordered.

Additions and alterations have been made to various Court-houses to increase the accommodation afforded :—

In the Court-house of the Judge		at Hooghly.
Ditto	Collector	at Burrisaul.
Ditto	ditto	at Noakhally.
Ditto	Sudder Ameen	at Bancoorah.
Ditto	Judge	at Jessore (to accommodate the Police).
Ditto	Collector	at Kishnaghur (to accommodate the Record Office).
Ditto	Commissioner	at Bhaugulpore.
Ditto	Judge	at Ditto.

The following new Sub-Divisional Building has been completed during the year, *viz.* :—

New Court-house at Kissengunge.

And the following commenced, but not completed, *viz.* :—

New Court-house at Magoorah.

Ditto	at Busserhaut.
Ditto	at Luckimpore.
Ditto	at Bagirhaut.

Additions and alterations have been made to Sub-Divisional Court-houses at—

Meherpore.	Bongong.
Chooadangah.	Satkhira.
Jenidah.	Ranaghat.

Jails.—The question of Central Jails has proved to be one of much difficulty. The plans for double-storied radiating buildings which were submitted by the Government of Bengal were disapproved of by the Government of India, mainly on the score of expense, the proposed cost of Rs. 550 per prisoner being stated to be double the prevailing rates elsewhere, and being considered too high. A plan in use in the Upper Provinces has been forwarded for guidance and adaptation to Bengal. The voluminous plans and estimates for a system of buildings of this description have not yet been completed, and it is impossible to say what the cost may be, but as walls of sun-dried bricks of which these Jails are constructed in the Upper Provinces will not suit in the damp climate of many parts of Bengal, and other alterations will be requisite, the cost of the buildings at the higher rates prevalent in Bengal must be more than elsewhere. The preparation of material has been ordered for the Central Jails at Hazareebaugh, Nuddea, Deegah and Midnapore, and under the orders of the Government of India a commencement of work on the Upper Country plan will be made.

The Central Penitentiary for European Convicts at Hazareebaugh has been pushed on and is nearly complete.

Numerous improvements have been carried out in various District Jails during the past year, of which the following may be noticed :—

Provision for European prisoners at Dacca.

Raising the compound wall of the Jail Hospital compound at Jessore.

Berhampore Hajut Wards (one for Europeans) completed.

Raising walls of Jail compound at Dibrooghur.

Alterations in the Lepers' Ward, Burdwan Jail.

Alterations and additions, Midnapore Jail.

The new Jail at Darjeeling is in good progress. The main wards have been completed.

A new Civil Jail at Purneah has been completed.

Sub-Divisional Lock-ups have been completed at Cutwa, Meherpore, Dinapore, and Behar, and commenced at—

Aurungabad.	Jehanabad.
Bhubooa.	Doomkah.
Pakour.	Godda.
Sewan.	Bagirhaut.

Banka.

Lock-ups at Deoghur and Khoordah were ordered, but not commenced during the year.

Opium Department.—A new Godown has been built at Tehta ; alterations and additions to Opium Buildings were carried out during the year to a considerable extent at that place, and at Goolzarbaugh and Sewan.

Lunatic Asylum.—Additions and alterations were carried out at Cuttack and Dacca in the Lunatic Asylums. That at Dullundah has been already mentioned.

Educational.—In the *New College at Berhampore* excellent progress has been made. Nearly all the necessary materials have now been collected, and the walls have been raised to a general average height of 20 feet. The University Building in Calcutta has been already mentioned. No other Educational Buildings of importance have been built during the past year.

Ecclesiastical.—The new Churches at Purneah and Gya are completed, those at Cachar, Arrah, and Motecharee are nearly so. A new Cemetery has been made at Gya, and those at Sahebgunge, Darjeeling, Cuttack, and Cachar improved.

IRRIGATION.

A large quantity of work has been done to the embankments in Orissa, this has been partly to afford relief, and partly on account of the great damage done by the unusual floods of last season.

The greatest exertions have been made by the officers concerned to repair and improve the embankments for the coming flood season. In the three Cuttack Divisions about $1\frac{1}{2}$ lacs of Rupees were expended on embankment repair. It was expected that all breaches would be closed by the 15th of June and many miles of embankment raised above flood level. The embankments regarding which most serious apprehension was entertained were those on the Kursooa River at Dolterra and the Benga near Fazilpore. It was also feared that some lengths of embankment on the Mahanuddy and Sookpyka Rivers could not be sufficiently raised in time. While so much was being done on the Government Embankments, those of the Zemindars necessarily occupied the second place, they have, however, been since taken up, and it is hoped that some good may be effected. Of the various lengths of Sea Bund north of the Dhamrah River, the Bidaiepore Bund is the only one which was not expected to be completed this season. Its repair was delayed by the great want of labor.

A very extensive investigation was made by Captain Harris during 1856-59 with the view of regulating and controlling the floods of the large rivers of Orissa, but the extensive system of canals and connected works brought forward by the East India Irrigation and Canal Company caused the matter to be set aside, and now a modification of the works to be undertaken by the Company and the floods of the last year have caused the matter to be taken up again with a view to its disposal in a comprehensive manner.

T. E. Ravenshaw, Esq., C. S., Officiating Commissioner of the Cuttack Division.

Lieutenant-Colonel F. H. Rundall, R. E., Chief Engineer, East India Irrigation and Canal Company.

A. G. Crommelin, Esq., C. E., Officiating Superintending Engineer of the Cuttack Circle.

A committee, as per margin, has been appointed to report on the subject, and survey parties were authorized for the collection of the necessary data. This will occupy some time, and the progress hitherto made has not been all that could be wished, partly owing to the difficulty and consequent

delay of procuring qualified persons, and partly to other causes. Operations will be vigorously renewed as soon as the season will admit of it.

The Great Hidgellee Sea Dyke originally designed to be 54½ miles long has progressed during the year but is not yet complete. Several alterations and improvements have been found desirable.

The embankments in the 24-Pergunnahs, the Damoodah, Tumlook, and Midnapore Divisions are for the most part completed ones. The work in these Divisions is mainly of the character of repairs. New embankments are constructed from time to time at points where the encroachments of the rivers have endangered the old ones. New sluices are constructed where necessary for purposes of irrigation or drainage. Such works, though of considerable importance as ensuring the protection from floods of large tracts of highly cultivated country, and requiring much attention and the expenditure of large sums of money, do not require particular notice.

The better regulation of the floods of the Damoodah, Roopnarain, Selye, and Cossye Rivers has, for some time, been a subject of acknowledged importance. With the approval of the Government of India, the Executive Engineer, Tumlook Division, is now engaged in preliminary enquiries preparatory to a full investigation of a portion of the subject. Lieutenant J. M. Heywood, B. E., an officer specially appointed for the purpose, was employed during the past cold season in an exploration of the upper reaches of the Damoodah River and its tributaries, and completed a very full and interesting investigation, but his health failed and he was obliged to proceed at once to England. The report of his proceedings is expected immediately.

Considerable progress has been made during the past season on the works of the East India Irrigation and Canal Company. The Secretary of State having desired that the Company should be aided in the prosecution of their works by advance of funds from Government treasuries, these advances were ordered in February last and have since then been continued. The present state of the works is as follows:—

Naraje Weir.—The object of this weir is the regulation of the quantity of water which shall flow into the Mahanuddy and Katjooree rivers respectively, and its construction was consequently the first step towards carrying out a general system of irrigation. The original proposal of the Company to carry off the surplus water by large escapes between embankments was negatived by Government on account of the great cost of the land required, and this matter cannot be again taken up until the Embankment Committee have submitted their report. The embankment on the left flank of the weir failed during a flood of last August, owing to a slip of the rubble-work at the junction of the embankment with the revetment wall of the weir. The revetment wall has now been prolonged beyond this point and the embankment raised. The upper apron has been carefully packed.

Kendraparah Canal.—The excavation of this canal is reported by the Company's Agent to be complete for 26 miles, and the next 4 miles to Attaboos are expected to be ready by the end of July. The survey and levels for the extension to tide waters have been received and are under the consideration of Government. Sixty miles of distributaries are complete, 10 miles in hand, and 40 staked out, ready for commencement. These distributaries command nearly 60,000 acres. Lock No. 2 is nearly complete, and No. 3 in good progress.

Taldunda Canal.—Excavation is in progress over 19½ miles, of which the first 8 are half completed. Two bridges have been commenced: arrangements have been made to employ all light labor gangs available on this canal during the monsoon.

Machgaon Branch.—The first length of the Machgaon Branch was sanctioned during the year, and work is in progress along 4 miles.

High Level Canal.—Water has been let into this canal for a length of 11 miles. From the 11th to the 22nd miles, two only, the 14th and 18th, are as yet uncommenced; the remainder are more than half finished. One-half of the distance from the 22nd to the 34th mile is under excavation. The lattice girder bridge over the Grand Trunk Road, 5 miles from Cuttack, has been opened to traffic. Five distributaries have been partially opened, of which No. 1 extends 10 miles and supplies water for irrigation.

Midnapore Canal.—This canal is open for 20 miles between Oolobariah on the Hooghly and Pauchkooah on the Cossye River. The locks at Oolobariah and Dainan are completed, and that at Bansbaria commenced. Water was brought from the Cossye by a temporary dam and distributed for irrigation last working season. Thirty miles of distributaries from this part of the canal have been marked out, of which 13 miles are finished and 14 in hand. The Midnapore anicut has made good progress. This length of canal has been excavated to half section for 5 miles, and the remainder is in progress. From this length, 60 miles of distributary have been lined out, of which 12 miles are complete and command 50,000 acres for irrigation.

Tidal Canal.—This canal admits of inland navigation from Calcutta to a place called Baligai, within 25 miles of Jellasore on the Soobunreeka. Two reaches, 9 and 18 miles in length respectively, have been completed. One lock is in course of construction.

The appointment of a special officer as Consulting Engineer to the Government of Bengal in the Irrigation Department has been sanctioned, and also the deputation of a Deputy Collector, to explain to the people the advantage which will arise to them from the use of artificial irrigation. This officer was appointed at the express solicitation of the East India Irrigation and Canal Company and is paid by the Company.

COMMUNICATIONS.

The attention of the Imperial Establishment has been principally directed to pushing on the main lines of communication.

Grand Trunk Road.—Of the several large bridges remaining to be completed the Morhur Bridge has been opened for traffic. The Boorya Bridge (of 16 arches of 74 feet) near it has been completed to the extent of 7 arches. The difficulties which were noticed last year as having occurred at the Burrakur Bridge have been successfully overcome and good progress is now anticipated. The principal work remaining to be done at the bridge is the construction of 2 piers on deep block foundation and setting up 3 of the girder spans of 155 feet each.

Patna Branch Road.—This road is far advanced towards completion. The seven iron viaducts are complete in all respects. Six brick-work viaducts of 864 running feet of waterway have been completed during

the year, and three others of 656 feet approach completion. Six bridges affording 2,272 feet of waterway are in progress. The foundation of the north abutment of the Jumna Bridge has been got in after some difficulty, owing to the presence of water.

Bhaugulpore and Sooree Road.—On this road one timber trussed bridge of 40 feet span has been completed, the abutments of five others of 30 and 40 feet span are ready for the superstructure, and those of 10 are in progress. Twenty-six culverts have been constructed, and 12 more are in progress.

Ganges and Darjeeling Road.—The portion of this road which lies in the ordinary plain country is now metalled for its whole length from Caragolah to Silligoree, with the exception of a gap of 6 miles, which, it is expected, will be completed during the present season.

Terai Road.—This is a portion of the last road, and during the year considerable progress has been made on this road. Seven lakhs of cubic feet of earth-work were executed, leaving only $1\frac{1}{2}$ to complete the embankment. Metal has been collected for 6 miles out of a whole length of 8, and has been laid down for 4 miles. Timber sufficient to complete nearly the whole of the bridges has been collected. The malaria of this portion of the road at certain seasons, and the annoyance experienced from swarms of insects, have greatly interfered with progress.

Darjeeling Hill Cart Road.—This is the Hill portion of the Ganges and Darjeeling Road and the first section has been completed 2 years. Of the second or lower section of this road, 22 miles in length, 6 miles are still incomplete, but four of these have been opened out to nearly full width, and bridges and culverts constructed. The remaining 2 miles are of great difficulty, rocky and precipitous. About half the work on these 2 miles has been done, but progress was interrupted from failure in the supply of gun-powder. The work is almost entirely blasting.

Cuttack Trunk Road.—From Calcutta to Midnapore this road has long been metalled. From Midnapore to Rajghat, on the Soobunreka, 45 miles, 15 miles have been metalled, and the remainder is in progress. On the next length of 88 miles through the Balasore Division metal has been laid down for 21 miles and is collected for 21 miles more. The next length of $45\frac{1}{2}$ miles up to Cuttack is metalled throughout, except a small gap near the Byturnee River, which will be made good shortly. It is hoped that this line of Trunk Road will be open throughout for mail carts by the close of the year 1868. The bridging of this road has been pushed on. Out of 60 bridges in the Balasore Division, 42 will be complete by the close of the present working season, and the remainder will probably be completed a year later; the bridging in the Mohanuddy Division is complete.

Madras Frontier Road.—This road connects the Cuttack Road with the Madras system of roads and completes the land communication between Calcutta and Madras. It was taken in hand as a work for relief of famine. Fair progress has been made. The earth-work of 10 miles has been completed and six miles partially metalled. It is believed that this road could be opened for rapid travelling in two more working seasons.

Cuttack and Pooree Road.—This is a branch of the Cuttack Trunk Road and is extensively traversed by pilgrims to the shrine of Juggernaut. It also was taken up as a relief work. The earth-work

is very nearly complete along the whole length of 50 miles, and the metalling of 6 miles near Pooree has been commenced.

Sonepore Road, 150 miles.—A good deal of work was done during the year towards the opening out of this road, which runs through the Tributary Mehals and connects them with Cuttack.

The Cuttack and Talhundah Road and the Cuttack and Patamoondee Road were remodelled throughout their length, 15 miles and 16 miles respectively. It was proposed to extend the latter of the above roads for 10½ miles to Aul as a famine relief work, and work has been carried on by light labor gangs over some 2 miles of the extension so as to afford a good deal of relief.

The excavation of a new boat channel at False Point was commenced; and though the work was a very difficult one owing to the heavy jungle in which it lay, considerable progress has been made. It was expected to be completed in time to prevent the communication with the Light-house being cut off during the rainy season.

Assam Trunk Road.—Some advance was made during the year in the construction of this road; but the magnitude of the undertaking and the numerous difficulties in the way make it impossible that this Trunk Line can be completed, except at a great expenditure, under a long period and without special arrangements. The question of a Railway to Assam has been brought forward as being the most speedy and effectual, and as not perhaps being the least economical means of opening up a communication at all seasons.

The present state of this road is as follows:—Starting westwards from Dibrooghur 30 miles of road are completed, leaving 50 miles to be constructed up to Jorehaut. This road only requires good ferries at the crossings of the large rivers to complete it as a fair-weather road. From Jorehaut to Komargong on the Dhunsiri River, 30 miles, preliminary survey and levels made this year shewed the necessity of a change in the alignment proposed. Starting again eastwards from Gowhatty, the road is complete for 7 miles, and a detailed survey was this year carried 7 miles further to the Kullong River, and the line of road laid out. For the next 20 miles a trial line was selected as far as Bograh Hill, and the road from that point to Nowgong has been accurately laid out and earth-work commenced. Leaving Gowhatty towards the west, 17 miles of road have been completed and 10 are in progress up to the Salmara River. From the Salmara westwards, a survey was carried for 30 miles and three routes to Gawalparah were explored.

The Frontier Road from Dibrooghur to Suddya has been rendered passable for troops, and the Dibrooghur and Jeypore Road much improved.

The road from Nowgong to Lowkowa was accurately surveyed, and its improvement commenced.

Cossyah Hill Trunk Road.—A set of levels was carried 92 miles from Gowhatty to Shillong *via* Marbesu for this road. On the south face of the Cossyah Hills a careful exploration was made to find a practicable descent to the Sylhet plains in continuation of the Hill Trunk Road. It is believed that the difficulty has been overcome, but the exploration could not be entirely completed this season. The construction of the Hill Trunk Road was actively recommenced, but stopped in December by order of Government. Eighty miles of road are open

to half width, of which 10 were executed this year in spite of difficulties, such as heavy rock-cutting, &c.

Birney Haut Bridle Road.—A line of levels, 62 miles long, was run on this route.

Gowhatty to Moflong Bridle Road, 80 miles.—On this road, 27 timber and rubble bridges and two masonry ones were constructed during the year. The road has been made passable for elephant traffic.

Sylhet and Cachar Road.—The present state of this road is as follows:—For 60 miles the earth-work is two-thirds done, permanent bridging commenced, and temporary bridging complete throughout. For the last 12 miles the work is less advanced, but temporary bridges are provided at all but the two largest rivers.

Hylukandy Valley Road.—This is a branch of the above. Great difficulty is found in carrying on work owing to the want of labor. The planters were requested to assist in this respect, but none have come forward as yet.

On the Bridle Road between Shillong and Sylhet by Lailankote and Lacaut, 20 miles are now opened out to a width of six feet from the Bogapanee River to Tunginath, and a trial line has been traced six miles further towards Lacaut. The adoption of this route for the descent of the Cossyah Hill Trunk Road to the Sylhet plains is, however, barred by the necessity of placing the terminus of the line at a point on the Surmah accessible to steamers from Calcutta all the year round.

The Bridle Road from Moflong by Cherra Poonjee to Bolagunge, 30 miles, is being extended 5 miles further to Companygunge on the Peine River for the convenience of traffic. The line at present ends in the swampy Terai at Bolagunge, and in the early and latter portion of the rains, when there is not enough water in the Bolagunge Nullah, travellers and goods are obliged to make their way across country from Bolagunge to the Peine River at Companygunge, and the want of a road is a great drawback and source of delay. A great quantity of miscellaneous road and survey work has been executed in Assam and elsewhere which it would be tedious to detail.

Feeders to the Railways.—The whole class of Railway Feeders have been constructed from the Income Tax and Local Funds, supplemented by Imperial grants.

It is needless to enter into a detailed account of each of these important roads; they are all to be raised, bridged, and metalled. The following will give a general idea of their state:—

Feeders to East Indian Railway.

(Completed.)	Synthea	Feeder	...	No. 2.
	Bhulpore	"	...	" 1.
	Ditto	"	...	" 2.
	Gooskarah	"	...	" 2.
	Mymaree	"	...	" 2.
	Paneeghur	"	...	" 2.
	Pundocah	"	...	" 1.

Synthea Feeder No. 1.—On the first $9\frac{1}{2}$ miles no work has been done, as an old road is available. On the remaining $9\frac{1}{2}$ miles a good deal of earth-work has been executed and culverts commenced; metal has been laid down for a mile.

Ahmedpore to Sooree, 13 miles.—This feeder is being remodelled. The earth-work is nearly complete, but in the metalling and bridging not much progress has been made.

Ahmedpore to Laghatta, 8½ miles.—The improvement of this road was undertaken as a famine relief work. The earth-work is about half completed.

Paneeghur to Adjai, 14 miles.—This road is in progress, but not very much work was done during the year.

Gooskarah to Dignugur, 5½ miles.—Metalling completed throughout. The large screw pile bridge over the Gamra Nuddee has been opened for traffic.

Burdwan to Cutwah, 3½ miles.—The first 8 miles have been metalled and completed with culverts. Earth-work is in progress on the remaining length.

Mymaree to Jamalpore, 11 miles.—The first 4 miles of this road have been metalled and 19 lakhs bricks burnt for ballast.

Pundooah to Culna, 17 miles.—The first 8 miles of this feeder have been metalled and ballast is ready for 2 miles more.

Bylabatee to Bhola, 10 miles.—This is an old road under improvement. The first 3 miles are being metalled with stone.

Mooraroi to Amrapara, 20 miles.—This road runs into the Sonthal Pergunnahs. The earth-work has been completed for 5 miles.

Burrakur and Chyebassa Road.—A great deal of relief was afforded during the year by the opening out of the second and third sections of this road; the former under Public Works agency, and the latter under the Deputy Commissioner of Singhbhum.

Progress has been made on the Burriarpore and Kurruckpore and on the Sultangunge and Arjusingunge Feeders.

Eastern Bengal Railway.

Completed. { Sodepore Station to Grand Trunk Road.
Agurparah and Chundunnuggur.
Bongong and Chogdah.
Kopenessur and Bijpore.
Echapore Station approach.

Kooshlea to Dadapore, 7½ miles.—Metalling and bridging nearly complete, except one large bridge.

Dadapore to Nattore, 28½ miles.—This feeder is now open for traffic throughout.

Kooshlea to Salgamoodia, 11 miles.—Metalling nearly complete; abutments of bridges complete; girders and roadway in hand.

Chooadangah to Meherpore.—Bridges in good progress, except that over the Dindut Khall; metalling is being pushed on.

Chooadangah to Jenidah, 22 miles.—Earth-work and bridging complete throughout; metalling complete, save 1½ miles.

Kotechandpore and Kissengunge, 21 miles.—Complete throughout except the gap at the Cobbaduck River.

Kotechandpore and Kallygunge, 8 miles.—Earth-work and bridges some time ago completed. In metalling the road there has been some delay, but it will be pushed on.

Bongong and Jessore.—Nineteen miles of this road, which is the Imperial Road between Jessore and Calcutta, have been metalled as a continuation of the Chogdah and Bongong Feeder.

Calcutta and South-Eastern Railway.

Chapahatty to Kalkapore.—This road has been completed with culverts as an unmetalled road.

Civil Officers.—The work executed on the district roads under Civil Officers, is usually of the character of repairs.

Nuddea Rivers.—Operations were commenced on the Bhagiruttee early in October to keep open the navigation of the rivers. The entrance channel, on which work was for the most part executed, and which was dry last year but open in 1864-65, is about 4 miles below Luckipore on the small arm of the Ganges. This channel was kept open throughout the year 1866-67, with a least depth of 6 or 7 feet of water. The least depth on the shoals throughout the river was, with few exceptions, 3 feet.

It is feared that there has been again a falling off of revenue from the toll collections on the rivers: this is owing to various causes, but chiefly perhaps to the abstraction by the East Indian Railway of much of the traffic which used to pass down the rivers.

Calcutta and Eastern Canals.—On these canals there has also been a falling off of revenue to a considerable extent, no less than Rupees 86,233. The main cause of this is undoubtedly the bad state of the canal, which is much silted up. It is said also that some traffic has been diverted by the South-Eastern Railway. The re-excavation of the canals is essentially necessary and will have immediate attention.

MISCELLANEOUS PUBLIC IMPROVEMENT.

But little work under this technical head has been executed during the past year.

Improvements have been continued to the Strand bank at Calcutta.

The drainage of the Calcutta Maidan was completed and is acting well. Improvements in progress in the Eden Gardens were completed and this place of recreation much improved.

In the Midnapore District several large tanks were excavated: another was commenced at Bhuddruck. These works were undertaken as famine relief works. A proposal has been brought forward for the improvement of the sanitary condition of the station of Jessore by shortening the course of the Bhyrub River. The scheme has been warmly supported by the zemindars, has received the approval of Government, and its execution now only awaits the provision of the necessary funds by those interested.

An attempt is being made to bring back the River Dibro at Dibrooghur to its old channel from which it was diverted by the works undertaken to keep out the floods of the Mekla. The success of the experiment is doubtful, but is much to be desired for the sanitation of the Cantonment.

Borings were made at the Sand-Heads to ascertain the possibility of placing screw pile light-houses at the mouth of the River Hooghly. The results have been reported to the Government of India for reference to the Chief Engineer of Light-Houses.

ESTABLISHMENT.

Great difficulties are always experienced in establishments. Sickness, with its attendant leave, changes, and transfers always causes inconvenience

and delay in carrying on work. The establishments when complete and in full work are no more than sufficient to carry on the ordinary works. This year the relief works in Orissa have as already noticed taken away a great many officers and it has been impossible to replace them.

EXPENDITURE.

The total expenditure from all sources, has been as follows :—

By the regular Public Works Establishments ...	Rs. 77,96,952
By Local Establishments organized like the Regular Establishment ...	9,62,475
By Civil Officers ...	8,88,000
Total Rupees ...	96,47,427

or nearly one million of pounds sterling.

It must, however, be noticed that the sum entered opposite " Civil Officers " is only approximate, being the sum sanctioned for expenditure, the actual expenditure not having yet been received. For this reason the works carried out by these officers have not been included in the foregoing remarks.

The expenditure may be conveniently shewn under the several main heads.

SERVICE HEADS.	BY WHOM EXPENDED.			Total Expenditure.
	Regular Establishment.	Local Establishment.	Civil Officers.	
	Rupees.	Rupees.	Rupees.	Rupees.
Original Works ...	45,05,054	5,60,520	8,88,000	96,47,427
Repairs ...	16,35,529	2,60,024		
Establishment ...	14,08,860	1,38,907		
Tools and Plant ...	1,14,674	3,024		
Profit and Loss ...	69,920		
Contributions ...	62,915		
Total ...	77,96,952	9,62,475	8,88,000	96,47,427

An abstract account of appropriation and outlay for Public Works, Imperial, and of expenditure on account of the several Local Funds in Bengal during the year under review, will be found in Appendices L.1 and L.2.

The mode of working the Accounts continues to improve.

SECTION VII.—RAILWAY.

EAST INDIAN RAILWAY.

REVENUE RETURNS.

No additional length was opened during 1866.

The accompanying table represents the working results of the Railway since the opening of the first portion in 1854, and shows how prosperous this great undertaking is now becoming :—

TABLE I.

YEAR.	Average Miles open.	Train Miles.	Earnings.		Expenses.		Profits.		PER MILE OPEN AVERAGE.			PER TRAIN MILE AVERAGE.			Percentage of profits on Capital expended.	Approximate Capital, ready earning traffic.	Rs.	Capital on which guaranteed is paid.	Rs.	Rate per cent. of profit.
			Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Earnings.	Expenses.	Profits.	Rs.	Rs.	Rs.						
1854...	38	93,230	53,005	35,275	2,454	1,596	928	62.0	0.5	72,25,602

Steam Ferry Accounts.

YEAR.			Earnings.	Expenses.	Deficit.	Profit.
			Rs.	Rs.	Rs.	Rs.
1857	49,559	55,472	5,913	
1858	17,674	52,223	34,549	
1859	31,276	67,614	36,338	
1860	25,052	58,347	33,305	
1861	59,261	60,626	1,366	
1862	54,799	59,786	4,987	
1863	29,682	77,626	47,944	
1864	80,311	90,396	10,085	
1865	1,95,222	1,30,227	64,995
1866	59,862	1,09,714	49,852	

For the year 1866 the average earnings per mile per week amounted to Rs. 374, or £34-6-7.

The total receipts amounted to Rs. 2,19,89,011, and, assuming the cost to have been to the beginning of 1866, £20,000 a mile, the profits which amounted to Rs. 1,32,60,564 suffice for a dividend of 5·4 per cent. on capital expended, or 4 per cent. in excess of the guarantee.

Passenger traffic yielded Rs. 55,23,983, or 26·4 per cent. of the entire traffic, and merchandize Rs. 1,54,11,903, or 73·6 per cent.

The earnings per train mile have slightly increased, while the expenses have slightly diminished.

TABLE II.

CLASSES.	NUMBER CONVEYED.			Increase in 1866.	Decrease in 1866.	Increase per cent.	Decrease per cent.	Average mileage 1866.	RECEIPTS.			Increase in 1866.	Decrease in 1866.	Increase per cent.	Decrease per cent.

Percentage of entire traffic	97·2	88·8	88·8	87·0	83·1	82·4
											55,23,983				

Table No. II. gives the details of the passenger traffic as compared with previous years ; it shews that in this branch of traffic the East Indian Railway, in common with the other Railways in Bengal, suffered from the distress prevailing in nearly all the districts of the Lower Provinces: the trifling increase in the receipts from the 1st class passenger traffic indicates an increase in the average distance travelled.

TABLE III.

Calcutta and Burdwan Section, 68 miles.	NUMBER CONVEYED.			Increase in 1866.	Decrease in 1866.	Increase per cent.	Decrease per cent.
	1864.	1865.	1866.				
First Class ...	13,872	23,506	12,398	...	11,108	...	47.1
Percentage of entire First Class traffic ...	45.9	60.6	33.2	...	5,740	...	10.1

Percentage of entire Second Class traffic ...	63.1	53.1	49.3	5,339
Intermediate Class ...	1,392,020	473,479	478,818
Percentage of entire Intermediate traffic ...		97.2	97.5	...	57,442	...	6.8
Third Class ...		842,616	785,175
Percentage of entire Third Class traffic ...	44.1	22.2	21.7

Table No. III. exhibits the working of the passenger traffic on the metropolitan section of the line, or between Calcutta and Burdwan, a distance of 68 miles. The only noticeable feature in this table is the fact that practically the whole of the Intermediate Class traffic is confined to this section of the line, and it is understood that, acting on this result, the Railway Company have ceased to attach this class of carriage to their through trains.

Table M. 1 in the Appendix exhibits the results of the goods traffic which are highly favorable ; for, while in quantity this traffic has increased 6.4 per cent, the receipts from it have increased 35.5 per cent.

The increase in receipts from up goods traffic notwithstanding the decrease in weight carried is due to a revision of the tariff.

A severe flood in July injured the bridges over the Copai and Buckessore Rivers, and totally swept away a small bridge near the Boddiah Station: the traffic was consequently interrupted, but owing to the strenuous exertions of the Engineers, passenger carriages were enabled to be passed over the line within seven days, and the line was completely re-opened for traffic in three weeks. Owing to the severe trial caused by this flood to many of the bridges, steps have been taken to render them more secure in future, and new bridges are in course of erection for the waters of the Copai and Buckessore Rivers.

With the exception of the above accident, the train service has been regularly worked throughout the year ; there was, however, a great want of punctuality, the percentage of late trains during the year having been 28.3, and the average detention of late trains two hours: during the 1st half of the current year there has been a most satisfactory improvement in this matter.

Further attention has been given towards the improvement of the accommodation for 3rd class passengers ; the carriages have been altered

and are now lighted at night. The lighting of the station platforms is also being gradually improved.

There have been very few accidents to trains during the year, and none of a serious nature; there have been a few cases of derailment of portions of trains by running over buffaloes straying on the line, but with no more serious effect than the damage of a few chairs, &c.

The introduction of coal fuel in the North-West has practically put an end to the numerous losses by fire. On one occasion, however, a third class carriage caught fire, and one man was killed and five injured.

CONSTRUCTION.

The works for the Chord Line between Seetarampore and Luckeeserai have been commenced, and arrangements have been made in England for the early supply of the Permanent Way materials required for doubling the line between Khanoo and Seetarampore, and between Luckeeserai and Allahabad. The large landing stages for Howrah and Armenian Ghâts are being put together, and the wells for carrying the shore ends of the connecting bridges are being sunk.

The new Over-bridge at Chandmaree was constructed during 1866; it has since been opened for traffic, and the old bridge is now in course of removal.

The Delhi Jumna Bridge was completed during the year under review, and the line was opened into Delhi on the 1st January 1867.

The works on the Jubbulpore Line were pressed forward with great energy, and that line has since been completed and opened for traffic.

EASTERN BENGAL RAILWAY.

REVENUE RETURNS.

The following table exhibits the general working results of this Railway since its first opening to the public in September 1862:—

TABLE I.

YEAR.	Miles open.	Train Miles.	Gross Earnings.	Expenses.	Profits.	PER MILE OPEN AVERAGE.			PER TRAIN MILE AVERAGE.			Percentage of working expenses.	Percentage of profits on Capital expended.	Total Expenditure per mile of Railway on construction.
						Earnings.	Expenses.	Profits.	Earnings.	Expenses.	Profits.			
From 29th Sept. to 31st Dec.	No.	No.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs. A.P.	Rs. A.P.	Rs. A.P.			Rs.
1862 ..	77½	81009	86,656	53,731	42,925	1,389	689	550	8 1 9	1 11 8	1 6 1	55.6	0.33	1,19,691
1863 ..	110	223317	8,32,022	4,03,381	4,28,541	7,572	3,667	3,905	3 11 8	1 12 9	1 14 10	48.4	3.06	1,27,510
1864 ..	110	262445	10,16,048	5,44,740	4,70,308	9,228	4,952	4,276	3 13 10	2 1 2	1 12 8	53.6	3.00	1,43,793
1865 ..	110	324612	13,51,425	6,01,987	6,89,438	12,285	6,018	6,267	4 2 7	2 0 7	2 2 0	48.9	4.10	1,53,029
1866 ..	110	325778	14,18,942	7,22,862	6,96,080	12,872	6,572	6,300	4 5 6	2 3 6	2 2 0	50.9	4.10	1,54,129

The result is on the whole satisfactory, although the development of traffic in the past year has not kept pace with preceding years. The traffic has steadily improved, and for the past two years the profits have nearly reached the guaranteed rate of interest.

The next table shews the result of the steamer working, and it will be seen that, as long as hired steamers were employed, a deficit resulted; while from the time the Company made arrangements for running steamers on its own account, a very satisfactory change has taken place, resulting in a profit of nearly Rupees 24,000 in eighteen months, exclusive of the contingent advantage to the Railway Company of the extra traffic brought on its Railway, and it is still more satisfactory to note that this result has continued during the first-half of 1867, the receipts being 47 per cent. in excess of those of the corresponding half of 1866.

TABLE II.

Steamer Results.

	Earnings.	Expenses.	Deficit.	Profit.
	Rs.	Rs.	Rs.	Rs.
CONTRACT STEAMERS.				
From February to December 1863 ...	46,737	79,858	33,121	
Half-year ending 30th June 1864 ...	1,552	8,276	6,724	
Steamer <i>Nepaul</i> from 5th April to 17th July 1865 ...	16,490	34,100	17,610	
COMPANY'S STEAMERS.				
From 10th July to 31st December 1865	37,570	41,048	3,478
For the year 1866 ...	1,27,391	1,06,848	20,543

During the year under review, the average earnings per mile per week have been £21-19-7.

Coaching yielded Rs. 6,53,558, or 45·9 per cent. of the entire traffic, and merchandize Rs. 7,69,036, or 54·1 per cent.

Table No. III. exhibits the passenger traffic of the whole year. As compared with previous years, there has been a slight increase in the number of first class passengers, but a decrease in that of all other classes, and the receipts from all shew a falling off. The fares in force throughout the year were—

1st Class	12 pie per mile.
2nd "	6 " "
3rd "	4½ " "
4th "	3 " "

TABLE III.

CLASSES.	NUMBER CONVEYED.			Increase in 1866.	Decrease in 1866.	Increase per cent.	Decrease per cent.	Average mileage 1866.	RECEIPTS.			Increase in 1866.	Decrease per cent.
	1864.	1865.	1866.						1864.	1865.	1866.		
First Class	41,588	41,983	46,706	4,723	...	11.2	...	16.3	Rs. 44,640	Rs. 47,755	Rs. 47,654	101	0.3
Percentage of entire traffic	3.0	3.5	4.1	6.7	6.9	7.3
Second Class	55,397	45,567	44,555	...	1,012	...	2.2	21.4	38,487	32,725	29,855	2,870	8.7
Percentage of entire traffic	4.9	3.8	3.9	5.8	4.7	4.6
Third Class	675,455	288,892	266,788	...	22,104	...	7.6	23.9	3,81,586	1,63,568	1,49,949	13,619	8.3
Percentage of entire traffic	58.7	24.1	23.1	56.9	23.4	22.9
Fourth Class	376,851	823,046	795,964	...	27,082	...	3.3	34.2	2,05,145	4,54,378	4,26,160	28,278	6.2
Percentage of entire traffic	32.8	68.6	68.9	30.6	65.0	65.2

Table No. IV. exhibits in detail the working of the Metropolitan section: this is taken to be from Calcutta to Kanchrapara, 28 miles, but practically it may be said only to extend as far as Nyehatteo (the Station for Chinsurah), a distance of 23 miles.

It will be seen that over 90 per cent. of the entire first class traffic of the line and 80 per cent. of the second is confined to this section, the entire increase noted in the previous table being due to this source. The general decrease of passenger traffic during 1866 was perhaps to be expected, and it may be considered as chiefly due to the impoverished state of the country, owing to indifferent harvests.

TABLE IV.

Calcutta and Kanchrapara Section, 28 miles.			NUMBER CONVEYED.			Increase in 1866.	Decrease in 1866.	Increase per cent.	Decrease per cent.
			1864.	1865.	1866.				
First Class	26,770	37,200	42,183	4,983	13.3	...
Percentage of entire First Class traffic	64.5	88.6	90.3
Second Class	43,116	36,025	35,942	83	...	0.2

Third Class	*164,389	181,750	167,898	13,852	...	7.6
Percentage of entire Third Class traffic	24.3	62.9	62.9
Fourth Class	334,439	392,576	391,105	1,471	...	0.3
Percentage of entire Fourth Class traffic	88.7	47.7	49.1

* From June.

Table M. 2 in the Appendix exhibits the merchandize traffic of the year as compared with previous years. The general progress of this branch of traffic in the face of the distress prevailing last year is highly satisfactory.

At the close of the year under review, the rolling-stock of the line consisted of—

Engines	28
Passenger Vehicles	102
Goods Vehicles	499

The additions during the year having been as follows:—

Engines	0
Passenger Carriages	0
Goods Wagons	150

The train service was maintained throughout the year with very commendable punctuality and with perfect security to the public; no accident of any kind having occurred to any passenger throughout the year.

The construction works in progress on the open line during the year were the Kanchrapara Workshops, which are still incomplete, having been delayed for the iron roofing ordered from England, a new tank and watering arrangements at Chooadangah, and some Goods Sheds at Gorai. Besides these the works for the Goalundo Extension line have been in progress.

No additional length of line was opened during the year, but a small station was opened at Joyrampore, between Chooadangah and Ramnugger, to accommodate some large neighbouring villages.

C. & S.-E. RAILWAY. . . .

28 Miles.

REVENUE RETURNS.

Table No. I. exhibits the earnings and expenses for each year since the opening of the line for traffic and the general working results:—

TABLE I.

YEAR.	Number of Miles open.	Train Miles.	Gross Earnings.	Expenses.	Deficit.	PER MILE OPEN AVERAGE.			PER TRAIN MILE AVERAGE.			Percentage of working expenses.
						Receipts.	Expenses.	Deficit.	Receipts.	Expenses.	Deficit.	
	No.	No.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs. A. P.	Rs. A. P.	Rs. A. P.	
1862..	15	18960	27,780	35,668	7,888	1,852	2,378	526	1 7 6	1 14 1	0 6 7	128.
1863...	23	31683	47,328	62,032	14,708	2,058	2,607	639	1 7 10	1 15 4	0 7 6	131.
1864...	28	48166	77,332	1,05,972	28,640	2,762	3,785	1,023	1 9 8	2 3 2	0 9 6	137.
1865...	28	62762	1,08,952	1,24,552	15,600	3,891	4,448	557	1 11 9	1 15 9	0 4 0	114.
1866...	28	59946	1,15,293	1,36,731	21,438	4,117	4,884	766	1 14 9	2 4 5	0 5 8	118.

Though the gross earnings have expanded slightly from year to year, this Railway has never at any period paid its expenses.

In the year 1864 the line being practically finished, the salaries of the bulk of the general establishments became a charge upon revenue, and the expenses consequently show an enormous increase. In the year 1865 a service of three trains each way daily was established, as the prospects of the Port consequent on the formation of the Port Canning Company apparently justified the measure, and the result was temporarily satisfactory. This service was continued during the year under review, but the expenses have increased in a higher ratio than the receipts, owing to a rise in the price of coal and from the maintenance of ballast being a revenue charge for the first time.

For the year under review.

The average earnings per mile of Railway per week
were only ... £7 5 0

Coaching yielded Rs. 82,935, or 71·9 per cent. of the entire traffic, and merchandize only Rs. 29,050, or 25·2 per cent: under such conditions it is obvious that this Railway cannot be remunerative; the latter ought properly to stand in the ratio of 2 to 1 to the former. The success of the Railway is therefore wholly dependent on the development of the trade of the Port.

Table No. II. exhibits the passenger traffic of the year as a whole in comparison with that of the previous years.

TABLE II.

CLASSES.	NUMBER CONVEYED.			Increase in 1866.	Decrease in 1866.	Increase per cent.	Decrease per cent.	Average mileage, 1866.	RECEIPTS.			Increase in 1866.	Decrease in 1866.	Increase per cent.	Decrease per cent.

The number of first class passengers has decreased, owing to the stagnation of business during the latter part of the year, but the receipts shew a small increase due to the abolition of the system of

reduced fares for double journey through tickets. This is a slight increase in the other classes.

The fares in force during the year under review were—

First Class	1 anna.
Second „	6 pie.
Third „	3 „

The intermediate or new third class, at 4½ pie, was taken off on 1st January 1866.

Table No. III. extracts the short or metropolitan traffic from the general returns, the fluctuations of which are governed by conditions wholly distinct.

TABLE III.

Calcutta and Chapahattee Section, 15 miles.	NUMBER CONVEYED.			Increase in 1866.	Decrease in 1866.	Increase per cent.	Decrease per cent.
	1864.	1865.	1866.				
First Class	576	641	384	257	40.1

Percentage of entire Third and Fourth Class traffic	76.	61.9	65.6				

It is satisfactory to find that the native traffic has not been prejudiced by the prevailing distress.

Table M. 3 in the Appendix exhibits the merchandize traffic of the year in comparison with the previous years.

The lamentable falling off in the prospects of the goods traffic is accounted for by the failure of the Company's large iron jetty at Canning in the month of April, and the alarm occasioned by the continued encroachments of the river on the Strand Road. The decrease in the weight carried was 182,387 maunds; but the receipts shew a slight increase over the previous year, due to the revision of the tariff at the commencement of the year under review.

At the close of the year under review the line was stocked as under :—

Locomotives	...	6
Passenger vehicles	...	46
Goods ditto	...	279
Total	...	<u>331</u>

The following additions have been made to the carrying stock during the year :—

Passenger vehicles	10
Goods ditto	106
Total	<u>116</u>

The train service was worked throughout the year with commendable punctuality and safety to the public; only one accident of a serious nature having occurred to a passenger, and this through his own want of caution, not from negligence on the part of any servant of the Railway Company.

The deep water jetty at Canning was very seriously injured in April; four of the large cylindrical piles carrying the northern end of the T head were undermined by the eddying action of the current and fell into the hole so formed: this was followed by a severe slip of the bank, which destroyed a number of the screw piles carrying the shore portion of the jetty. One of the steam cranes used on the pier head was lost, and the whole jetty rendered useless for some time. The remaining eight large cylinders carrying the rest of the T head had fortunately been carried deeper into the river bed than the four which failed, so they stood firm, and the slip of the bank having filled up the whole which had been scoured out, no further injury is anticipated, the shore portion of the jetty has been repaired with timber-piles, and the pier again rendered available for traffic.

The only important work of construction in progress was the large new goods warehouse at Sealdah, which was completed during the year: it is 560 feet long and calculated to hold 860 tons of goods.

The permanent arrangements of the Canning Terminus are in abeyance, as the progressive development of the traffic does not at present warrant any considerable expenditure at that Port.

INDIAN BRANCH RAILWAY.

REVENUE RETURNS.

The traffic receipts on this line have declined slightly during 1866. The table appended shews an abstract of the receipts for the year, which amount to a total of Rs. 51,863 against a total of Rs. 58,019 in 1865.

No accounts of working expenses are forwarded to this office, so no calculation of profits can be made. The earnings per train mile have been Rs. 2-8-9.

There has been some correspondence on the subject of the transfer of this line to the East Indian Railway Company, but that Company has declined to take it over, as it would require entire relaying before their rolling-stock could be used on it; at the same time an arrangement has been entered into by which the East Indian Railway Com-

pany's Station Master at Nulhattee is Manager of Indian Branch Railway Company's line.

The Government of India has been solicited to allow this line to continue working without insisting on the completion of the fencing, as the trains run only by day and at slow speed.

SECTION VIII.—MARINE.

THE strength of the Pilot Service, on the 31st of March last,

The Pilot Service.

Branch Pilots	12
Brevet Branch Pilots	7
Masters	36
Mates	21
Acting Junior Mates	8
Acting Second Senior Mate	1
Junior Second Mates	2
Volunteers	2
On active service	89
On leave	9
					98

is exhibited on the margin. The number in active service was 89, of whom 24 were on the salaried list, and 65 on the free list. Besides these there were 38 Pilots and 16 Leadsman on the licensed list, which makes up a total of 143 officers.

Several representations having been received from time to time from members of the Pilot Service complaining of their position, a Committee was appointed towards the close of the year for the purpose of considering the position and prospects of the service generally, and of reporting on the grievances of the various grades of officers composing it.

The want of a complete manual of the rules and standing orders relating to Pilots having been much felt, a code of revised rules was drawn up for their guidance and has been approved by Government.

The number of vessels which arrived at the port, and the number which left it during the year, together with the amount of their tonnage, have already been stated in the chapter on Customs. Of the ships inward-bound the number that used steam was 490, and of the vessels outward-bound 561; this being exclusive of 177 steamers inward and 191 steamers outward-bound.

The number of ships which grounded in the channels and in the river was 74 against 80 during the preceding year. Of these accidents two resulted in the total loss of the Ships *Jane Jack Mitchell* and *Statesman*. The first of these was laden with rice from Akyab and was bound to Falmouth, but had put back in consequence of having sprung a leak. In attempting to run into the Eastern Channel she struck on Saugor Sand on the 19th June 1866, and was so much injured that it was found necessary to abandon her. The second was a British Ship that arrived at the Sandheads on the 22nd October last, and on the 26th idem, in coming up by the Eastern Channel, struck the sand with her keel whilst her bow was in deeper water, sprung a leak, and, filling rapidly, went down. No lives were lost in either case. Both the cases were enquired into by Marine Committees, and the Pilots in charge were condemned and punished. In the great majority of the remaining cases no damage was caused to the vessels, but enquiries were made into those cases which seemed to require them, and the Pilots, where to blame, were reprimanded and admonished.

The number of collisions in Pilots' water was four against twelve in the preceding year. In two of these the Pilots were to blame, and were admonished and punished.

There was only one trial before the Marine Court during the year, viz., that of a Brevet Branch Pilot charged with having run aground the P. & O. Co.'s Mail Steamer *Nemesis* on the Long Sand in March 1866. The Court acquitted the Pilot, but the evidence in the case having established great negligence and inattention on his part, he was, under the orders of Government, restricted for a time to the pilotage of vessels not exceeding 1,000 tons and not carrying a large number of passengers.

A vacancy having occurred in the office of Judge of the Marine Court by the resignation of the last Judge, the opportunity was taken to bring to the notice of the Government of India the defects which have been found to exist in Act XII of 1859 (*an Act to make better provision for the trial of Pilots for breach of duty*) and to solicit the sanction of that Government to its amendment. The court constituted under the present law consists of a Judge aided by a Jury composed of two merchants, a master of a merchant ship lying in the port, and a Pilot of not less than twenty years' service, and theoretically appears well adapted for the trial of cases coming before it; but the practical result was considered to have been in many instances a failure of justice, the Pilots tried for breach of duty having escaped the punishment due to them. It was therefore proposed by this Government that Act XII of 1859 should be repealed, and a new law be enacted to empower the Government to summon, when necessary, a Committee of enquiry to investigate into charges of breach of duty by Pilots, the final decision in each case being left with the Government, aided by the advice of the head of the Marine Department. This proposal, however, was not agreed to by the Chamber of Commerce; and the Government of India, in deference to their opinion, has suggested that, before introducing such a radical change, an endeavour should first be made to improve the working of the court as now constituted, by some alteration of the present rule for nominating the Jury and by a careful selection of a Judge. The subject was under consideration at the close of the year.

The report of the River Surveyor shewed that the state of the river was altogether not so satisfactory as in the preceding year. There had been no particular change between Saugor and the sea on the one hand, and the James and Mary and Calcutta on the other. But Lloyd's Channel remained closed and was dry in some parts in low water; the anchorage at Kedgeree was deteriorating; and in Bedford's Channel a dangerous lump was formed, which, after having shifted its position several times, finally joined itself to the land on the western side of the channel. The Auckland Channel was also reported to have shifted to the southward, but was improving; the Rungafullah had been fluctuating as usual; and the James and Mary was even more shallow than during the previous year.

All the channels were frequently and carefully examined; the Bedford Channel was dredged to keep the passage open; the buoys of the Auckland Channel were moved and re-placed as required by the shifting of the channel; the Western Channel and Reef-head passage were re-surveyed and buoyed off; and the river marks and tidal semaphores were everywhere repaired and put in order. To facilitate the import of rice into Orissa the Hidgellee river was also surveyed and the channel thence to Balasore, along the coast between the Braces, re-examined and buoyed off. The Damrah river in the Balasore District and the False Point anchorage in Cuttack were likewise surveyed and buoyed off, and beacons erected and put in good order.

The Pilot, Light, Surveying, and Buoy Vessels were all in good order

at the close of year, with the exception
of one Pilot Brig which was undergoing
repairs. A new Pilot Brig had also been
requirements of the port. The Steamer
unseaworthy, had been re-placed by a
The Steam Dredge *Agitator* was also
completed, and besides being employed
in dredging, was, with the *Celerity* and
the *Undaunted*, actively engaged in tow-
ing ships carrying stores to the coast of
Orissa. The Government vessels, includ-
ing the sea-going vessels of the Bengal
Marine, which were most actively engaged
in the conveyance of rice to Orissa, are
given in the margin.

All the three Light Houses at False Point, Saugor, and Cowcolly

Light Houses and Houses of Refuge.

were examined and reported to be in ex-
cellent order. The Houses of Refuge on
the sea-face of the Soonderbuns were also visited during the year, and it
was found that the stores placed in them for the use of shipwrecked
people had been more or less plundered by marauders, who appeared
to have become acquainted with the localities. This was first reported by
the pilot and crew of the ship *Jane Jack Mitchell*, who, after the wreck of
that vessel on Saugor Sand, succeeded in reaching the House of Refuge
on Bulcherry Island, but found there neither provisions nor water, and
suffered much distress in consequence. The houses were subsequently
again placed in complete order and filled with supplies, and arrangements
have been made for their occasional inspection both by the officers of the
Marine Department and the Police of the 24-Pergunnahs.

The number of collisions between ships under charge of the Harbour
Master which were of sufficient conse-

Port of Calcutta—Accidents in the
Port.

quence to need enquiry was seven, in one of
which the officer concerned was suspended
for six months ; in five others the officers in charge were similarly punished
for shorter periods, and in one reprimanded. There were three other cases
of shipwreck in the port in which the officers of the Harbour Master's Department
were not concerned, *viz.*, of the *Ali Akbar*

Loss of the *Ali Akbar Shaw*, and the
Ferry Steamers *Calcutta* and *Howrah*.

Shaw, and of the Railway Ferry Steamers *Calcutta* and *Howrah*. The
first of these vessels was hauled out of dock on the 5th October last, and
sunk very suddenly on the 7th on the edge of the Ghosery Sand ; the
only probable cause for the accident being that she had started a butt,
filled, and gone down. The case of the other vessels was as follows.
The *Calcutta*, was returning on the evening of New Year's day
with passengers from the Fancy Fair held at the Botanical Gardens,
when, getting out of the channel, she came into contact with a
buoy which had been placed over the wreck of the Steamer *Satellite*
which was sunk during the Cyclone of 1864. She was so injured that
she at once began to sink. Fortunately she was in shallow water, and
assistance was promptly rendered from the shipping in the vicinity

and by the native boats in the river; but, owing to a panic among the passengers, several persons jumped into the river, and one of the boats crowded with passengers was also upset, which led to a lamentable loss of some ten lives. In the meantime the Steamer *Howrah* having heard of the accident immediately proceeded to render assistance, and, approaching the locality without sufficient caution, also struck on the same shoal and foundered. Both of these vessels, however, were subsequently safely floated and recovered. As the commander of the *Calcutta*, Captain Taylor, was represented to have been under the influence of liquor when she struck, he was tried by the High Court for culpable homicide not amounting to murder, but was acquitted in consequence of the insufficiency of the evidence brought against him. He was afterwards again arrested and tried in the Police Court under Section 280 of the Penal Code (which relates to rash navigation), and was convicted and sentenced to rigorous imprisonment for three months.

The number of vessels hauled in and out of moorings in the port during the year was 2,021, the number hauled in and out of dock 332, and the number removed from one place to another in the port 1,714.

The number of fixed moorings in the port on the 31st of March was 183, six of which were laid down during the year, *viz.*, three off the Esplanade, one off the East Indian Railway wharf, one above the Armenian Ghaut, and one below Fort Point. The number of swinging moorings at the close of the year was 11. The total number of moorings available was therefore 194; but by placing ships between the fixed moorings 230 vessels could be accommodated on an emergency.

The circumstances under which screw moorings were imported for the use of this port were noticed in detail in the reports for the preceding two years.

Of the 100 screw moorings received from Europe 50 have been already screwed down into an average depth of 14 feet, and it was expected at the close of the year that the remaining number would be in the ground within a short time. The whole of the moorings off the Esplanade are now screws, and the largest ships in the port have been moored to them and have experienced some heavy squalls without the slightest effect on the moorings. This success has induced the Marine Authorities to propose that a further supply of 100 screw moorings on an improved design should be obtained from England for the purposes of this port; but the Secretary of State having intermediately ordered the suspension of the screw mooring operations, under an impression that they have not been attended with much success, it has been found necessary to make a reference on the subject to the Government of India, explaining the actual state of things and asking for permission to continue the prosecution of the work to completion; and the question of extending the operation in the manner proposed by the Marine Authorities has necessarily been held in abeyance till the permission applied for has been obtained.

The number of vessels registered under the Merchant Shipping Act of 1854 and under Act X of 1841 was 21, of bills of sale registered 27, of mortgages

Registration of vessels, &c.

27, and of discharged and transferred mortgages 9 and 5 respectively. There were also 56 changes of masters registered during the year; 5 vessels were recorded as lost, broken up, or sold to foreigners; and one sailing pass was granted.

The number of seamen of all nations shipped through the Shipping Office was 17,667 against 18,643, which represents eleven-twelfths of the number shipped in the preceding year, giving a decrease of 981 men. Of the total number shipped 3,723 were British seamen, while the number of British seamen discharged was 3,218, the result being a reduction in the number of idle sailors in port by 505.

The total number of seamen discharged during the year was 14,525 against 14,942, (being eleven-twelfths of the number discharged in 1865-66,) the result shewing a decrease of 417 men, which was attributable to the falling off in the number of ships arriving at the port during the year.

The number of ships that had recourse to the office was 595 against 629 last year.

The total receipts of the office amounted to Rs. 19,729-14 and the total expenditure to Rs. 19,409-12-8, which left a surplus of Rs. 320-1-4. But the expenditure shown does not include several items properly debitable against the office, and the working of the office was therefore not actually profitable.

The number of seamen who deserted during the year was 127 against 93 during eleven months of last year, giving an increase of 34 deserters.

During the year under review the Consul-General of the United States of America submitted for the consideration of Government the following two suggestions, which he said would have the effect of considerably checking the desertion, illegal discharge, and consequent abandonment and destitution of seamen in the Port of Calcutta, *viz.*, (1) that deserters from foreign ships should not be shipped on British vessels by the Government Shipping Master, and (2) that all foreign vessels, previous to the allotment of a Pilot for enabling them to clear out, should be required to produce a certificate from their respective Consuls setting forth the number of seamen dying, deserted, discharged, and shipped thereon in the port, with their nationality. The first of these suggestions was not acceded to, as there is nothing in the law as it stands at present to warrant the Shipping Master in refusing to register the shipment on a fresh vessel of a seaman who had deserted from a foreign vessel. In regard to the second, the opinion of the Advocate-General was to the effect that, while on the one hand it was not competent to the Government to refuse port clearance to a vessel proceeding to sea without a consular certificate, it was on the other not binding on the Government to supply the vessel with a Pilot unless it pleased to do so; and, as a matter of courtesy to the United States Government, and for the purpose of maintaining proper order in the port, the practice hitherto observed has been upheld, and a rule ordered to be laid down that, so far as American vessels are concerned, no Pilot is to be supplied to them until

Suggestions of the American Consul-General for checking the desertion, &c., of seamen in the Port.

the consular certificate is produced. The fairness of the decision was subsequently questioned by the Agents of the American Ship *Timour*, but the view taken by this Government has been confirmed by the Government of India.

The instructions issued for a strict adherence to the rules of the Merchant Shipping Acts in regard to the discharge of seamen were noticed in last year's report, the view taken of the question by Government being that a sufficient discretion was vested by law in the Shipping Master to withhold sanction to the discharge of seamen except where proper provision was made for their re-shipment, or for their expenses being paid so long as they remained without employment in the port, and that no further special provision on the subject was necessary. The result of the exercise of this discretion on the part of the Shipping Master has been to relieve the port of the great evil of having a large number of unemployed seamen residing in the lowest quarters of the town to their own demoralization and the disquiet of the town; but the question as to his right to use such discretion has been since re-opened by a decision of the High Court in the case of certain seamen of the Ship *Milton*, by which his right to withhold the discharge certificate when the seamen on the one hand and the commander of the vessel on the other had mutually agreed on the point, was set aside as being opposed alike to the Merchant Shipping Acts and to the rules issued on the subject by the Board of Trade. As this decision was likely to have the effect of inundating the town with hundreds of idle and dissipated seamen who would remain till their wages were expended and would then have to be shipped as distressed seamen at the expense of Government, as had to be done two years ago, the Government of India were asked to move the Board of Trade to have the Merchant Shipping Act expressly amended, so that provisions similar to those in regard to the discharge of seamen in foreign ports may be made applicable to seamen discharged within Her Majesty's dominions beyond the seas. Since then a Bill has been introduced in the Council of the Governor-General for making Laws and Regulations, to consolidate and amend the law relating to merchant ships, seamen, and passengers by sea generally; but it has not been considered necessary to make any provisions in this on the point referred to the Board of Trade, or to anticipate the action which may be taken by them in the matter.

In noticing the foundering of the *Southern Cross* it was stated in last year's report that the Master Attendant had been asked to prepare a port regulation for enforcing the maintenance of a sufficient crew on board of every vessel in port to ensure proper care being taken of her; and also to consolidate all the existing port rules into one code. In respect to the first matter it has been since proposed that, as the law for the regulation of ports (Act XXII of 1855) does not contain any sufficient provision on the subject, it should be amended, so as to provide for the maintenance of a sufficient crew on board of every vessel for its protection, and also for the efficient use of the force pumps required to be kept on

Proposed amendment of Act XXII of 1855 and consolidation of the Port Rules.

board for the purpose of extinguishing any fire that may arise. As regards the second matter, a consolidated code of rules has been prepared by the Master Attendant, but, as it contains several modifications of old rules and additions made from time to time by the Marine Department, which have not received the sanction of Government in every case, the entire code has been submitted for the confirmation of the Government of India under Section 7 of Act XXII of 1855.

The passing of Act X (B. C.) of 1866, (*an Act for the improvement of the Port of Calcutta*) was noticed in last year's report. During the year under review a Committee of the Justices of the Town of Calcutta has been appointed under Section 4 of the Act for administering the powers and trusts vested in the whole body of the Justices by the law, and a partial scheme for carrying out the objects of the trust has been approved by Government. It has been also proposed to make over to the Justices, in trust for the town and port, the right and interest of Government in the Strand Bank between Chandpaul Ghaut and the Circular Canal Lock, but the terms on which the transfer is to be made have not yet been mutually agreed upon. The suggestion of Government on this point at first was that such portion of the Strand Bank as was required for the purposes of the River Trust Act should be made over to the Committee appointed for carrying them out, and the remainder be held by the Justices at large for general purposes of the Municipality. But this not having been agreed to by the Committee appointed under the Act, it has been since proposed that the balance at credit of the Strand Bank Fund should be retained by Government, and the Strand Bank be transferred to the Justices at a quit rent, the money thus obtained being formed into a fund for meeting the charges hitherto defrayed from the Strand Bank Fund. This proposition and the amount of contribution to be received from the Committee on account of the Strand Bank lands were under consideration at the close of the year. *

The passing of Act III (B. C.) of 1865 (*an Act to make better provision for the prevention of injury from fire in ports, &c.*) was noticed in the report for 1864-65. The provisions of the Act have since been extended to the Port of Calcutta by a notification dated 7th July 1867.

The liabilities of the Calcutta Port Fund were enquired into during the year by a Committee specially appointed for that purpose, the result being that the fund was pronounced to be largely indebted to Government on the 1st of May 1864. As it had, however, no means to re-pay this debt it was decided by the Government of India that the account should be adjusted by transferring 4 lakhs of Rupees from the cash balance of the fund as it stood on the 30th of April 1864 to the credit of Government in clearance of all claims; and certain alterations in the method of keeping the accounts for the future were also at the same time laid down. Instructions have accordingly been issued for the preparation of the accounts in future in the manner prescribed by the Government of India.

the high price of grain imported for the consumption of laborers in the colony ; and secondly, to the depressed state of the agricultural prospects of the island in consequence of a recent severe drought. For these reasons emigration on account of the Government has been temporarily suspended. A number of old emigrants, however, have been returning to the island at their own expense, paying their own passage ; a fact that speaks very favorably for the general condition and prospects of laborers in that colony.

The proportion of female to male emigrants embarked is represented by the figures in the margin, and has been much larger even than in the preceding year, owing, doubtless, to the same cause as before, *viz.* the scarcity of food in the recruiting districts, which has compelled whole families to emigrate for their livelihood.

The total number of emigrants returned from Mauritius during the year was 2,047, and from Réunion 278. No emigrants returned from the West Indies during the same period.

The death-rate among emigrants during transit to Mauritius was 0·62 per cent. That among emigrants sent to the West Indies had not been accurately ascertained at the close of the year, owing to the returns for the entire season not having then been received. But it is to be feared that it was very high.

The death-rate among emigrants returning from Mauritius was 1·02 per cent., and from Réunion 0·71 per cent.

The system hitherto followed in the measurement of ships licensed to carry emigrants to the colonies having been found to be wrong, and it being imperatively necessary that each emigrant should actually receive the space allotted to him by law which the plan in question did not ensure to him, it has been ordered during the year that every vessel offered for the conveyance of emigrants shall be measured by Sterling's rule as approved by Her Majesty's Commissioners of Customs, which gives an extremely close approximation to the exact superficial contents of a ship's deck.

At the suggestion of the Government of Mauritius an amended rule has been substituted for Section 39 of the rules relating to emigration under Section 63 of Act XIII of 1864, with a view to obviate the imperfection of the medical histories kept of the voyage of emigrant ships.

The report of the Sanitary Commission on the excessive mortality on board emigrant ships despatched to British Guiana during 1864-65, and the suggestions made for preventing similar disasters in future, were noticed in last year's report. These suggestions were still under the consideration of Government at the close of the

Amendment of Section 39 of the Emigration Rules.

Additional Emigration Rules sanctioned during the year.

year, in connection with the amendment of Act XIII of 1864. In the meantime, in compliance with the recommendation of the commission, a new rule has been laid down which provides that, whenever the weather will admit of it, one-third of the emigrants on board shall always be on deck under the awning, and another, that it shall be the duty of the Protector of Emigrants to see that the clothes of all intending emigrants are carefully disinfected previous to embarkation.

A bill of Exchange on London having been sent by way of remittance by an emigrant from St. Croix to a relative in Benares, the question of devising a simpler system of remittances

New arrangements for the transmission of coolie savings to India.

was considered by Government, and a proposal was submitted to the Government of India to adopt the plan already introduced in Mauritius for remitting such savings, *viz.*, by the grant of money orders payable in Calcutta, with a suggestion that the Government would provide for their further transmission to the interior of the country, provided the Colonial and Danish Governments agreed to bear the risk of adverse exchanges between the colonies and Calcutta, and undertake to make the payments in Calcutta at a uniform rate according to the currency of the colony, as was done in the case of Mauritius. This arrangement has since been authorized by the Secretary of State in communication with the Colonial Office; and it has been further directed that the plan should be made applicable to remittances of their savings made by emigrants when returning to India.

With a view to ensure a correct and complete registry of the particulars necessary for the identification of emigrants

Steps taken for ensuring a precise registration of emigrants.

and the discovery of their heirs in case of death, increased care and accuracy have been enjoined in the original registration of emigrants by the local Magistrates, and two columns added to the form of register now in use to indicate the occupation of the emigrant and the name of his next of kin. A copy of this register is to be forwarded to the Protector and Emigration Agent, who will thus be enabled to prepare the lists required by law.

The statement below exhibits the number of coolies of both sexes despatched to Assam, Cachar, and Sylhet during the year ending the 31st March last, together with the mortality and desertion among them during the voyage,

Emigration to Assam, Cachar, and Sylhet.

Number of coolies despatched.

and the percentage of females to males embarked :—

PROVINCE OR DISTRICT.	NUMBER OF COOLIES EMBARKED.						Total.	Percentage of females to males.	Mortality during the voyage.	Number of coolies absconded.	Percentage of deaths during the voyage.
	Men.	Women.	Boys.	Girls.	INFANTS.						
					Male.	Female.					
Assam	4,531	2,063	518	418	233	135	7,901	47.40	198	4	2.49
Cachar	1,925	1,397	266	260	188	179	4,212	73.72	54	3	1.27
Sylhet	185	131	19	19	5	15	374	72.23
Total	6,644	3,591	802	697	424	329	12,487	55.91	252	7	2.1

The total number of coolies sent during the year was 12,497 against 44,582 sent during the preceding year, which shews a decrease of 32,095 in the number despatched. The demand for labor during the months from June to December was exceedingly limited as compared with that of other years, but during the three closing months of the year it had again considerably increased, and had in fact attained the average of the three preceding years.

The total number of coolies received at the dépôt in Calcutta was				13,540, of whom 11,734 were
Number of coolies received at the dépôt in Calcutta, &c.				despatched to the tea districts, and the remaining 1,806 are
accounted for in the manner noted on the margin.				The total number
Remaining in the dépôts at the end of the year	550	of contractors during the year

Died in the dépôts	228	ceding year, and the number
Absconded from dépôts	483	of recruiters employed by them
„ Kooshtea, &c.	310	388 against 1,250.
				1,806

The mortality among the coolies in transit was 2.1 per cent., against 4.66 of the preceding year, and 3.01 of the year before. This satisfactory result is to be attributed to the batches of coolies despatched during the year under review, being much smaller than those sent in previous years when the demand for labor was so much heavier.

During the year under review a Committee was appointed to enquire into the causes of mortality amongst the laborers sent to the tea districts, both while on their passage thither and after their arrival at their destination; and they were requested to conduct their investigation in communication with the Landholders' and Commercial Association, the several Protectors and Medical Inspectors of Laborers, the Superintendents of Labor Transport, and all persons interested in or well acquainted with the system of labor transport in the tea districts who might wish to offer any observations on the subject. The Deputy Commissioner and Civil Surgeon of Nowgong were further directed to institute, in conjunction with Dr. J. Meredith, a full enquiry on the subject in Assam, and to furnish the Committee with every information that they might ask for. The report of the Committee was submitted on the 20th March last. It states at the outset that the evidence before the Committee did not confirm the notion entertained by the tea planters that the mortality amongst the laborers on their passage to the tea districts has been aggravated by the provisions made for their health and comfort, and that the regulations laid down by Government have failed in diminishing the death-rate. It then notices the points in which, in the opinion of the Committee, the system of labor transport now in force is still defective, and the changes which they would wish to recommend. The more prominent of the evils pointed out are the harassment and delay

experienced by the coolie from the time of recruitment to his transport to the Calcutta depôt, the delay in registration, the inconveniences experienced by him during his journey to Kooshtea in the ordinary trains, and during his prolonged detention there caused frequently by the steamer not having completed the taking in of cargo, the frequent congregation of large numbers of coolies on board of steamers and flats, the defect in the sanitary arrangements on board in certain respects, and the faulty system under which provisions are supplied to vessels. Suggestions are made for obviating these evils. The report was under consideration at the close of the year.

While the enquiry by the above Committee was being carried on two despatches were received from the Secretary of State suggesting the propriety of making a searching enquiry into the entire question of labor transport, with a view to correct the abuses which had crept into the system ; and, with reference to this order, it was proposed by this Government that a mixed commission should be appointed, composed of a member of the Civil Service, a representative of the tea interest, and a medical officer, who should visit the tea districts and take evidence both in Calcutta and the interior on every point connected with the condition of the tea districts and the tea trade ; but the Government of India has preferred to postpone the appointment of such a commission until November next, when the commission, if its appointment should be decided on, would have greater facilities for reaching such districts and places as it may be necessary for them to visit.

Information having been received in March 1866, that cholera had broken out violently in the districts of the Chota Nagpore Division and in Midnapore, the recruiting operations in those districts were suspended for three months by public notification ; and it having been since recommended that the recruitment of hill-men should be annually suspended for certain months of the year, a clause was inserted in the new Labor Transport Bill which had been introduced in the Lieutenant-Governor's Council for making Laws and Regulations, in order to give legal authority to the Government to prohibit emigration, partially or temporarily.

Some cases of flogging laborers in the Assam Company's Tea Gardens at Cherajoolie, in Zillah Durrung, in Assam, which occurred in 1865-66, were judicially investigated and reported upon during the year under review. At the investigation it was established against one Richard Edwin Dunn, an assistant in the service of the Assam Company, that he was in the habit of flogging coolies for short work and for absconding, for which offence, in the instances proved against him, he was fined. Besides this, in one case in which a lad died 26 hours after being flogged, Dunn was convicted of having caused "hurt," and sentenced to one year's rigorous imprisonment, and to a fine of 500 Rs. In this case the jury, who were all planters, made a presentation to the Judicial Commissioner to the effect that many of the plantations in Assam

Suspension of recruiting operations in Midnapore and Chota Nagpore.

The Cherajoolie flogging case, and measures taken in connection therewith.

being from 20 to 40 miles distant from the nearest court of justice, the employers of labor had great difficulty in having recourse to legal means for enforcing the fulfilment of the agreements made with them, and to prevent heavy loss to themselves, were often tempted to take the law into their hands; and to obviate this difficulty they proposed the appointment of a sufficient number of Magistrates, stipendiary or honorary, within accessible distances from the plantations, for the disposal of such cases. In furtherance of this object the Protector of Laborers in Upper Assam has been invested with Magisterial powers for the adjudication of disputes between planters and laborers, and an additional Assistant Commissioner has been appointed and placed in charge of a sub-division with head-quarters at Bishnath; but it has not been considered expedient as a rule to appoint managers of tea plantations to be Honorary Magistrates. The question of still further increasing the efficiency of the civil administration in Assam by the introduction of a scheme of sub-divisions with head-quarters in the vicinity of tea plantations was under the consideration of Government at the close of the year, and the establishment of a number of new sub-divisions has since been sanctioned.

The Acts regulating the transport of native laborers to the districts of Assam, Cachar, and Sylhet, and their employment there, having been the subject

Proposed amendment of the Labor Contract Laws.

of much observation and comment, and various proposals having been laid before the Government with the view on the one hand of making the contract lighter to the laborer, and on the other hand of relieving the employer of labor from some of the burthens that previous legislation had laid upon him, but which had, it was asserted, proved to be too heavy, a Bill was introduced, towards the close of the year, in the Council of the Lieutenant-Governor for making Laws and Regulations, to amend Acts III of 1863 and VI of 1865, and to consolidate all the provisions of the law on the subject into one code.

Towards the close of the year a memorial was presented to the

Mr. Morice's Memorandum on tea planting in Assam.

Governor General by a deputation of the proprietors of the tea estates in Eastern Bengal, in which, after referring to the depreciation of their interests, they proposed the repeal of Acts III of 1863 and VI of 1865, which they asserted had operated adversely in respect to them, and also suggested the adoption of other measures as being necessary in the interests of justice, good government, and sanitation. A copy of this memorial and of the reply of His Excellency thereto, together with a copy of a memorandum on the subject of tea planting in Assam drawn up by Mr. Morice, who was deputed by the Government of Ceylon to visit the tea districts in India, was forwarded to this Government by the Government of India, with a request that the remedial measures proposed by Mr. Morice might be considered and reported upon, and such changes or modifications of the present practice adopted as could be carried out by the local Government under the laws now in force. The suggestions of Mr. Morice were under consideration at the close of the year, in communication with the Superintendent of Labor Transport and the Landholders' and Commercial Association.

MEDICAL.

The number of in-patients treated in the medical, surgical, and midwifery wards of the Medical College Hospital during the year 1866 was 5,654, against 5,477 treated during the preceding year; 2,171 were Christians and 3,483 were non-Christians and natives of this country.

The annexed statement shews the general mortality amongst the

Class of Disease.	Total number treated.	Total number of deaths.	Percentage of deaths to total number treated.

* YEAR.	Total number treated.	Total number of deaths.	Percentage of deaths to number treated.
1853	2,976	310	10·71
1854	3,252	500	15·37
1855	3,664	748	20·24
1856	4,319	810	19·24
1857	3,181	709	22·28
1858	2,286	556	24·32
1859	2,331	615	27·63
1860	2,663	601	22·42
1861	2,461	611	26·01
1862	2,414	684	28·33
1863	2,937	784	26·78
1864	3,012	910	30·00
1865	2,980	894	29·90
13 years	33,511	8,861	23·01

patients was 30·86, against 29·90 of the preceding year, while the average for the last thirteen years was 23·01.

Amongst both classes of patients, Christian and native, by far the largest portion of the mortality was caused by a few diseases chiefly of the Zymotic class, *viz.*, malarious fevers, diarrhoea, dysentery, and cholera, all of which are endemic in Bengal, but which do not usually swell the mortuary lists of the hospitals in Europe. The number of moribund cases brought to the Medical College Hospital has also always been very large, and was particularly so during the past year in consequence of the famine.

The figures given above include 641 cases of women and children treated in the midwifery ward against 599 treated in 1865; the number of confinements was 174 against 129. The total number of deaths in this ward was 67 against 49 in 1865, and of these the number of deaths in child-birth was 18, *viz.*, 2 amongst the Christian patients and 16 amongst the native patients.

In the surgical ward the number of important operations performed during the year was 161 against 166 in the preceding year, the number of deaths being 40 against 42 in 1865. The total number of patients cured in this ward was 77, relieved 11, unrelieved 13, and under treatment at the close of the year 20.

In addition to the 5,654 in-patients above enumerated, 530 in-patients, were treated in the Eye Infirmary against 526 treated during the preceding year; and of these 222 were restored to a perfect degree of sight and 180 partially relieved.

The statistics of out-door relief shew that the number of patients treated in the medical and surgical out-door dispensaries for male patients was 22,749 against 15,654 of 1865; in the out-door dispensary for women and children 8,975 against 6,957; in the Dental dispensary 1,236 against 2,600; and in the out-door dispensary attached to the Eye Infirmary 2,932 against 3,337. The following statement exhibits in a condensed form

the entire amount of relief (in-door and out-door) afforded by the Medical College Hospital during the year under review :— •

				7,525

The staff of nurses attached to the Medical College Hospital has heretofore been provided by the Hospital Nurse Institution which has received from Government an annual grant of Rs. 2,400. The Committee of the institution having since applied for an increased grant, the question was considered whether it would not be a better arrangement to bring a number of trained nurses on the regular staff of the Medical College Hospital to be employed and paid for by Government instead of leaving their supply to the resources of a charitable institution ; and this having been preferred by both the authorities of the Medical College Hospital and the Principal Inspector-General of the Medical Department, a scheme was submitted to the Government of India for the employment of a staff of 13 nurses graduated in classes from Rs. 25 a month to Rs. 80, the promotion from a lower to a higher grade being confined to those only who should be found really intelligent and trustworthy. The Principal of the Medical College proposed that the selection of the nurses should be mainly confined to East Indian widows, and wives deserted by their husbands, but it appeared to this Government that, for many reasons, the wives of soldiers were entitled to have a preference of selection ; and to make sure

that none but really fit persons should be selected, it was suggested that the candidates should be examined and reported on by a Committee consisting of the Commanding Officer of the Regiment, the Deputy Inspector-General of Hospitals of the Circle, and the Magistrate of the district in which the regiment is stationed. Since the close of the year, however, the Government of India has decided to allow the existing arrangement to continue, raising the contribution of Government to Rs. 8,400 per annum on condition that the Committee supply nurses as required to the hospital.

The number of persons treated in the Calcutta Native Hospital during 1866 is noted on the margin, and compared with the number treated in the preceding year. The increase in the number of in-door patients was 441, and in the number of out-door patients 10,894, which was doubtless mainly owing to the influx of immigrants from the famine districts.

	1865.	1866.
Number of in-door patients ...	1,316	1,757
" out-door " ...	163,700	174,594

Relieved ...	2	6
Died ...	24	27

necessary in 24 cases.

of which the results are shewn on the margin. The total number of fracture cases was 257, of which 14 terminated fatally, while amputation was found

	Total No. treated.	Daily average.
Park Street Dispensary ...	86,489	236
Gurambhatta ditto ...	90,404	248
Chitpore ditto ...	93,240	230

The marginal figures shew the number of persons treated in the branch dispensaries in Calcutta, with the daily average of sick in each.

The aggregate income of the Native Hospital for the year was Rs. 53,850-8-10, and its total expenditure Rs. 47,611-0-6, which left a balance of Rs. 6,239-8-4 at the close of the year.

Calcutta Pauper and Police Hospitals.

* Number remaining on the 31st December 1865	172
Admitted during the year 1866	...	3,772	3,944
Discharged cured	...	1,756	
Died	...	1,355	
Transferred to Famine Relief Hospitals.	...	657	
Transferred to Dullunda Lunatic Asylum	...	99	
		3,887	
Remaining under treatment at the close of the year	...	77	3,944

The number of persons treated in the Calcutta Pauper Hospital during 1866, and the result of their treatment, is shewn on the margin. Both the admissions and deaths were unusually large, owing to the famine prevailing through many months of the year. The following figures shew the periods after admission at which death took place:—

Deaths within 24 hours after admission into the hospital	...	198	
Ditto one week	ditto	...	703
Ditto one month	ditto	...	337
Ditto three months	ditto	...	117
			<hr/> 1,355

The prevailing diseases were, as usual, chronic dysentery, fever, and cholera.

Number remaining on the 31st December 1865	...	88
Admitted during the year 1866	...	2,109
		2,197
Discharged cured	...	1,980
Died	...	89
		2,069
Remaining under treatment at the close of the year...	...	128
		2,197

The results of the year in the Police Hospital are also noted on the margin, and shew that of 2,197 persons under treatment 1,980 were cured.

The figures below exhibit a comparison of results in the Police and Pauper Hospitals between 1865 and 1866:—

	1865.	1866.		
	Pauper and Police Hospitals.	Pauper Hospital.	Police Hospital.	Total.
Total under treatment	4,207	3,044	2,197	6,141
Discharged cured	2,362	1,756	1,980	3,736
Died	1,465	1,355	89	1,444
Transferred to other establishments	120	756	756

The difference of the classes which were treated in the two hospitals accounts for the remarkable difference in the proportion of patients who are shewn as discharged cured.

The proportion of deaths in 1866 was, it will be seen, much less than in the preceding year.

Besides the Police Pauper Hospital above alluded to temporary Pauper Hospitals were opened during the year at the places named in the margin, in connection with the measures adopted for the relief of the poor in Calcutta and its vicinity, when the influx of immigrants from the famine districts had considerably augmented their number. All these hospitals were maintained at the cost

Temporary Pauper Hospitals.

of the Relief Fund, (except the establishment employed at the Amherst Street Hospital), and, when the Famine Committee was dissolved, a sum of Rs. 50,000 was placed at the disposal of the Commissioner of Police with a view to the institutions being maintained so long as they might be required. The number of these hospitals remaining open on the 31st December last, with the number of patients in each on that date, was as under—

Sealdah	Hospital	372
Amherst Street	,,	118
Alipore	,,	103

On the 1st of March following the only temporary hospital still open was that at Sealdah having 350 patients; and it being no longer necessary to maintain a separate establishment for these, it was ordered that they should be transferred to the Government Pauper Hospital.

It was agreed that the cost and control of the Pauper Hospital should be transferred to the Justices of the Town, and for this purpose a Bill was introduced in the Council of the Lieutenant-Governor for making Laws and Regulations, empowering Municipalities to assign from the Municipal Funds such contributions as may be required for charitable and other purposes, there being no authority to do so under the existing law.

Great inconvenience having been felt from the present location of the Police and Pauper Hospitals, it was proposed to Government that the sick poor should be permanently accommodated in the building originally intended for the Sealdah market, and that the Amherst Street Hospital should be made available exclusively for the sick police, the building at Entally now occupied by the Pauper Hospital being appropriated for cases of cholera and other infectious diseases. This proposition was under consideration at the close of the year, and has since been adopted.

The intention of establishing river-side dispensaries was alluded to in last year's report in connection with the measures proposed by the Sanitary Commission for Bengal for improving the condition of European sailors in the port of Calcutta. The scheme as originally proposed comprised the establishment of two dispensaries—one near Prinsep's Ghaut as an out ward of the General Hospital, and the other higher up the river to the north of Coilah Ghaut as an out ward of the Medical College Hospital, each with an apothecary attached to it and supplied with the usual remedies for arresting the effects of cholera and other epidemics. It was suggested that a hulk placed in a central position in the port would be

River-side Dispensaries.

more convenient to the shipping as the site of one dispensary, and that, should another be necessary in addition to the hulk, a room in the new Sailors' Home might appropriately be made use of for that purpose. A plan was also proposed to meet from the Port Fund the expenses incurred for the diet and treatment of seamen received into these institutions, the outlay being recovered if necessary by the levy of a moderate tax on the shipping. No final orders had been passed on these points at the close of the year; but since its close the latter suggestions have been abandoned as objectionable, and it has been determined to erect one river-side dispensary or temporary hospital.

During the year under review a report was for the first time received on the management of the Government Charitable Hospitals and Dispensaries. In this report, which is for 1865, the several institutions in Bengal are classified as being of three sorts, *viz.*, (1st) dispensaries of many years' standing which are more or less endowed by individual charity or by the contributions of communities and to which the Government has been in the habit of contributing largely by a monthly allowance, as well as by the payment of the medical subordinate and hospital servants of every kind, and by the grant of a supply of European medicines; (2nd) those institutions of more recent date to which the Government contributes the pay of the sub-assistant surgeon or native doctor, and also grants a supply of European medicines and surgical instruments, on the condition of their being in a great measure self-supporting, and of their representing, in proportion to the pecuniary support from the public funds afforded to them, the wants of the people and the value put upon the benefits offered by them to the public; and (3rd) those institutions which are supported entirely, or almost entirely, by some wealthy landlord, who undertakes to provide the hospital building and pay all expenses, the Government granting only a supply of medicines and instruments, except in particular instances where a native doctor is also appointed and paid for by the State. Besides these institutions the native doctor at every sub-division where subscriptions amounting to Rs. 15 can be collected, is allowed to set up a small dispensary, and is supplied with European medicines; and, in times of epidemic sickness, additional native doctors supplied with medicines are also distributed throughout the country suffering from the epidemic, to afford relief, forming in well-selected spots so many small dispensaries for the occasion.

Since the close of the year a second report has been received which is for 1866, and the Statement N. 1 in the Appendix taken from it shews the number of patients treated in each dispensary during the year, its income and expenditure, the cost incurred for each institution by Government, and the amount expended in the dieting of house patients. The aggregate results are noted on the margin for easier reference. The total number of

Number of patients treated during 1866	...	3,04,702		
		Rs.	As.	P.
Income of the dispensaries from all sources	...	3,23,906	12	7
Expenditure of 1866, excluding cost to Government of European medicines	...	2,33,778	3	8
Cost to Government for salaries and special allowances	...	1,08,280	15	5
Cost to Government of European medicines supplied free of charge	...	7,187	3	1
Amount spent in dieting sick patients	...	38,587	1	6

dispensaries in existence at the close of the year was 112, of which 39 were set up or recorded during the year. Returns have been received from 103 of these institutions, 32 of which were presided over by sub-assistant surgeons, 31 by native doctors under the superintendence of civil surgeons, while the remaining 40 were in charge of native doctors only. To most of these dispensaries the salary of the presiding medical officer, together with the cost of European medicines and instruments, is paid by the Government, and to many of them much more is granted in the shape of monthly donations or payments for the whole hospital establishment.

Taking the total number of patients treated in all these dispensaries at 100, the percentage of the different kinds of diseases among the in-door and out-door patients, respectively, may be shewn as under :—

	Among In-door Patients.	Among Out-door Patients.

The percentage of mortality to total treated among the in-door patients was 29.42.

The total number of patients treated in the Asylum for European lunatics at Bhowanipore during the year 1866 was 75. Of these 11 were cured and discharged, 28 sent to Europe in an improved condition as ordinary invalids, one sent to Europe as not improved, 6 died, and 29 were still under treatment at the end of the year. To these figures, which simply give the result of the year's operation, a short account of the institution from the period when its management was first undertaken by Government may perhaps be here appropriately added, no such account of it having been given in any previous report.

Up to the year 1855 the Asylum was in private hands, lunatics in the public service being admitted into it under the order of certain officers, and their maintenance charged to the Government. Towards the close of that year the premises occupied by the Asylum were purchased by Government, and the institution was placed under an official Medical Superintendent, Dr. Cantor, who worked under the immediate orders of the Medical Board, and afterwards of the Director-General, Medical Department. A subordinate establishment was appointed at the same time, and certain rates of payment fixed for the maintenance of private individuals and pauper lunatics. A code of Asylum rules was also issued by Government, and a board of official visitors nominated.

During the successive years from 1857 to 1866 the statistics of the institution have been as follows :—

YEAR.			Number of patients remaining at the close of the previous year.	Number of patients admitted during the year.	Total number of patients treated.	Ratio per cent. of cures and transfers.	Ratio per cent. of deaths.
1857	62	33	95	13.68	4.21
1858	51	53	104	13.16	7.69
1859	66	78	144	17.36	2.08
1860	66	76	142	11.97	3.52
1861	67	51	118	8.47	4.23
1862	68	45	113	15.0	4.3
1863	63	47	110	9.0	2.72
1864	41	39	80	26.25	1.25
1865	34	49	83	61.44	2.41
1866	30	45	75	57.79	8.23

The feature most remarkable in the above figures is the gradual decrease from 1859 in the number of patients admitted into the Asylum ; and this is due to several causes. A majority of the patients received are soldiers from the regiments serving in the Bengal Presidency, and the admission has necessarily been affected, as the number of these regiments retained in the Lower Provinces has fallen off. The practice of despatching invalids from the Punjaub *via* Bombay to Europe has also told in the same direction ; but the most efficient cause of reduction has been that, in consequence of the introduction of a system noticed

below, many harmless imbeciles and others, for whom no special provision is needed, are now sent home with the invalids of the season without making their appearance in the Asylum at all.

It will next be observed that from the year 1864 there has been a sudden rise in the ratio per cent of "cures and transfers." The increase shewn is, however, not real. Up to the year 1863 all insane soldiers who embarked for England were entered as "not cured," but about this time those who had so far recovered as to be quiet and tractable and fit to be removed as ordinary invalids were for convenience transferred to the dépôt hospital at Kidderpore, and appearing in the Asylum returns under the head of "transfers" swelled the proportion of these considerably. This proportion, however, is reckoned on a total which embraces so large a number of cases chronic on admission that it is of no value as an index of the general curability of insanity in this country.

The rate of mortality in the Asylum has been low throughout. It is a rare thing to have a case of sickness among its inmates; and a comparison of one year with another, as given in the above table, is of little interest or importance where the range of variation is so small. The somewhat higher rate of 1866 was due to the death of two very aged persons and the admission of two in an advanced state of physical disease.

Among the causes of insanity in 1866 intemperance was assigned in 11 instances, hereditary predisposition in 6, and sunstroke and climatic disorders in 11, other causes appearing in scattered instances only. It is doubtful in many of these cases if the intemperance which is stated to be the cause is not rather the first symptom of the patient's insanity.

In the year 1860 the attention of the Superintendent of the Asylum, Dr. Payne, was directed to the method of despatching lunatics to Europe, which had been previously conducted at very extravagant cost. The cases required to be despatched to Europe embraced every variety of insanity in the institution, from the violent dangerous maniac to the harmless imbecile, and for all these the same heavy rates of passage money and gratuity had heretofore been paid by the State. An arrangement has since been made for the removal as ordinary invalids of a large number of insane soldiers certified by the Superintendent to be fit subjects for such treatment, and this has of course materially decreased the cost of their transmission.

During the last two years a change has also been made in the manner of invaliding insane soldiers; and the process is now completed before they reach the Presidency, whereas it was formerly done by a board assembled at Calcutta. The result has been that many soldiers, who would under the old system have been received for a time into the Asylum, are now sent direct to England with the invalids of the season from the dépôt.

The effect on the expenses of the Asylum of the altered method of treating soldiers and of the reduction of its permanent inmates is shewn in the figures noted on the margin.				
Total expenses in	Rs.	
"	...	1860-61	44,414	
"	...	1861-62	43,978	
"	...	1862-63	40,691	
"	...	1863-64	29,325	
"	...	1864-65	29,930	
"	...	1865-66	22,817	

From the details above given it will be seen that the statistics of the Bhowanipore Asylum have little medical value and do not at all represent accurately the statistics of insanity among Europeans and Eurasians in the Bengal Presidency. So large is the proportion of soldiers among the admissions that other classes of Europeans are by comparison scarcely represented, while the occasional admission of Eurasians at long intervals cannot for a moment be supposed to represent the extent of the prevalence of insanity among that class. It would be useless, therefore, to attempt to infer the distribution of insanity among the several classes of the community from which the cases come. Even the general prevalence of it among all classes in the aggregate cannot be determined, since many insane soldiers are sent to England direct from the regiments, and among private families it is a prime object to avoid the stigma of admission to an Asylum and to ship their insane members to England with the greatest possible secrecy.

The remedial effect of treatment is equally without illustration in the Asylum. Acute cases admitted from the neighbourhood are very few, and they shew as elsewhere a high proportion of recoveries; but the chronic cases which have almost entire possession of the place are, from their nature, unadapted for successful treatment within its walls, and find a hopeful prospect only in speedy removal.

Several attempts were made when the inmates of the Asylum were numerous to provide them with employment, and a certain degree of success was attained. At present newspapers and books are liberally supplied, musical instruments provided when any one skilled in their use is admitted, and the flower garden affords pastime to such as are industriously inclined. But the condition of the institution renders the introduction of anything like an industrial system in it impossible.

Notwithstanding the above drawbacks, however, which prevent the institution from contributing much to the progress of psychological medicine in India, it has fully answered its main purpose and the requirements of Government, and is of the greatest advantage to the sufferers who are received in it.

The rules of the Bhowanipore Lunatic Asylum do not authorize the removal to Europe of any lunatic not of European birth, but the practice observed since 1863 was to send to Europe all lunatics of European and mixed parentage, whether born in Europe or in this country, on the grounds of economy, (the expense of maintaining lunatics in England being said to be less than that of maintaining them in this country,) and of the increased probability of recovery from climatic change. This course has, however, since been disallowed by the Secretary of State; and orders have therefore been issued that for the future no insane patients but such as are of European birth are, under any circumstances, to be sent to Europe.

The above return shews that the percentage of cures and transfers in 1866 was lower than in the preceding year, while the percentage of mortality was considerably higher. The aggregate deaths were 145 in number, of which 66 occurred in Dullunda. In all places the high rate of mortality was assigned mainly to the want of such ample space and ventilation as is required for the attainment of better results. But as the quantity of space was the same as in the preceding year, and the number of patients treated was smaller, this cause does not satisfactorily account for the increased mortality which has occurred. Many of the deaths were caused by cholera, diarrhoea, and dysentery.

The annexed return shews the number of admissions and re-admis-

sions during the year in the several Asylums distinguishing the patients according to their creed. The total number of criminal lunatics admitted for the first time was 17, of whom 14 were admitted into the Dacca Asylum, and 3 into the Cuttack Asylum.

The daily average strength of patients treated in all the Asylums was 607. Of the total number treated 327 were laboring under acute mania, 316 under chronic mania, and 210 under dementia. In 55 per cent. of the cases of which any early history was ascertainable, the assigned cause of insanity was the use of ganjah.

A Comparative Statement (N. 2) in the Appendix shews the number

Vaccination Return for 1866.

compared with the preceding year.

	Total Number vaccinated in 1865.	Total Number vaccinated in 1866.
Presidency Division ...	94,408	128,702
Barrackpore, Dacca, and Singapore Divisions...	57,691	66,051
	<u>152,099</u>	<u>194,753</u>

was 66,051, of which 54,346 were successful.

(N. 2) in the Appendix shews the number of persons vaccinated in the Lower Provinces during the year 1866 as compared with the preceding year. The increase in the number of vaccinations was 42,651, of which 34,294 were due entirely to increased activity in Calcutta and its Suburbs. The total number of cases in the Presidency Division was 128,702, of which 110,183 are reported as having been successful in their results. In the other divisions the total number of cases

The notification of the 18th June 1866 prohibiting inoculation in certain towns and places in the Mofussil, and the measures taken in connection with it, were noticed in last year's report.

Arrangements for extending the operations of the Vaccine Department.

Since then a scheme of new and more extended arrangements for carrying out vaccinating operations both in Calcutta and in the Mofussil has been submitted for the consideration of the Government of India; the main feature of which is an increase in the number of vaccinators in Calcutta from 20 to 60, and in the Mofussil from 76 to 151,

inclusive of the Darjeeling Circle which is being worked under a Special Superintendent.

Apart from the above scheme the Civil Surgeon of Kishnaghur has been authorized to employ experimentally the old inoculators as vaccinators in the town of Kishnaghur, as it is hoped that this will have the double effect of checking inoculation and extending vaccination. These vaccinators are to be paid at the rate of one anna per head for every successful case brought under their treatment.

In the district of Singbhoom also, in which certain villages were for a time suffering from an epidemic of small-pox, the Brahmin inoculators have been induced to take up the work of vaccination. But here it was proposed to pay them at the rates ordinarily allowed to Government Vaccinators, which has been sanctioned as a temporary measure, a report having been at the same time asked for on the question whether it would not be better to introduce in it the Nuddca system of paying a fixed sum for every successful case.

The establishment of the Darjeeling Vaccine Circle and the general scheme on which it was based were noticed in last year's report. The attention of Government was again drawn during the year under review to the inadequacy of the existing protection afforded by the State against small-pox in Bengal, and to its prevalence during the year in an epidemic form in Chota Nagpore, Beerbhoom, Midnapore, and Pooree, and a proposition was submitted by the Principal Inspector-General of the Medical Department for the establishment of a new Vaccine Superintendency with head-quarters at Ranchee. The scheme now recommended was, however, in some respects different from that in accordance with which the Darjeeling Circle had been established, the main feature of the latter being that vaccination should commence within such limits as might make it possible to render the protection complete, and that every one should be vaccinated within those limits, while the main characteristic of the plan proposed by Dr. Green was that the circle should be movable, that is to say, ready to detach columns to operate in its most distant points, say in Orissa or the 24-Pergunnahs, simultaneously with the work going on at Ranchee. The scheme has been submitted for the sanction of the Government of India, but with the remark that, in the first instance, the proposal to detach parties from the central staff to work simultaneously in distant parts should be kept in abeyance, and that the operations of the Superintendent and his subordinates should be confined under ordinary circumstances to steady progress within fixed limits to be laid down hereafter on the principle of the scheme being approved by the Government of India.

The Darjeeling Vaccine Circle came into full operation during the

year, and the annexed return shews the aggregate results attained in each district up to the close of the year. Considerable difficulty was at first experienced in organizing the operating staff and in instructing its members in the proper performance of their duties, and also in overcoming the prejudices of the people arising from their ignorance of vaccination and its prophylactic virtues. The operations, however, were fairly commenced by the month of November, and the results of each successive month are noted on the margin. The cost of the 9,988 successful cases was very little in excess of eight annas for each. The lymph supplied from Calcutta, as well as that obtained from England, was sound; and operations were also carried on by crusts taken from the healthy vesicles thus originally produced. The gradual progress made in each district is shewn in the statement annexed.

The small-pox epidemic in Pooree having, as stated above, assumed

Small-pox at Pooree.

a very virulent and fatal form, a notification was issued in January last to warn intending pilgrims to Juggernath of the danger which they would incur in visiting that place during the prevalence of the disease. The employment of additional vaccinators at Pooree was at the same time authorized, and as there were not even any inoculators in the district, instructions were given for hiring men from Midnapore and other places and sending them down to Pooree for the purpose of employing them as vaccinators. An extra Brahmin Vaccinator was also specially enlisted for the purpose of inducing the higher classes of Hindus in Pooree to adopt vaccination in their families, but, the success of this

experiment was little. The disease began to decline in Pooree after January last, but was still raging severely in Cuttack and Balasore at the close of the year.

The question of improving the position and allowances of native doctors has been under the consideration of the Government of India in connection with the entire question of the revision of Medical salaries. During the year under review it was brought to the notice of that Government that considerable difficulty was experienced in obtaining the number of native doctors required for employment in jails and in meeting the requirements of the public service generally, and it was proposed that in anticipation of a decision of the general question of raising their salaries, the following concessions should be made to them, (1st) that an allowance of Rs. 2 per mensem should be given to each of the different grades of native doctors when on duty in the field, whether in civil or military employ; (2nd) that compensation for dearness of provisions should be given to all classes alike in situations where any one of them, as in the case of military native doctors, would be entitled to it; (3rd) that where certain fixed salaries are attached to appointments those salaries should be given to the officers holding the posts, irrespective of any consideration as to the grade to which they belong, provided those selected for these posts are approved men; and (4th) that Rs. 5 a month for knowledge of English up to the required standard be equally given to all classes or grades. The Government of India consented to these propositions, which were being carried out at the close of the year.

Ditto of the Road Department	...	4,09,335	13	6
Ditto for keeping up the Water Engine and watering the streets	...	70,785	6	4
		12,63,138	12	9
Surplus	...	6,17,895	8	5

during the year 1866 was Rs. 18,71,034-5-2, while the total amount expended during the same period was Rs. 12,53,138-12-9, which left a surplus of Rs. 6,17,895-8-5, as noted on the margin. From this surplus, however, Rs. 51,349 had to be set apart for the payment of interest due in 1866 to the holders of the Municipal Loan, but which had not been drawn within the year, and Rs. 3,38,016 were required for the completion of works commenced in previous years, so that the net balance available in 1867 was Rs. 2,28,530.

The figures given above do not include the lighting, drainage, and water-supply accounts, which are kept separate from the General Fund. The lighting rate collections during the year amounted to Rs. 1,64,405-3-5, while the expenditure was Rs. 1,94,536-7-4. The expenditure on account of Drainage Works was Rs. 10,74,112-13-11; and for carrying out the water-supply scheme Rs. 1,84,540-0-2. A loan of Rs. 10,00,000 was opened by the Justices during the year, of which Rs. 8,60,000. was actually raised within the year. This, with the sale proceeds of spare lands belonging to the Justices, and the balance in favor of the loan account at the close of the preceding year, gave a total of Rs. 16,78,845-7-3; of which Rs. 10,00,000 was allotted to the Drainage Department, Rs. 2,06,435-8-3 to the extension of the Nimtollah Road, and Rs. 2,88,117-10-6 to other improvements, leaving a balance of Rs. 1,84,292-4-6, which, with the Rs. 1,40,000 due on account of the loan of 1866, was available for the completion of other works already in progress at the close of the year.

The receipts from house rate amounted, as shewn above, to Rs. 9,32,087-15-10, and the receipts from lighting rate to Rs. 1,64,405-3-5.

House Assessment.

A portion of the town was re-assessed during the year, and the result has been an increase of Rs. 29,245-11-6 to the house rate and of Rs. 5,891-8-6 to the lighting rate, the increase being partly owing to a general rise in the value of landed property and in the rental of houses, and also to the former valuation having been low. It was expected that the re-assessment of the whole town would be completed during 1867.

Licenses for Trades and Professions.

Joint-Stock Companies	118
Merchants, Agents, and wholesale dealers	52
Bankers and Shroffs	9
Banians	65
Miscellaneous dealers	157
Brokers	164
Members of the Legal Profession	151
Medical Practitioners and Apothecaries	104
Engineers and Architects	10
Auctioneers	13
Miscellaneous traders, 3rd class	2,075
Pawn Brokers	156
Retail dealers, 4th class	6,080
" 5th "	8,927
Itinerant dealers	5,458

The actual receipts from licenses in 1866 amounted to Rs. 2,31,515-9-6, and the annexed table exhibits the number of licenses taken out for the different trades and professions followed in Calcutta.

The proceeds of the carriage and horse tax were Rs. 94,301-6-0, but it was believed that the tax was evaded by many persons. Arrangements have therefore been since made for preventing this as far as practicable, and it was confidently expected that the income from this

Carriage and Horse Licenses.

4 Wheeled Carriages of all sorts	...	6,434
2 ditto ditto	...	808
Horses	...	7,283
Race Horses	...	5
Ponies	...	2,008

source would be considerably increased. The licenses taken out during the year were for the number of carriages and horses stated on the margin.

The following important city improvements were either commenced or carried out during the year.

City Improvements.

The extension of the Nimtollah Street from its junction with Chitpore Road to the Circular Road having been determined, the whole of the land required for the new road was taken up, and considerable progress made in clearing away the buildings and filling up the tanks along the line.

The extension of Clive Row, which was noticed in last year's report, was completed; and the remaining improvements in Moorgeehatta Street and Aloo godown Street were also finished.

Improvements were also effected in Bentinck Street, in Old China Bazar Street, and in a lane running off from Jaun Bazar Street; and the lane known as Huree Mistry's Lane was considerably widened.

The construction of the slaughter-houses referred to in last year's report was carried on, and they were expected to be completed before the close of 1867; the alterations required for improving the Nimtollah Burning Ghât were completed, and the ghât considerably enlarged; the line of Municipal Railway from Bang Bazar Ghât to Theatre Road along the Circular Road was also nearly completed; and footpaths were constructed in some of the principal streets in the Southern Division of the town.

The conversion of brick into stone roads has been carried on gradually for the past three years, and during the year under review 88 roads, aggregating in length over 13 miles, which were formerly constructed of brick metal, were metalled with stone, and new layers of stone given to two roads formerly constructed of that material. 82,000 cubic feet of retaining walls, 45,000 cubic feet of surface brick drains, and 227 cross drains were also constructed.

Repair of roads.

In the Drainage Department the Lower Circular Road Sewer was completed, with the exception of 56 lineal feet; the Upper Circular Road intercepting Sewer completed, with the exception of 76 lineal feet, and the High Level Sewer completed, with the exception of 178 feet; the portions remaining unfinished having been purposely left in that condition pending the completion of other works. The arterial sewers in Park Street, Camac Street, and Hungerford Street were also pushed on with vigor. The silt pits were also completed, with the exception of a portion of the arching at the lower end, which was purposely left unfinished until the foundations of the engine and boiler house, which were in progress, had been built. The house of the Superintendent of the pumping station was completed; and the tank dug for supplying the boilers with water was deepened.

Drainage Works.

The total number of gas lights in the town at the end of 1865 was 1,523 and 330 additional gas lamps were put up during the year under review, bringing up the total number of gas lamps to 1,853. The number of oil lamps at the end of the year was 561.

Lighting of the Town.

In the Conservancy Department, the chief improvements consisted

Conservancy Improvements.

in the adoption of closed vessels for the removal of night-soil in lieu of the objectionable open baskets formerly used for the purpose; in the construction of public latrines at the expense of the Municipality, 8 of which were completed, 4 of them being let out before the close of the year; and in the excavation of drains. Great attention was also paid to the improvement of the public markets, and the provisions of Section 37 of Act VI of 1866 for improving the paths and approaches to markets were enforced with marked advantage.

The water-supply scheme has been fully noticed in the reports for previous years. A contract having

Water-supply scheme.

since been completed with Messrs. Brassey, Wythes, Aird, and Sons for the construction of the works at an estimated cost of 52 lacs of Rupees, the contractors have sent out an Agent who was actively engaged at the close of the year in carrying out the works; and it is expected that they will be completed within three years, in accordance with the terms of the contract. The only important modification in the original scheme made during the year consisted in the abandonment of the use of Spencer's magnetic carbide in the filter beds at Phulta, the use of charcoal having been preferred as being less expensive, and also because the purifying effect of charcoal did not appear to be inferior to that of magnetic carbide.

During the year under review arrangements have been made for raising the funds required for the

Provision of funds for the drainage and water-supply works in Calcutta.

execution of the drainage and water-supply works in the town. For the first purpose the Municipality have been empowered to raise a loan of 10 lacs of rupees, their power to borrow on the security of the rates and taxes of the town being at the same time restricted to a total amount of 55 lacs of rupees, in order that the value of the security offered to debenture holders may not be diminished by excessive borrowing. The amount required to be raised for the water-supply works was 52 lacs of rupees, and this it was found impossible for the corporation to obtain without the support of Government. Accordingly Government was asked to guarantee a loan to that amount. The question was submitted to the Government of India, which decided on borrowing the money itself and lending it to the corporation in three yearly instalments, carrying interest at 6 per cent. Out of this 6 per cent. 4 per cent., with one per cent. from the Imperial Funds, will go to pay the interest on the loan raised by Government, and the remaining 2 per cent. will be invested as a sinking fund for the redemption of the principal sum.

The Registrar of passenger boats having suggested the expediency

Proposal for the regulation of passenger boats in the Port of Calcutta.

of bringing the manjees of those boats under control, in the same manner as other classes of public carriers, the Legislative Department was requested to introduce some specific provisions in the new Police Act, (which was still under the consideration of the Council of the Lieutenant-Governor for making

Laws and Regulations at the close of the year,) to the effect proposed by the Commissioner of Police, *viz.*, that no boat plying within the Port of Calcutta shall move at night without shewing a good light, that every boat manjee shall be annually registered, that the provisions of the Hackney Carriage Act (No. V of 1866) shall be extended to the manjees as far as they are applicable, and that the scale of fares shall be regulated by time as well as by distance.

The statement on the margin gives the number of births and deaths in Calcutta during the year

	Births.		Deaths.	
	Males.	Females.	Males.	Females.
Christians	345	337	728	346
Hindus	1,610	1,503	8,081	4,982
Mahomedans	602	561	3,898	2,219
Jews	1	3	2	...
Chinese	2	6	26	1
Parsees
Total	2,560	2,410	12,735	7,548
Grand Total	4,970		20,283	

as far as they could be ascertained by the Justices. The statistics of death were believed to be tolerably accurate; but those regarding births are obviously not at all to be relied upon.

The difficulties in procuring information on this head from the native population are extreme.

At the request of the Municipal Commissioners of Howrah, the

Extension of the operation of Act V of 1857 to Howrah.

operation of Act V of 1857 (*an Act to confer certain powers on the Oriental Gas Company, Limited*) has

been extended to that station from the 1st of April 1867. The contract to be entered into with the Gas Company was still under consideration at the close of the year.

MILITARY.

The Special Committee assembled at Simla, which was referred to

Rules for the sanitary administration of Military Cantonments.

in last year's report, compiled a uniform code of rules, under Clauses 4 to 6 and 8 to 11 of Section 19 of Act XXII of

1864, for the sanitary administration of all Military Cantonments; and the Government of India having confirmed this code, it was determined to introduce it into every Military Cantonment in Bengal, and the rules came into operation from the 1st of May 1867.

The rules adopted under Clause 2, Section 19 of Act XXII of 1864, for the prevention of venereal

Measures taken for the prevention of venereal diseases in Military Cantonments.

diseases in Military Cantonments in Bengal, were noticed in last year's

report. The limits of the different cantonments within which they are to be enforced have since been specified and laid down. Some supplementary rules for the control of brothels and the registry of prostitutes, which have been already adopted in the cantonments in Oude, were under consideration at the close of the year.

The rules laid down by this Government for regulating the supply

Revision of the rules for regulating the supply of carriage for troops.

of carriage for troops were noticed in last year's report. These rules differed from those laid down by the Government

of the North-Western Provinces in that they provided special

charges for halts, return hire, and demurrage. The Commander-in-Chief having urged the expediency of observing uniformity of practice in the North-Western Provinces and Bengal the rules promulgated by this Government are, at the desire of the Government of India, being revised for the purpose of assimilating them to the rules in force in the North-Western Provinces.

The transfer of the civil station of the Cossyah and Jynteah Hills from Cherra Poonjee to Shillong was noticed in last year's report. It having been since determined to remove the Military Cantonment also to that place the ground reserved for the cantonment has been made over to the Military authorities, and the limits of the cantonment ordered to be defined.

The dissolution of the Cachar Mounted Volunteer Corps was reported to Government during the year, and the necessary instructions have been issued for the return into store of all arms and accoutrements issued to the corps on its formation. The volunteer movement was also apparently dying out in Sebsagur and Debrooghur, owing, it was believed, to the recent failures in tea, and the question of sending up Drill Instructors for the corps which was being organized there has therefore been held in abeyance for the present.

POSTAL ARRANGEMENTS.

The re-organization of the postal establishments in Assam was noticed in last year's report. The Post-Master General of Bengal being about to visit the districts of Maldah, Dinagore, and Rungpore during the year under review, has been asked to extend his tour also to Assam, with a view to examine the working of the new arrangements in that province so far as they have yet been carried out, to ascertain the requirements of each particular locality, and to place the establishments everywhere on an efficient footing and under proper supervision. The opportunity will also be taken for transferring where necessary the duty of supervising the carrying establishments from the Post Office authorities to the Deputy Commissioners. Arrangements have further been made during the year for the conveyance of mail packets on the downward trip by steamers from Debrooghur and other stations in Assam where the steamers touch.

During the year under review a bullock train has been organized for Military purposes on the Darjeeling Road from Caragolah to Punkabaree; and endeavours were being made at the close of the year to establish a horse carriage dak on the line for the conveyance of travellers. A Municipal Transit Agency has at the same time been established from Punkabaree to Darjeeling.

The district postal system was noticed at some length in the reports for the preceding two years, and it was stated last year that, in the absence of any special arrangement for

Steps taken towards the removal of the Military Cantonment from Cherra Poonjee to Shillong.

Dissolution of Volunteer Corps.

Postal arrangements in Assam.

Measures taken for the conveyance of passengers and goods on the Darjeeling Road.

Delivery fee levied by the district post.

the delivery of private letters, the practice followed was to make over the letters for delivery to the village watchmen, when their duties brought them to the police stations. As some remuneration for this extra service, and also as a security for the delivery of the letters entrusted to them, the persons thus employed have heretofore been permitted to levy on their own account a fee of one pice per letter. Objection was raised to this by the Government of the North-Western Provinces during the year under review, and the question was reconsidered.

• The preponderance of opinion among the local officers in the Lower Provinces was that the fee should be retained and properly authorized in every case where the letters were delivered by the chowkeydars, it being left optional with the large villages or circles of villages to make their own arrangements for the delivery of their letters should they prefer to do so ; and this was concurred in by this Government. The question of sanctioning this by legislation was under consideration at the close of the year.

FORESTS.

During the year under review the work of the Forest Department was almost entirely confined to the Sikhim Division—operations carried on during the year. In this division, in which great progress was made in all forest operations, and much experience and local knowledge gained by the officers of the Department. The difficulty experienced in the preceding year in procuring labour was almost entirely overcome, and it was found possible even to reduce the wages of coolies from Rs. 6-8 to Rs. 6 a month.

The preservation of the forests was successfully carried out throughout the division, and more especially in the temperate forests, in which there were no serious cases of the destruction of timber. In the Terai the Mechis are in the habit of clearing away sal forests for the cultivation of cotton, &c., instead of weeding out the joom lands covered with low useless jungle which require greater labour to clear. The most strenuous efforts were made to put a stop to this practice within the boundaries of the reserved forests, and it has been suggested that every endeavour should be made to induce the Mechis everywhere to recultivate the patches of land which they have once brought into cultivation, and have abandoned on the soil becoming temporarily exhausted, instead of cutting down forests of valuable timber.

For some years a trade in canes has been carried on in this division, which gave rise to a needless waste in the cutting of canes that threatened to exterminate at least one species of it, *viz.*, the *Calamus Montanis Mihi*. This cane grows at an elevation of from 4,000 to 6,000 feet above the sea, and climbs to the extent of 200 or 300 feet over trees. The root and 3 or 4 feet of the stem of this species are cut for walking-sticks, and the rest, 100 feet or more, has hitherto been left to wither on the trees, at the same time that other cutters were engaged in cutting the slender stems of other canes for bridges and ropes. To prevent

this waste at both ends, a system of licenses for cutting canes has been introduced, the object of which is to limit the number to be cut for 'walking-sticks, and to induce the same cutters to remove the long stems hitherto abandoned and sell them for ropes. In the Terai *Calamus, Jenkinsianus* (Griff) yields a good cane, which has also been heedlessly cut away, to prevent which the consumption of this species likewise has been brought under control. Licenses are also granted for the collection of wax and lac.

To preserve the forests from fire a strip of jungle was cut down early in the season along the side of the forest road at the foot of the hills, and this has had the effect of diminishing the number of fires which passed through the forests annually in March and April.

For the demarcation of the reserved forests, a number of boundary pillars have been erected in the Terai in places where natural boundaries do not exist; the compilation of a forest map has been commenced; and many of the forest reserves in the Terai have been marked on the Revenue Survey Map of the district. A considerable extent of the lower limit of the temperate reserved forests has further been defined by the Revenue Surveyor during the year. The district officers, however, report that the present definition of boundaries is far too vague and comprises a vast quantity of arable land which should not be included within the reserved limits.

In the temperate forests 39,240 cubic feet of oak timber and 4,850 feet of magnolia have been converted into logs for the use of the Public Works Department, and 56,000 shingles have been prepared in the forest below Sinchal for the same purpose. In the Terai 3,009 first class logs of sal have been felled, prepared, and brought out under contract, 4,500 sal sleepers have also been prepared in the forests of the lower hills, and the greater part of them removed to the Silligoree depôt. A number of canoe-cutters having been secured, several large canoes have been made of sal, cotton tree, and toon, for the purposes of the Forest Department. These canoes are in great demand in the district, and the trees suitable for them are sold standing at Rs. 10 each.

The forests of the Bootan Division were brought under the control of the Conservator during the year. The method of working these forests, as followed by the Bootan Government, was to lease large tracts to the zemindars, who sublet the right of cutting timber to timber merchants, without any restriction as to the kind of timber to be cut down. The damage sustained by the forests has necessarily been very great. This method has been discontinued, and the sale of trees above a fixed girth introduced in substitution of it. The first sale on this plan realized Rs. 9,200, the right of felling timber being extended to the end of the working season.

AGRICULTURE.

The table below exhibits the results of tea cultivation in the districts of Assam in 1866, so far as they have been reported; but the statistics furnished are as incomplete as those given in preceding years and useless for the purposes of comparison. In the absence of a systematic co-operation on the part of the planters, it is impossible either to reconcile or account for these discrepancies. Many of the tea estates have furnished no returns at all.

Particulars.	Gowalparah.	Kamroop.	Durrung.	Nowgong.	Seebasgur.	Luckimpore.	Total.

These figures shew 477,576 acres of land held for tea cultivation

Held in grants under the old rules
Held in fee-simple under the new rules
Held under cultivation or rent-paying leases

194,342
228,734
54,500

477,576

at the close of the year, the quantity held on each of the tenures being as shewn in the margin. The area brought under cultivation

during the year under review was 5,210 acres only. An increase of 366,888 lbs. is however shewn on the out-turn of tea.

The information procured in regard to the progress of tea cultivation in Cachar is very

In Cachar.

Number of factories in 1865-66	83
Ditto ditto 1866-67	84
Extent of land under cultivation in 1865-66	...	20,005	acres.
Ditto ditto 1866-67	...	20,906	"
Out-turn of crops in 1865-66	...	927,825	lbs.
Ditto ditto 1866-67	...	1,722,068	"
Estimated ditto 1867-68	...	2,743,920	"

incomplete, owing to no returns having been furnished by the managers of 24 concerns. The total area of land applied for and granted for such cultivation

was 453,997 acres, but an abstract of the returns received only exhibits the results noted on the margin. The Deputy Commissioner of the district, however, believes that the total area under cultivation was about 31,200 acres, the number of gardens actually open being 119, which belonged to 32 companies and 22 private persons. The out-turn of tea for 1866-67 was, as shewn above, 1,722,068 lbs., exclusive of the crops of those gardens which had sent in no returns; and the estimated out-turn for 1867-68 was 2,743,920 lbs. The more correct estimated out-turn for 1867-68, inclusive of the gardens from which no returns had come in, was assumed at about 3,800,000 lbs.

The number of imported laborers in the district at the commencement of the calendar year was 20,991. This was further augmented by 9,191 laborers imported during the year, which gives a total of 30,152 men. From this number, however, is to be deducted the aggregate of deaths during the year, which amounted to 2,477, or about 8.21 per cent.; and this left 27,675 imported laborers in the district at the end of 1866. The number of laborers imported during the official year ending on the 31st March last was 4,017 only against 15,051 in 1865-66, which shews a very great decrease. The number of laborers released by the completion of their contracts during the same period was 4,630; but the majority of these emigrants were believed to be still in the district, under fresh agreements entered into under Act XIII of 1859.

The money drawn from the Cachar Treasury during the year for carrying on tea operations was Rs. 14,84,312, and added to the disbursements of previous years exhibits a total outlay of Rs. 92,14,312 up to the close of the year.

In Sylhet.

The information in respect to the cultivation in Sylhet is also incomplete, as no statistics have been received from two tea estates. The figures on the margin exhibit a comparison of results during the last four years, so far as the statistics available for the purpose allow of it.

In Dacca.

In Darjeeling.

shewn on the margin. It will be seen from the figures given that the number of factories has decreased by 8, and the extent of land under cultivation by 1,843 acres. This

No detailed information was obtained from the planters in Chitta-

gong in regard to the state of tea cultivation in that district, but it was

The quantity of coffee grown in Chittagong and the Hill Tracts is

In respect to the tea and coffee plantations in Chota Nagpore it was

stated in last year's report that they had suffered greatly from the drought

which had proved so disastrous in many of the districts of Bengal. This year of unexampled severity was however followed by a favorable season, which has to some extent renewed the hopes of the planters, though there has been no extension of cultivation as yet. The Palandoo plantation of about 200 acres in the Lohardugga District was favorably reported on, and also a younger plantation of about 46 acres, in which, in addition to tea, coffee is being planted on a system of careful cultivation. On the other hand, the Seetagurrah plantation near Hazareebaugh, the oldest of all the plantations in Chota Nagpore, was reported to have suffered an average loss of about 50 per cent. by the drought of last year. Of the Mahooddee and Jhoomra plantations no particulars had been received, but it was believed that a batch of Jhoomra tea would be in the market during the current year.

The aggregate quantity of tea exported from Calcutta during the year was 6,936,843 lbs. against 4,581,830 lbs., which represents eleven-twelfths of the quantity exported in the preceding year ; and this shews an increase to the extent of 2,355,013 lbs.

The arrangement of plants according to their natural orders was continued in the Botanical Gardens during the year under review. Of the exogenous orders the specimens of Urticaceæ were planted, Rubiaceæ being the only order which still remained to be illustrated. The arrangement of the endogenous orders was at the same time completed, and 24 orders were illustrated on the ground reserved for that purpose. An avenue of each of the following order of plants was also formed during the year, viz., of *Amherstea Nobilis*, which is backed by two lines of trees to afford it protection ; of Teak ; of *Terminalia Catappa* ; and of *Phoenix Sylvestris*. The collection of orchids was further greatly enlarged by valuable additions of American orchids received from England and the West Indies, and of other collections received from various parts of India, Ceylon, and Java ; and the plants were most successfully cultivated in low roofed houses of grass made on the model of a pepper vine shed.

The distribution of plants during the year was more extensive than in any previous year, and most of the plants were given away in exchange for plants contributed to the garden or to public officers for the formation of avenues. The number of Wardian cases distributed was 32 containing 1,002 plants. Besides these 18 closed boxes containing 696 orchidaceous plants, bulbs, and succulents were given away, and also 14 open boxes containing 321 plants. 2,76½ plants in pots were moreover distributed in the neighbourhood of Calcutta ; the total number of plants distributed being 4,783 against 3,407 distributed in the previous year.

The number of plants received during the year was also in excess of the number received in any previous year, being 4,195 against 4,000 received in the preceding year.

The number of seed packets distributed during the year was 96, against 82 distributed in the preceding year. The greater number of these packets were sent to the Botanical Gardens in Europe and the Colonies, in exchange for seeds received from them, which embraced 5,892 species. The packets sold to the public realized Rs. 380, against Rs. 250 realized in the preceding year.

The most valuable plant introduced into the Botanical Gardens during the year was the *Ipecacuanha* (*Cephaelis Ipecacuanha*), a healthy plant of which was received from the Royal Gardens at Kew. Four plants have already been obtained from this specimen, which was still thriving at the close of the year.

Considerable progress was made in the mounting of specimens for

The Herbarium.

Russian and Siberian plants.

Japan plants.

Plants collected in Sikhim, the Andaman Islands, and Chittagong.

the Herbarium, and the critical examination of the specimens mounted was carried on without interruption. Additions were made to the collection of dried plants by presentations received during the year of the species named on the margin. The

dried plants distributed from the Herbarium consisted principally of duplicates and of the lichens of trees indigenous to the gardens.

During the year under review a very interesting report was received from the Superintendent of the Botanical Gardens, Calcutta, on the success which has attended the experi-

Cultivation of the Mahogany tree in Bengal.

mental sowings of the Mahogany tree in Bengal. The report shewed that the tree was first introduced into Bengal from the West Indies in 1795, and that the trees then grown had in 1864, when several of them were blown down by the Cyclone, attained an average size of about 12 feet in girth at the height of four feet from the ground. When the trees blown down in the Botanical Gardens were sold by public sale the Mahogany

	Feet.	Inch.
Circumference at 4 feet above ground	... 14	3½
Ditto at 5 feet ditto	... 14	2
Ditto at 6 feet ditto	... 14	2

brought a very high price, the wood being found to be of particularly good quality. The dimensions of the largest tree now standing in the Botanical Gardens are given on the margin; and the large number of trees in private

gardens and along public roads in the neighbourhood of Calcutta, all obtained from those in the Botanical Gardens, shews that the Mahogany can be successfully grown without much skill on the part of the gardeners, or without much care. For these reasons the proposal of Dr. Anderson to extend the cultivation has been approved, and he has been authorized to lay out nurseries from cuttings. The Secretary of State has at the same time been asked to take measures for obtaining from the Government of Jamaica an annual supply of Mahogany seeds, having them properly packed and despatched to this country.

The object kept in view during the year in the cultivation of Cin-

Cultivation of Cinchona.

chona was the extension of the permanent plantations of the species *C. Succirubra*,

C. Micrantha, and of the two varieties of *C. Officinalis*. No attempt will be made to plant the species of *C. Calisaya* on a larger scale until 10,000 stock plants have been obtained. The total number of plants of all species, in all stages of growth, at the end of the year, was 782,048.

On the 1st of April 1866 the number of stock plants of *C.*

Stock plants.

Succirubra, and of the two varieties of *C. Officinalis* was 10,000 of each species,

while the number of stock plants of *C. Micrantha* was 2,539, and of *C. Calisaya* 26 only. The number of *C. Succirubra* was increased

by August, 1866 to 15,000, of *C. Micrantha* by September to 5,000, and of *C. Calisaya* by the end of the year to 624. All the stock plants were in excellent condition.

The increase of all the species was effected principally by cuttings, the total number made during the year being 550,611.

Several large supplies of seeds were received during the year from the Botanical Garden at Ceylon. The seeds on being received are thinly sown in shallow, well-drained, wooden boxes which are placed in a gentle bottom heat, the seedlings being left in the boxes until they are large enough to bear handling in transplanting them. From the boxes they are then transferred to large sized flower pots, several seedlings being placed in one pot. In these pots they remain until they are 4 or 5 inches high, when they are considered large enough to be placed in nursery beds. 38,500 seedlings of the varieties of *C. Officinalis* were added to the number of plants during the year.

The number of plants in nursery beds on the 31st March 1866 was 37,100. The extent of these beds was much increased during the year, and several new ones were formed near the spots where the largest permanent plantations were being made. It is difficult to shew the progress made in this stage of cultivation during the year, as the nurseries were several times emptied and refilled within that period. The number of plants in nursery beds at the end of the year was 259,210, no open air planting having been done for the six previous months.

The number of plants placed in the open ground during the year was 81,355, which, added to the number planted in the previous year, gave a total of 87,953 plants in permanent plantations. Of this number 44,150 plants were of the species *C. Succirubra*, and 38,550 of the two varieties of *C. Officinalis*, the remainder consisting of the species of *C. Micrantha* and *C. Paludiana*. The extent of ground covered with Cinchonas measures about 22 acres planted with *C. Officinalis*, and 36½ acres with *C. Succirubra*, besides which 80 acres of forest have been cleared for further operations. 150 plants of *C. Succirubra* have been planted on land belonging to the Selim Tea Association in the Terai, the cultivation being supervised by the manager of the Association; and by this arrangement the experiment of introducing Cinchona cultivation in the Terai has been carried out without any expense to Government.

The growth of plants varied much, for reasons explained in last year's report, according to the altitude of the plantations above the sea. The most luxuriant growth of *C. Succirubra* was in two small plantations near the Teesta, on a dry, well-drained ridge 1,200 feet above the sea. Most of the plants in these plantations had grown in 16 months from an average height of 8 inches to 3½ feet.

The bark of a branch of *C. Succirubra*, which was accidentally broken, having been sent to England for analysis by Mr. Howard, it was ascertained that Mr. Howard obtained from it 3·5 per cent. alkaloids. Two

trees of *C. Succirubra* and two of *C. Officinalis* were also cut down for an analysis of the bark in this country, and the bark yielded by *C. Succirubra* was found to be most promising, although much thinner than the red bark imported from South America; while the bark yielded by *C. Officinalis* was found to resemble the commercial bark of that species.

There were 1,194 plants of *C. Succirubra* distributed to planters in the Darjeeling District during the year, 600 were sent to Calcutta for despatch to Chittagong in furtherance of the experimental cultivation carried on in that district, which was noticed in last year's report, 300 were sent to the Botanical Gardens at Saharunpore, and 650 to the Cossyah Hills, where a Cinchona nursery was formed during the year for the introduction of the cultivation by private individuals in Assam. The total number of Cinchonas in existence in the Government plantations, as well as in those of private companies in Darjeeling, was 1,014,826 plants of all species, as under :—

Names of Species.	In Government plantations.	In Darjeeling Cinchona Association's plantations.	In Major Fitzgerald's Cinchona Garden.	In Darjeeling Tea Company's Garden.	In Tukvar Tea Company's Garden.	Total.

In consequence of the distress felt throughout Bengal from the general dearth and scarcity of food no arrangements were made during the year for holding agricultural exhibitions anywhere except in Assam, where an exhibition was held at Tezapore on the 27th December last, and remained open for the four following days. This exhibition was on the whole successful, but not to such an extent as to justify the repetition of such shows in Assam, except in combination with a local *mêla* or fair, by which means it is anticipated that the people will be induced to attend in greater numbers and exhibit their products more readily. The expenses of the exhibition at Tezapore amounted to Rs. 2,394-15, while the assets derived from subscription and sale of tickets amounted only to Rs. 1,236-7-9.

The disease among cattle in the Lower Provinces which appeared at the time of the Agricultural Exhibition held at Alipore in January 1864, and the appointment of Dr. Palmer to enquire into and report on the subject, were noticed in the Administration Report for 1863-64. The report submitted by Dr. Palmer was sent to the Secretary of State as having a special bearing on the cattle disease then raging in England ; and, at his request, some further information was collected during the year and transmitted to England on the subject of the diseases which have been prevailing among cattle in this country since 1864.

FAMINE.

The scarcity of food in many parts of Bengal, an account of the causes of which was given in the last Administration Report, continued to engross the attention of the local Government throughout the year.

The great question for decision on the 1st May was the propriety or otherwise of importing rice into Orissa, in which province conflicting opinions were held as to the state of the stocks in hand. On the 28th May discussion was set at rest by the receipt of a telegram from the Commissioner reporting the sudden closure of shops and exhaustion of stocks in Cuttack. Importations were at once commenced, and Mr. McNeile, c. s., was deputed as Special Commissioner to Orissa to assist the Divisional Commissioner. Ultimately importations of grain on a very extensive scale were undertaken, but the lateness of the season rendered the landing and internal transport of it a work of great difficulty. From the failure of the food supply of the province, which has been occasioned by the drought, and from the impossibility of throwing in imported grain during the period between May and October in quantities sufficient to support the destitute population, a lamentable mortality occurred, which was aggravated by the extraordinary inundations of August and September. In the month of December a Commission was appointed by the Government of India, consisting of the Hon'ble G. Campbell, c. s., one of the Judges of the High Court, as President, and Colonel W. E. Morton, r. e., and Mr. H. L. Dampier, c. s., Commissioner of the Nuddea Division, as Members, with instructions to enquire into and report on the causes, circumstances, and extent of the famine, and to suggest remedial measures, in order, as far as possible, to guard against the recurrence of a similar disaster for the future.

The Commissioners have submitted their report which has been laid before the Secretary of State for India. They have expressed an opinion that an estimate of the mortality at one-fourth of the population of Orissa is not too high.

The scarcity which terminated in famine in Orissa was felt more or less in all parts of Bengal, with the exception of the Eastern Districts, where the crops of 1865 had been almost full. In Midnapore,

Chota Nagpore, and the Patna Division there was excessive distress, and the mortality in many places was very heavy. Mr. F. R. Cockerell, c. s., the Legal Remembrancer of the Lower Provinces, was deputed to enquire into the circumstances of the famine in Behar ; and the other districts were included in the tract made over to Mr. Campbell's commission.

Mr. Cockerell's report has also been submitted and is now before the Secretary of State.

In the latter part of May and in June crowds of paupers from the neighbouring districts began to flock into Calcutta, and the number soon became so great as to demand the serious attention of the local Government.

The liberality of many of the wealthier native gentlemen was beyond all praise, and it is estimated that nearly 12,000 persons were fed daily at private charities. At last a public meeting was held and a Relief Committee formed, of which Mr. Stuart Hogg, c. s., the Chairman of the Justices, was Chairman, and subscriptions were raised. A large pauper camp was formed at Chitpore, and at the end of the year upwards of 11,000 paupers had been sent back to their homes by the Committee.

The crops of 1866 have happily been very good in almost all parts of the country, except the tracts desolated by the inundations. In other parts of Bengal, though prices range considerably above the average, little or no anxiety is felt that the distress in 1867 will be serious. In Orissa and in parts of Maunbhoom it is still necessary to give relief. In Maunbhoom this is chiefly confined to Public Works for the employment of the people in the neighbourhood of their homes, and the Board of Revenue are superintending all these arrangements ; but in Orissa, from the southern part of the Balasore District southwards to the boundary of the Madras Presidency, it has been found necessary to establish relief centres at short distances from one another which are supplied with sea-imported rice. The importation of the rice, (which is expected to amount to above 1,100,000 maunds or about 40,270 tons) and its landing and storage are under the management of the Board of Revenue and the Local Officers of Government. The transport inland and the distribution of relief is managed by a large special staff controlled by a mixed Relief Committee of official and non-official gentlemen in Calcutta, of which the Hon'ble C. P. Hobhouse, c. s., Judge of the High Court, is President.

The services of Mr. E. W. Molony, c. s., have been placed at the disposal of the Committee, and he is employed as Special Famine Commissioner in Orissa aided by a large staff of Assistant and Deputy Collectors.

Besides the gratuitous relief afforded at the centres, rice is sold from the Government storehouses, and ample employment is afforded on public works and on those of the Irrigation Company. It will be necessary to carry on these measures of relief on a large scale till November, when the new crop will come in.

The numerous orphans left by the famine are at present supported partly by Government and partly by the Relief Committee. Most of them are made over to the care of missionary bodies. Arrangements to provide for their permanent support will be made at the end of the current year, when the precise number finally left in the hands of the Government and of the Relief Committee can be ascertained.

SURVEY.

A Statement (O. 1) in the Appendix shows the work done or to be done in the Professional Survey department during the survey year ending on the 30th September 1867. The aggregate

area expected to be completed was 4,102 square miles, of which 1,732 miles were classed as mouzawar, 1,720 miles as topographical work, and 650 square miles as waste lands. The total expenditure was estimated at Rs. 3,61,525, which gave an average of Rs. 88-13-10 per square mile. Taking the average on each class of work separately the rate on the mouzawar work was Rs. 87-6 per square mile, on topographical work Rs. 95-12-10, and on waste lands Rs. 74-7-7. In the 1st, 2nd, 3rd, and 5th Divisions the high rates were ascribed to the difficult nature of the country under survey. The movement of the 2nd Division from Maunbhoom to Luckimpore during the year also added to the increased rate in that Division. In the 4th Division the arrears of the previous season prevented a larger out-turn of work than is shewn in the statement, but the entire tract demarcated from Bhaugulpore to Maldah was surveyed. In the 6th Division a great part of the season was taken up in *purtal* or check surveys, for purposes of a further report called for by the Government of India on Major Thompson's surveys. The 1st, or Darjeeling revenue and topographical party, completed all the work that remained to be done in that district during the season, and assisted the 5th Division in the survey of the Western Dooars. The area surveyed by the 2nd, or Upper Assam revenue and topographical party, was in excess of the out-turn of the previous season.

The work done by the non-professional parties is shewn in Statement O. 2 in the Appendix. The 2nd, 3rd, and 4th Divisions were engaged mainly in registry work. In the 2nd

Division the registers of 25 out of 32 pergunnahs were completed up to the close of the year. In the 3rd Division 50 vernacular and 41 English Registers were written, leaving only one vernacular register of Dacca and 9 of Sylhet to be completed; besides which 23 of the Dacca registers and 82 of the Sylhet registers remained to be translated into English. The maps of the Dacca District, which had been injured by much handling, were also re-copied. In the 4th Division fair progress was made in writing the registers, some difficulty being experienced in Backergunge on account of the intermixture of villages. No

demarcation work was done by the Dearah Survey party, which was engaged for the most part in adjustments of revenue in the Patna Division. Boundary pillars have been erected in the districts of Bhaugulpore and Maldah at a cost of Rs. 113 and Rs. 65 respectively. In Assam 33 villages were demarcated in Seeksagur, 61 in Luckimpore, 63 in Kamroop, and 255 in Nowgong, the operations in Luckimpore and Nowgong having been commenced during the year. The entire area demarcated in Assam was 3,360 square miles. In Lohardugga and Palamow the work in the early part of the season consisted in re-opening boundary lines previously cleared and demarcated, but on which jungle had again sprung up before professional operations could be commenced upon. 111 villages were also subsequently demarcated, progress was made in writing the registers, and 103 maps were prepared for the settlement officer. In Maunbhoom the common boundary between Singhbhoom and Maunbhoom and Lohardugga and Maunbhoom was relaid, the boundary dispute which had existed for many years between Dulbhoom and Burrabhoom was settled by the adjustment of 30 miles of boundary, and a portion of Patbhoom was demarcated. In the Dooars an area of 1,000 square miles was demarcated, progress was made in marking off sites for platforms along the boundary between the Western Dooars and Bootan and in every village and jungle block, and the demarcation of the boundary between the Eastern Dooars and Bootan was commenced. The erection of boundary pillars along the entire border, from the Teesta to the Monass, has been undertaken by the Public Works Department. 150 square miles in the Western Dooars and 1,500 square miles in the Eastern Dooars remained to be surveyed at the close of the year.

The survey operations in Assam embrace the survey of waste lands, especially tea grants, and the re-survey of the entire province. The first party organized for this survey was

Assam Survey.

drafted in 1862 from the 4th Survey Division, and sent to Upper Assam to commence operations in Seeksagur. A second party was organized in 1863 for commencing operations in Lower Assam (Kamroop); and in the same year a demarcation establishment was sent up for preparing ground for the professional survey. It has been since determined that, instead of the disjointed and desultory operations in connection with the tea gardens, the survey of the province should be converted into a revenue survey in the settled mouzahs, and a topographical survey in unoccupied or partially occupied tracts. It has also been determined that all the survey parties employed in Bengal shall be sent to Assam as the work of each Division is brought to a close, with the view of completing the work in Assam before any portion of Bengal is re-surveyed; and, in accordance with this plan, the entire 1st Survey Division is now working in Kamroop, and a portion of the 2nd Survey Division is working in Luckimpore, in addition to the Upper Assam Survey party which is working in Seeksagur. The supervision of the survey in Assam has been recently entrusted to the Commissioner of the Province.

It was stated in the report for 1864-65 that, with a view to the settlement of the boundary disputes between the two adjacent districts of Shahabad and Ghazeeepore which belong to Bengal and the North-Western Provinces respectively, it had been proposed to the Government of India that the deep stream of the river Ganges should be declared to be the boundary between those districts, and between the Lieutenant-Governorships of Bengal and the North-Western Provinces, the disputes regarding property and occupation being left to the decision of the regular tribunals. The Government of India having since issued a notification defining the boundary in the manner proposed, the Collector of Shahabad has been instructed to take charge of the estates added to his district thereby.

The arrangement proposed for ensuring the preservation of the stations of the Great Trigonometrical Survey, by making them over to the charge of the police, was noticed in last year's report. The proposal having been agreed to by the Superintendent of the Survey, the necessary instructions have since been issued for the charge of the stations being made over to the police authorities. A station in one district, which had fallen into ruins, having been destroyed under the orders of the local authorities from ignorance in regard to its character, the Government of India has further directed, with a view to prevent the occurrence of similar mistakes, that steps should be taken for the identification and preservation of all important marks and stations; and a list of those in Bengal is being prepared by the Superintendent of the Trigonometrical Survey.

STATIONERY.

The annexed return exhibits the value of stock receipts and issues of stationery and the total amount of charges incurred by the Stationery Department during the year 1866-67, as compared with eleven-twelfths of the results in the preceding year.

	Eleven-twelfths of 1865-66.	1866-67.
	Rupees.	Rupees.
Value of stock at commencement of the year ...	3,48,843	2,26,488
Invoice value of stores received from England ...	81,078	7,75,573
Account value of stores received back from the different offices ...	5,022	4,556
Cost price of local purchases ...	2,51,823	1,26,988
Total value of stock ...	6,86,766	11,33,605
Value of issues during the year ...	4,79,152	4,22,466
Amount of bills passed for Mofussil purchases ...	36,938	8,739
Amount of all other charges, viz., establishments, packing, and contingencies ...	39,483	35,412
Total charges ...	5,55,573	4,66,617
Value of stock at the close of the year ...	2,07,614	7,11,139

stationery and the total amount of charges incurred by the Stationery Department during the year 1866-67, as compared with eleven-twelfths of the results in the preceding year.

The total outlay on account of stationery purchased in this country shows a decrease to the extent of Rs. 1,24,835, while the value of invoices received from England shows an increase of Rs. 6,94,495, the net increase of expenditure under these two heads amounting to Rs. 5,69,660. As a set-

off to this expenditure however, the value of stock in store at the close of the year exhibits an increase of Rs. 5,03,525, the accumulation of such a large surplus of stationery being apparently owing to indents having been made on the Home Authorities on calculations based on the average consumption of previous years without reference to the recommendations of the Stationery Committee which led to a reduction of the general expenditure.

The issues of stationery during the year shew an increase in the consumption of printing papers, which have been substituted to some extent for hand laid paper, and have been in greater demand at the Aliporo Jail and Government Central Presses for the printing of forms. There has also been an increase in the expenditure of Bills of Exchange papers, which were drawn in large quantities by the Money Order Department, and of goose quills, which are now supplied to the different offices on a more liberal scale. In all other articles the issues shew a decrease; and the decrease in aggregate value, including bills for Mofussil purchases, was Rs. 84,885, besides which there was also a decrease in the charges incurred on account of establishment, packing, and contingencies to the extent of Rs. 4,071.

During the year under review the Stationery Office has been made the centre for the preparation and issue of all printed forms, the work having been transferred to it from the Aliporo Jail Press where it had been hitherto done. Progress has been made in carrying out the scheme, but some further time must elapse before the arrangement is perfected.

NATIVE PUBLICATIONS.

The return of Vernacular Newspapers reported upon by the Bengalee Translator has been altered to some extent during the year by the addition of some new papers and the discontinuance of others.

Jam Jahanama	... "

The list as it stood at the end of the year is given in the margin. The only other noticeable changes were that one of the daily papers (the *Soodhaburson*) had increased its size, and that the *Education Gazette* under its present management had acquired a more extensive circulation than before. On the tone of the papers generally the Bengalee Translator remarked that the Hindu publications were fearless in their comments on public measures, though their opinions were sometimes crude; but that the Mahomedan papers on the other hand rarely ventured to express any opinion at all.

It was stated in last year's report that the scheme proposed by Mr. Wheeler for obtaining a record of Vernacular publications had proved a failure, only three applications for registry having been received during the nine months that it remained in operation. During the year a law (Act XXV of 1867) has been passed which requires that a certain number of copies of every book and pamphlet printed in India shall be delivered to Government, and the arrangements to be carried out in connection with it were under consideration at the close of the year.

The selection of Oriental works for the Home Government is being carried on by the Bengalee Translator to Government with the assistance of Baboo Rajendrolall Mitter, Superintendent of the Wards' Institution, who has been associated with him for that purpose.

VARIOUS.

The question of introducing a uniform system of weights and measures throughout all India having been raised by the Government of Madras and the Calcutta Trades' Association, it was ordered by the Government of India in June 1864 that a Committee should be appointed for considering it in each Presidency and Province, and the result of their deliberations submitted to the Government of India with the remarks of the local Government. The Committee for Bengal submitted their report in July last, and, after noticing the present state of confusion and uncertainty in the matter of weights and measures throughout the country, stated that in their opinion the best course that could be adopted for reforming that evil was to legalize the French decimal system of weights and measures, called the metric system, to put forth the whole strength of Government in every practicable way in order to familiarize the public with that system, and, after a convenient period, to render the use of it compulsory by penal enactments. The reasons assigned for this opinion were that the metric system was a complete, clear, and simple system connecting weight with measure and money with weight by simple and intelligible relations, that it was easy to learn and simplified the labour of calculation to an extraordinary degree, and that it had already been adopted by nearly half of the civilized world, would probably soon be adopted, at all events in commercial and international transactions, by England, and would, in the event of its being adopted in this country, do more than anything else to bring it into relation with the higher civilization of Europe. The Committee closed their report with a series of practical propositions, the adoption of which would tend, they said, to bring about the uniformity which had been so long desired. These propositions were as follows: (1st) that a short law should at once be passed, similar to the English Act (Cap. CXVII., dated 29th July 1864,) for legalizing the use of the metric system in all kinds of transactions; (2nd) that application should at once be made to the Bureau du Ministère de l'Intérieur at Paris for a complete set of carefully verified weights and measures; (3rd) that a permanent Committee

should be appointed, with a paid Secretary, to carry out the measures determined upon, draw up tables, keep and verify standards, superintend Inspectors, and take measures for increasing the use and improving the knowledge of the system among the people ; (4th) that Government should as early as possible introduce the system into the Public Works Department, and in the Customs, Commissariat, Accounts, Survey, and other Departments—the Railway being also requested to follow the same plan ; (5th) that offices of verification should be established in every district and large town and supplied with standard weights and measures bearing the stamp of the permanent Committee ; (6th) that tables should be prepared and widely circulated, shewing the metric expressions for the seer of 80 tolahs and its multiples and sub-divisions, and so for beegahs, &c. ; and (7th) that the metrical system should be taught in all Government and Aided Schools, and a knowledge of it required at the entrance examinations in the Universities and from all candidates for public employment.

The suggestions of the Committee appearing to be judicious and well considered, have been recommended to the Government of India for adoption, with the remark that, though the changes proposed are of a sweeping and startling nature, there is no reason to suppose that they would meet with greater opposition than slighter alterations, and that, since it is desirable that the present state of things should be amended, it is obviously better that the change should be a thorough and efficient one, and not merely a tentative adoption of the English system to be followed by further disturbing changes a few years later.

It may be here noticed that a uniform standard of weights and measures has been introduced during the year in the Sonthal Pergunnahs, primarily with a view to prevent the Sonthals from being cheated by the Bengalee traders, who, from the great variety of weights and measures hitherto prevailing in the province, were enabled to buy with one measure while they sold with another. The only difficulty experienced in introducing the new system came from the Sonthals themselves, who in their ignorance objected to it simply because it was new. But they have since begun to appreciate the advantages of uniformity.

The appointment of a Meteorological Committee was noticed in the report for 1864-65. The labors of the Committee have hitherto been devoted chiefly to the completion of preliminary arrangements, *viz.*, the selection and establishment of observing stations, the selection and verification of the instruments supplied, and the adoption of rules for observation, forms of record, &c. They have also kept a constant watch on the daily telegraphic reports, with a view to warn the shipping of the approach of bad weather. To allow of the system of observation being extended, sanction has been accorded during the year to the establishment of observing stations at Dacca and Darjeeling, which though not on the coast line are important stations for indicating the prevalence of the wind currents which affect the weather southwards, though they are

Introduction of a uniform standard in the Sonthal Pergunnahs.

Proceedings of the Meteorological Committee, &c.

not felt there. The Government of India has also authorized the appointment of a Meteorological Reporter for Bengal, as has been already sanctioned for the North-Western Provinces and the Punjab, for the express purpose of compiling an abstract of the various registers of observation. A grant of Rs. 500 has also been made to the Committee for the purchase of such standard works on meteorology as may be required.

A descriptive ethnology of Bengal having been compiled by Colonel Dalton, the Asiatic Society were asked and have agreed to supervise the publication of it. It is intended further to illustrate the work by characteristic representations of the different races and tribes in Bengal, and enquiries were being made at the close of the year as to the best means of collecting and publishing the photographs required for the purpose.

Mr. Beames, Collector of Chumparun, having expressed a desire to undertake the compilation of a work on the languages of the hill and other wild tribes of Northern India, and proposed either that he might be allowed to proceed on a prolonged tour through the places inhabited by those tribes, or that the public officers in charge of those places might be directed to assist him with information and notes towards the accomplishment of his purpose, the second proposal has been agreed to by Government, and in furtherance thereof the Commissioners of Chota Nagpore, Bhaugulpore, the Sonthal Pergunnahs, Assam, Cooch Behar, Dacca, and Chittagong directed to afford him all reasonable aid in the matter. A similar request has likewise been made through the Governments of India, the North-Western Provinces, and Punjab, and the Chief Commissioner of the Central Provinces, to the Resident at Khatmandoo, the Assistant Commissioner of Kumaon and Ghurwal, the Deputy Commissioner of Simla, and all local officers in the Central Provinces, and especially the Deputy Commissioner of Sumbulpore.

The existing arrangements for the extermination of dangerous animals in the several divisions of the Lower Provinces having been reconsidered during the year, the scale of rewards given for the destruction of tigers has been raised in all places where it had been found to be insufficient, and a special allowance of Rs. 25 has been sanctioned in any case where circumstances rendered it of very great importance that any particular tiger should be destroyed.

Wild elephants having become very destructive in the Gurjat Mehals of Cuttack, a proposal was made by the local officers that the rewards for their destruction should be increased. As it was more desirable however that these useful animals should be captured than killed, the expediency of establishing Kheddahs in Cuttack was suggested to the Government of India, and the work of capture will be commenced in the Gurjat Mehals as soon as the operations now being carried on in the Central Provinces are brought to a close.

The construction of serais for the accommodation of travellers at the principal stations along the lines of the Railway in Bengal having been determined upon, the Commissioners of Patna, Bhaugulpore, Rajshahye, Burdwan, and the Presidency Division have been directed to commence with the work at once in their respective Divisions. The work is to be undertaken out of local funds, and the more important stations are to be taken in hand first. Private persons and zemindars may hereafter be induced to follow the example of Government and build serais at the smaller stations in the event of its being found remunerative to do so.

The Committee appointed for the collection of works of Art and Industry for the Paris Exhibition of 1867 reported in February last the close of their labors and the general results

Indian contributions to the Paris Exhibition.

which they had obtained. The arrangements made by them for carrying out the objects of the exhibition appear to have secured not only a full and adequate representation of the industries of this country generally, but also a brilliant display of those rich and costly fabrics, clothing, arms, and jewellery, which excited so much interest at the London Exhibition of 1851. This object has been attained by the hearty co-operation of the native chiefs and princes, who have contributed articles of great value in furtherance of the scheme. They were offered the option of having their articles returned to them after the closing of the exhibition free of all expense, of having them sold and the proceeds remitted to each contributor, or of receiving a present equivalent to the value realized by the sale of the articles. The last of these three courses has been preferred by all the chiefs, and a Committee has been appointed for selecting the return presents to be given to them. The collection generally is believed to be the most complete ever sent from this country to Europe, surpassing those transmitted to London in 1851 and 1862 and to Paris in 1855. The number of specimens sent to the London Exhibition in 1851 was 3,350, while those sent to Paris on the present occasion exceed 5,200. The aggregate value of the collection cannot be determined, as most of the chiefs who have presented their contributions have given no information in regard to the value of the articles sent by them. The collection has been sent to Paris in charge of Mr. Dowleams, who has been appointed Special Agent for that purpose.

SECTION X.—POLITICAL.

MUNIPORE.

In October last a raid was made into Munipore from Cachar by a party of Munipoories, under Gokul Sing, a son of the ex-Rajah of Munipore. The marauders, who were about 150 in number, started from Cachar on the 18th, but were immediately followed by a detachment of the 5th Regiment,

Raid into Munipore.

N. L. I., 80 strong, under Lieutenant Crohan, and a Police force, 40 strong, under Mr. Rockfort, the District Superintendent of Police, who were accompanied by Mr. Edgar, the Deputy Commissioner of the district, up to the Manipore frontier. The troops, however, did not overtake the raiders till the 23rd on Manipore ground, by which time the rebels had come into collision with the forces of the Rajah of Manipore, and were believed to have got the better of them. The enemy was, however, at once attacked and dispersed by Lieutenant Crohan, and a fugitive party of them having been subsequently met by the baggage guard of the 5th Regiment, three of their number were killed. Three runaways were also captured. On our side Mr. Rockfort only was slightly wounded.

As the present incursion was a repetition of similar outrages committed in previous years, the Government of India directed that none of the Munipoories implicated in this or any former attack should be allowed to remain in Cachar, or anywhere in the vicinity of Manipore; and measures were taken for removing them to a distance from the border, and placing them under surveillance. Efforts were also made to seize Gokul Sing and his followers, and to bring them to punishment. Orders have been issued for the permanent occupation of the out-posts at Jirighat and Godown Ghât on the Manipore frontier by our Police; and a proposition has been made, through the Government of India, to the Rajah of Manipore that a strong Police guard to be paid by him should be posted on the Kalla Naga Hill, which commands the easiest and shortest means of access from Cachar into Manipore.

The measures taken for strictly enforcing the provisions of the Arms' Act were noticed in last year's report. The attention of Government was again drawn to the subject during the year under review, and, with a view to prevent any further raids being attempted by the Munipoories living in Sylhet and Cachar against the kingdom of Manipore, the Magistrates in the Chittagong and Dacca Divisions were specially instructed not to grant licenses under Section 7 of the Act, for the manufacture or sale of arms and ammunition to any person who had not received a license to transport them, and at the same time to exercise great caution in granting licenses for the transport of arms and ammunition. Instructions were also issued for the inspection by European Police officers of the premises of persons licensed to manufacture or deal in arms, &c., in the districts bordering on Manipore; for the withdrawal of licenses from dealers in arms having their shops at places other than the sudder stations of districts where no check could be exercised over them; for the apprehension of persons conveying arms and ammunition under suspicious circumstances; and for the disarming of persons going armed or carrying arms without having obtained a license.

NAGAS.

A raid was committed in Cachar by a party of Angami Nagas on the 14th and 15th of June last, in which they first killed six persons whom they met going in search of rice, and

then attacked the Meekir village of Sergamcha, situated on the edge of an uninhabited tract of country at a distance of one day's journey from the Kheraneo Police Station, where they killed 20 more persons, including 13 women and children, and then plundered and fired the village. The number of the Nagas concerned in the outrage was variously reported at from 15 to 25, and, owing to no timely notice of the occurrence having been given to the Police, the party sent in pursuit of the marauders was not successful in overtaking them. A scheme for tracing them out and effectually punishing them in their homes was afterwards considered in connection with the arrangement authorized for the administration of the Naga Hills, but it was found impracticable to carry it out during the last cold season owing to the sickness of Lieutenant Grogory, which has also prevented for this year the occupation of Samoogooting which is to be his head-quarters. It is to be hoped, however, that the new line of policy to be adopted towards the Nagas, and the establishment of the Deputy Commissioner's head-quarters at Samoogooting, when this has been accomplished, will effectually check butcheries of this sort ; and, by the instructions already given to him, the Deputy Commissioner has been expressly empowered to proceed summarily against any village proved to have been concerned in a gross outrage, on the understanding however that this power is to be exercised in those cases only where it would defeat the object of remedial action to refer it for the prior sanction of higher authority.

Of the other instructions given and arrangements made during the year for carrying out the new scheme of administration in the Naga Hills the most important were as follows : The Gaonboora or headman of every village has been authorized to try all petty cases, and will be held responsible for the Police of his village and for reporting all crime committed therein, and also for the collection of any tax which may be imposed on his village. A tax of Rs. 2 a year has been ordered to be levied from the villagers of Samoogooting, or eight days' labor in the year in lieu of cash. The Deputy Commissioner has been authorized to exercise the powers of Superintendent of Police, and an Assistant Commissioner has been appointed who has been similarly empowered to exercise the powers of an Assistant Superintendent of Police. A police force of 150 constables, with the usual complement of native officers, has been placed under the Deputy Commissioner, who has been further authorized to employ 20 Kookie scouts, with a jemadar of their own tribe, whose sole duty will be to scour the jungle round Samoogooting and Dhemapore, and to keep it and the road between those posts clear of prowling parties of Angamees. In his criminal proceedings the Deputy Commissioner has been directed to follow the spirit of the Criminal Procedure Code and to exercise the powers of a Sessions Judge. An appeal from his decisions will lie to the Judicial Commissioner of Assam. The Assistant Commissioner has been authorized to exercise the powers of a Magistrate as described in the Criminal Procedure Code. In regard to Civil cases the procedure hitherto followed is to be continued for the present under the supervision of the Deputy Commissioner. Orders have also been given for opening out the roads urgently required for facilitating

communication between Samoogooting, Dhemapore, and the sub-divisional station of Golahghât.

GARROWS.

An account was given in last year's report of the raids committed by the Garrows in the direction of Mymensing and Gowalparah, and it was stated that, with a view to

Scheme for the administration of the Garrow Hills.

check these outrages, a scheme had been sanctioned by the Government of India for placing a European Officer in charge of the Garrow Hills. In furtherance of this scheme the Garrow Hills have since been separated from the district of Gowalparah, and formed into a distinct jurisdiction under a first class Assistant Commissioner, with head-quarters at a place to be selected on the Toora Pahar; and Lieutenant Williamson, who has been appointed to the office, was engaged in selecting a proper site at the close of the year.

Some administrative changes have also been authorized in carrying out the scheme, the most important of which are as follows: The offices of Lushkur and Zimmadar have been amalgamated, so that the police and revenue responsibility in each village or tract may rest with one headman. The office of Lushkur has thus been made to correspond with that of Dolloi on the Cossyah and Jynteah Hills, and of Gaonboora in the Naga Hills; and, in regard to criminal cases, the duty of the Lushkur will be to try within his jurisdiction all offences which are not of a heinous character, cases beyond his competence being tried by the Assistant Commissioner. The Assistant Commissioner will also exercise the powers of a Sessions Judge with the aid of Assessors, but appeals from his decision will lie to the Commissioner of the Cooch Behar Division in his judicial capacity. In Civil cases the Assistant Commissioner will simply control the action of the Lushkurs, trying himself those cases in which persons of different tribes or villages are parties. It has been further ordered that the Lushkur will be held responsible for the police of his village and for reporting all crimes committed therein, and also for the collection of taxes and assessments. A Police force of 100 constables with the usual complement of native officers has moreover been sanctioned for employment in the hills, and is to be enrolled under Act V of 1861 and recruited from the various tribes found in the neighbouring districts of Gowalparah, Cooch Behar, and Rungpore. The establishment of the necessary outposts along the frontier has been deferred till the Assistant Commissioner has obtained some experience of the country placed under his charge. In the meantime measures are being taken for opening out communications, and the construction of a line of bridle road from Singimary to Toora Pahar has been already authorized.

ABORS.

The annual meeting with the Abor Chiefs was held at Dehing

Annual meeting with the Abor Chiefs.

Debang Mookh on the 3rd April 1866, by the District Superintendent of Police of Luckimpore, in the absence of the Deputy Commissioner, and an agreement was entered

into with the fourteen clans of the Bor Abor tribes who had hitherto kept aloof from all intercourse with our officers. This engagement is precisely of the same nature as that made with the other Abor tribes, and besides binding those who have subscribed to it, has served also to conciliate the Membo Abors, who being subordinate to the Bor Abors had displayed signs of dissatisfaction at the meeting held in 1865, because the Bor Abors had not then come to terms. The only one of these tribes which still maintains an unfriendly attitude towards us is the Pashre Meyong Abors, whose attack on a frontier village in 1862 led to the adoption of the present plan of general frontier defence and of Police subsidies and defences: and their sole cause of complaint now is the maintenance of a guard and stockade at Pobah Mookh. It is expected that this fit of ill humour, (for so it is supposed to be by the local officers) will not last long. In the meantime the proposal of removing the post at Pobah Mookh has been at once rejected, as no such step could be taken without relinquishing the whole cultivated tract below the hills to the Meyong Abors and the Meeris who occupy it, and who are the serfs and slaves of the Meyongs.

MISHMEES.

A raid committed by the Mishmees on a Kamptee village in Upper Assam was noticed in last year's report. The endeavours made by the Deputy Commissioner of Luckimpore to trace out the perpetrators of this outrage have been unsuccessful, but some arrangements have since been made for checking raids from the same direction in future. Ten Kamptee Volunteers, with a Commandant at their head, have been armed with muskets and bayonets as a guard in the service of Government; and a scheme has been sanctioned for concentrating a number of hamlets near Suddyah into one village at Dekrang, which will of itself provide a defence against incursions.

THE HILL TRACTS OF CHITTAGONG.

The raids committed by the Shindoos in the Hill Tracts of Chittagong were noticed in last year's report, and it was stated that the Chief Commissioner of British Burmah had been requested to adopt measures for the protection of the frontier on the side of the Akyab district through which the Shindoos penetrated into Chittagong, and proposals were made for undertaking an expedition into the Shindoo country for the punishment of the marauders. The Chief Commissioner was, however, of opinion that it was not practicable to adopt any aggressive action from that quarter with any prospect of success, as nothing was known of the interior economy of the Shindoo tribes generally, or of the actual perpetrators

of the raids referred to; and, under these circumstances, it was considered advisable to abstain for the present from undertaking any hostile movement against them. Our efforts have accordingly been confined mainly to gaining an accurate knowledge of the different tribes inhabiting the confines of Akyab and Chittagong, and to increasing the means of protecting our villages from future attacks; and for this purpose an officer has recently been appointed Superintendent of the Arracan Hill Tracts. The result has been so far satisfactory that there has been no fresh Shindoo raid during the year.

A series of raids were however committed in the Hill Tracts by the Looshai Kookies of the Howlong tribe, who are said to be the enemies of the Shindoos, and who had hitherto made no incursions in this direction. In the first of these raids, which occurred on the 6th July last, three villages near Kho-Kheong, inhabited by Bunjoogees, were attacked by a party of about 400 Looshais, and four men were killed and 80 men and women carried away captives. In the second raid, which immediately followed the first, a Mugh village on the Captic was attacked, apparently by a detachment from the same party of Looshais, and three men and one girl killed, and eight others carried away. A third raid was committed on a village named Guara Kheong, which was attacked and plundered. These raids, following each other so quickly, necessarily greatly alarmed all the villages in the Hill Tracts, and a rumour was propagated and believed that a general raid was contemplated by the Looshais. To allay this alarm and punish effectually the perpetrators of the outrages already committed it was at one time intended to send an expedition to the Looshai villages; but it was found on enquiry that the Howlong tribe was a very powerful one, consisting of at least 16,000 men, and that nothing short of a regularly equipped military force, with artillery and a Commissariat establishment, would be sufficient to chastise them thoroughly. The chiefs who had committed the raids were traced to the comparatively petty villages of Lalloor and Vantoonga; but the prime mover in the matter was believed to be the Chief of Vundoola, the head of the Howlong tribe, whose village was situated on the highest ridge of the chain of hills which forms the water-shed of Chittagong and Arracan and which is inaccessible on three sides and well defended on the fourth. It was apparent that no hostile expedition ought to be undertaken but such as would thoroughly accomplish its purpose, and before sending such an overpowering force it was considered desirable to await fuller information than was before the Government. It was therefore determined that for the present the only action to be taken in the matter should be confined to the strengthening of our line of out-posts on the frontier with a view to repelling future incursions, and to this end the Hill Tract Police was ordered to be raised at once to its full sanctioned strength and to be further strengthened, if necessary, from the reserves of other districts. It was directed that all attempts at raids and dacoities should for the time simply be repelled, the marauders being followed only where this could be done with safety, and the measures of retaliation being confined to the arrest,

if possible, of persons implicated in the crime and the seizure and destruction of property belonging to them.

After the above instructions were issued reports were again received of fresh bands of marauding Looshais having entered the Hill Tracts in different directions and

perpetrated acts of great violence, both within the jurisdiction of the Deputy Commissioner and beyond it. From one place named Chcebodow, near the Sungoo Valley, they carried off three persons; two other villages in the same direction belonging to the Bunjoogees were plundered and destroyed, 11 men being killed and 35 taken prisoners; and, in the Shindoo country, to the northward of the Koladyne river, they attacked and cut up four villages belonging to the Shindoos, carrying off 76 prisoners. Besides these, one intended raid into the Hill Tracts was prevented by the friendly exertions of Rutton Pooca, who encountering the party refused to allow them to proceed until they had taken an oath on the *dao* and spear, their war weapons, not to harm any British subjects; for which service Rutton Pooca has been handsomely rewarded. The vigilance of the Hill Tract Police was also particularly useful in pursuing the marauders wherever they appeared, till they were compelled to retire and hide themselves in the jungles, and this in many instances prevented the commission of further outrages. The Police has now been fully strengthened. The policy hitherto followed towards the Looshais and other disaffected tribes was further being reviewed at the end of the year, with a view to discover why the measures already adopted for the pacification of the frontier have hitherto been unsuccessful. The utmost endeavours were also being made to open negotiations with the Looshai and Sylloo Chiefs to enter into engagements similar to those already made with Rutton Pooca and his tribe.

While this has been the state of affairs in the Hill Tracts of Chittagong our relations with the Looshais on the side of Cachar have been altogether of a more friendly character than in previous years. It was stated in last year's report that the expedition which it was intended to send to their country for the liberation of the Adumpore captives had been deferred, owing to the lateness of the season and the absence of accurate information regarding the unexplored jungles the tribes inhabit, and that, in the meanwhile, it was intended to make one further attempt to re-open negotiations with the Chief Sookpial for the restoration of the captives supposed to be in his possession. A good opportunity was afforded for opening these negotiations by the arrival of four distinct deputations from the Looshais at the head-quarters of the Deputy Commissioner of Cachar, one deputation being from Sookpial himself. The other three were, one from a chief named Vagnolier, who resides to the south of Muniore, and two from Vonpial, the chief of Moolaler. In all these cases the deputies were well received, the tribute offered by them being accepted and presents interchanged. The deputation

Negotiations with Sookpial for the rescue of the Adumpore captives.

from Sookpial came also with the alleged intention of paying the tribute due from him and of receiving the return presents of Government, but this interchange of presents was in his case refused, the deputation being made to understand that nothing but the release of the captives detained by Sookpial would procure for him and his people the friendship of Government. They were assured at the same time that Sookpial had nothing to fear if he met the demands of Government in good faith ; and advantage was taken of the return of the deputation to send to him a special messenger to negotiate for the release of the captives. The Chief Manjihow, who had rendered much assistance in 1857 against the Chittagong Mutineers, was selected for this purpose ; and he was directed to invite Sookpial or his son to come personally with the captives to Polleeherra to meet the Deputy Commissioner, under an assurance that he would in such case be well-received and entertained. The efforts of Manjihow were, however, unsuccessful, and he returned without being able to effect anything. A second messenger was then sent on the same errand, the person now selected being the muntri or adviser of Manjihow, who had accompanied him to the Looshai country ; and this man was so far successful that he brought down with him a brother of Sookpial, with a party of 13 Looshais and four of the Adumpore captives. The captives given up are all boys between eight and twelve years of age. Besides these an old woman and another boy were also surrendered, but would not accompany the messenger. There are three other captives with Sookpial, *viz.*, two women and a boy ; but these women, it is said, have married among the Looshais and have families whom they do not wish to leave. Information was further obtained of many captives being still held by a chief named Guoorshailon, a brother-in-law of Sookpial, who had also taken part in the attack on Adumpore in 1862, and who was strongly opposed to any of the captives being returned. This chief resides within the jurisdiction of the Rajah of Tipperah, and is believed to be the same as Mischoelal or Murchoelal referred to in the report for 1864-65. Steps have been taken to ascertain the precise relations subsisting between him and the Rajah of Tipperah. Our messenger also learnt that many muskets and much sulphur had been obtained by the Looshais through Tipperah, and to put a stop to this for the future the local officers have been instructed to take every precaution to prevent the transport of arms and ammunition through the district, and strictly to enforce the provisions of the Arms' Act for this purpose. The Deputy Commissioner has also been directed to endeavour to place our relations with Sookpial on a footing of permanent amity.

The annual Kookie meeting held at Kassalong took place on the 7th of December last, but the number of chiefs present was unusually small. Annual Kookie meeting held in December last. Rutton Pooea and only two others of the same class remained to meet the Deputy Commissioner ; eleven other chiefs who had come in to be present at the meeting leaving under various pretexts before the day fixed. The real cause of this conduct was discovered to be a feeling of distrust of the intentions

of Government towards them in connection with the recent raids, and this feeling the proceedings of the Deputy Commissioner had in no way tended to allay. That officer states that he was careful not to weaken the dread of punishment entertained by the chiefs whose connection with the raids was more or less suspected, and had rather drawn their attention to the increase sanctioned in the Hill Tract Police and warned them to expect punishment in the event of any hostile movement among their tribes.

On receipt of this communication the Commissioner was called upon for a full report on the results of the meeting, and the policy to be adopted under present circumstances towards the Kookie tribes. It was pointed out that the Deputy Commissioner would have acted with more policy had he combined with his threat an assurance that the chiefs had nothing to fear so long as they maintained the friendly relations which it was our desire to cultivate. The necessity of conciliating the chiefs of the various tribes by assuring them of our pacific intentions so long as they refrained from outrage was strongly urged on the Commissioner. That officer's report had not been received up to the close of the year.

The annexed return shows the amount of civil and revenue work done in the Hill Tracts during the year.

Cases.	Number pending from last year.	Instituted during the year.	Total.	Average of three previous years.	Disposed of during the year.	Pending.
Civil Cases ...	5	40	45	146	33	12
Revenue Cases	10	10	31.6	10	...

Total ...	27	314	341	492	303	38

work done in the Hill Tracts during the year under review. The action of the registration rules was reported to have been most beneficial in the district, both as throwing to a certain extent a hindrance in the way of borrowing, and also as ensuring that the borrower shall clearly understand the engagements he enters into. The decrease in civil and revenue cases is striking.

Return of crime.

at the Chundergonah School, the pupils of which are solely of the Chuckma tribe; but the school at Manickcherry, the pupils of which are all Mughls, was not equally well-attended, owing to several of the parents having removed their sons from it on the plea that it was useless for them to learn a foreign language. It was stated however that the

desire for instruction generally was on the increase, and several petitions were received during the year from different parts of the district asking for the aid of Government towards the establishment of new schools.

The question of the language to be taught in these schools has lately been revived and is under the Lieutenant-Governor's consideration.

HILL TIPPERAH.

The appellation of the territory hitherto known as "independent" Tipperah has been altered during the year to that of "Hill Tipperah," the state in question, though not subject to the jurisdiction of our Courts, being not politically independent.

COSSYAH AND JYNTEAH HILLS.

The murder of Owan Sing, Rajah of Mawiyang, was noticed in last year's report. His cousin, U Jan Sing, was clected as his successor, but died before the sunnud of appointment was conferred on him. The opportunity was taken to decide that, for the future, the title to be conferred on the heads of the Cossyah communities generally should be that of *Seem*, or Chief, instead of "Rajah"; and the death of the chief of Mowsouram having been subsequently reported, the succession of his nephew, Adhon Sing, has been recognised on these terms. No election had been made of a successor in Mawiyang up to the close of the year.

Succession of Cossyah Chiefs.

NEPAL.

To put a stop to the numerous dacoities and robberies committed in Nepalese territory by the inhabitants of certain frontier villages in the district of Chumparun, the Lieutenant-Governor has, under the provisions of Section 15 of Act V of 1861, directed that a Police force of one head constable and ten constables, in excess of the ordinary fixed complement of the district, be quartered in the villages in question, the cost being borne by the inhabitants. As the Magistrate of Chumparun had, in connection with this matter, complained of want of co-operation on the part of the Nepalese authorities on the frontier in the repression of crime, it has, at the same time, been suggested to the Government of India that a strong remonstrance on this point should be made to the Nepal Durbar, as no amount of activity on the part of the Chumparun Magistrate is likely to have any effect if the Nepal officials continue to neglect their duty.

A requisition having been made by a frontier Nepalese Soobah for the surrender of a British subject charged with having escaped from custody in Nepal while awaiting trial on a charge of dacoity committed within Nepalese territory, it was ordered that the man in question be dealt with in accordance with Act I of 1849 (*an Act to provide more effectually for the punishment of offences committed in Foreign States*) as under existing treaties the application for surrender could only be complied with when made by the Government of Nepal. It was at the same time represented to the Government of India that in cases of this kind, where satisfactory proof was forthcoming of the crime having been committed in foreign territory, it was desirable that the local Magistrates should have the power of giving up at once the criminals claimed, provided that a treaty were made with such state authorizing such extradition on terms of reciprocity.

COOCH BEHAR.

The arrangements made for the administration of the Dooars on the termination of the war with Bootan were noticed in last year's report. They have since been considerably modified by the formation of a new division under the designation of the Cooch Behar Division, which comprises the territory ceded by the Bootan Government, the sub-division of Titalyah in the district of Rungpore so far as its criminal jurisdiction is concerned, the districts of Darjeeling, Gawalparah, and the Garrow Hills, and the native state of Cooch Behar so long as it may continue under British management. The district jurisdictions have further been altered by the transfer of the hill country west of the river Teesta from the Western Dooars to Darjeeling, by the formation of the rest of the Western Dooars, with the criminal jurisdiction of the sub-division of Titalyah, into a separate district, to be administered by a Deputy

Commissioner, and by the abolition of the Deputy Commissionership of the Eastern Dooars and the annexation of those Dooars to the district of Gawalparah. The administrative staff of the new division has at the same time been remodelled, and fixed on the following scale, *viz.*, a Commissioner on Rs. 2,500 a month, of which Rs. 1,000 are to be paid by the Cooch Behar State and Rs. 1,500 by the British Government, a Deputy Commissioner at Cooch Behar on a salary of Rs. 1,000 to be paid by the Cooch Behar State, a Deputy Commissioner for the Western Dooars on Rs. 1,000, two Assistant Commissioners for the same, one at Rs. 600 and the other at Rs. 500, one Extra Assistant Commissioner for the same at Rs. 400, and one Assistant Commissioner for the Eastern Dooars at Rs. 600. The Commissioner of the Division has been authorized to exercise, in addition to the functions of Commissioner of Revenue and Circuit, the powers of a Session Judge and the judicial appellate and controlling authority in both the Civil and Criminal Departments according to the laws already in force. These arrangements have received the sanction of the Government of India and of the Secretary of State, and came into effect from the 1st of January last.

The administration of the native state of Cooch Behar was carried on in the same manner as in the preceding year, the arrangements made before having been but partially modified. The Commissioner having resumed his duties in the province, the office of Judge held by a native has been abolished, and the duties transferred to the Deputy Commissioner. All suits for rent have at the same time been transferred to the Dewan, who before only took cognizance of suits for rent of the current year. The office of Sudder Ameen has further been abolished, and also that of Naib Dewany and Fouzdary Ahilkar; but it was intended to re-establish the latter.

Some progress has also been made in the work of raising the Civil Courts of the province to the standard of the Zillah Courts in Bengal. The proceedings have been much curtailed, and the Courts have been enjoined generally to follow the procedure of Act VIII of 1859.

Business disposed of in the Civil Courts,

Business disposed of	Total number of cases under trial.	Decreed.	Dismissed.	Referred.	Otherwise disposed of.	Total number disposed of.	Pending.

Total	829	787	719	1,875	345	1,171	155	83

of cases was 719, in which 1,875 persons were concerned; and a comparison with the results of the previous year shows an increase of 194 cases and 1,088 persons. It was believed, however, that the actual increase of crime was much smaller, and attributable partly to the scarcity of food, and that the large apparent increase arose from the fact of much crime, which used to be compromised by the old Police, being now brought before the Magistrate. The number of prisoners tried by the Foujdary Ahilkar was 1,561, of whom 506 were convicted or committed. The num-

ber of prisoners brought to trial before the Sessions Court was 152, of whom 89 were convicted. The appeals heard by the Deputy Commissioner from the decisions of the Foujdary Ahilkar were 90, seven of which were rejected, while in 48 the orders of the Ahilkar were confirmed, and in 35 modified or reversed.

The criminal judicial receipts were Rs. 7,283, while the expenditure amounted to Rs. 17,134. The former, however, is exclusive of the revenue raised by stamps, while the latter includes thannah dāk expenses and the cost of prisoners in jail.

The re-organization of the Cooch Behar Police was noticed in last year's report. The new Police has been formed entirely on the plan of that of Bengal, and is of the strength noted on the margin. The annual cost of the force is nearly Rs. 40,000.

Re-organization of the Police.
1 Superintendent.
3 Inspectors.
8 Sub-Inspectors.
26 Head-Constables,
200 Constables.

A new jail has been constructed in Cooch Behar during the year. The average number of prisoners in jail was 168, the mortality among them being 6·5 per cent. The rules for Bengal Jails are generally observed.

The figures on the margin exhibit the total land revenue demand, collections, and balances. The demand for the year was Rs. 2,56,941, of which only Rs. 1,158 remained due at the close of it. The remainder of the balance (Rs. 1,56,509) has accumulated from time immemorial, the outstanding claims having never been adjusted.

Collections	2,73,630
Balances	1,57,007

The survey and settlement of the province was proceeded with during the year. The number of beegahs surveyed during the year was 123,653, and up to the close of the year 242,988. The number of beegahs still remaining to be surveyed was 1,546,051.

Progress made in survey and settlement.

The revenue realized from all sources in 1866-67 is noted on the margin, the total receipts amounting to Rs. 6,91,096. The total charges were Rs. 5,39,554, which left a surplus of Rs. 1,51,542. The total surplus invested in Government Securities since the State came under the charge of the Commissioner amounts to 6½ lacs of rupees. The local Narainy rupee is still being withdrawn from circulation, the amount sent to the Mint during the last three years being as shown on the margin.

Revenue realized from all sources, &c.

				Rs.
Land Revenue	3,19,533
Abkaree	2,337
Miscellaneous receipts	3,048
Stamps	53,648
Zemindary receipts	2,22,416
Law and Justice	9,201
Interest on Government Securities, &c.	52,186
Education receipts	1,055
Hospital subscriptions	32
Debutter	27,610
Total	6,91,096
1864-65	4,00,000
1865-66	5,01,000
1866-67	3,30,000

The number of schools in Cooch Behar last year was seven, but of these one has been closed. Of the six remaining schools one is English, one Sanscrit, and four Vernacular. The average attendance of pupils at the English School was 105, and at the Vernacular Schools 144. The receipts from the

Schools, Dispensary, and Public Works.

schools amounted to Rs. 690, while the expenditure on them was Rs. 6,361. The number of patients in the dispensary was 1,088, and the total expenditure incurred on account of it was Rs. 4,546. The total expenditure on public works was Rs. 45,635, of which Rs. 13,169 was laid out on roads and bridges.

THE TRIBUTARY MEHALS OF CHOTA NAGPORE.

The administration of the Tributary Mehals of Chota Nagpore was peaceful throughout the year. Three of the estates, *viz.*, Sirgoojah, Koreah; and Jushpore, were visited by the Commissioner in the course of his cold weather tour; and he found the people in them well disposed and prosperous. The estate of Sirgoojah had suffered to some extent from the unusual drought of 1865-66, but not so much as the country below the ghauts, and the people were on the whole in easy circumstances. The only complaint made by them was in regard to the system of forced labor, which pressed hard on the industry of the agricultural classes. By this system each man has to give to the raj fifteen days labor in the year; but the actual rent paid is on the other hand very light.

The estates not visited during the year were those of Odceypore, Gangpore, Bonai, and Chang Bhukur. The management of all these estates, as well as of Sirgoogah and Jushpore, was in the same hands as before; and on the whole the chiefs had discharged their duties in a satisfactory manner. In Koreah, as was stated in last year's report, the management of affairs, was after the death of Ranee Kudum Koomaree, allowed to remain in the hands of her dewan, Doolum Sing. But it was subsequently assumed by Ranee Main Koomaree, the younger widow of the late Rajah, on behalf of her son, and this having been followed by the dismissal of Doolum Sing from office, the result was great confusion and disorder in the transaction of business. To introduce a better order of things the Commissioner, during his visit to the estate, modified the arrangements previously made, to this extent, that while the direction of affairs generally, and the control of receipts and expenditure were left in the hands of the Ranee, she was persuaded to be guided by the advice of a Punchayat or Council in the disposal of all executive duties of importance, and also to appoint Doolum Sing as Darogah or Chief Officer of Police. This arrangement was preferred as being most in accordance with the wishes of the Jagheerdars and the people. If it does not answer, the estate will be placed under the management of a paid Surburakar or manager.

The Rajah most respected and beloved by his people is Rajah Pertab Narain Sing of Jushpore. A school has been opened by the Rajah at his head-quarters in which elementary instruction in English is given to the boys, inclusive of the Rajah's eldest son.

Collections of the year.

Name of Estate.	Demand collected in full.		
	Rs. A. P.		
Sirjoojah and Jushpore	2,666 11 0
Oodeypore	533 5 0
Gangpore	500 0 0
Koreah	400 0 0
Bonai	200 0 0
Chang Bhukur	386 3 0

The collections from the Tributary Estates continued to be punctually paid. The demand realized during the year is noted in the margin.

Statistics of crime, &c.

TRIBUTARY MEHALS OF CUTTACK.

The administration of the Tributary Mehals of Cuttack has been comparatively quiet and satisfactory throughout the year. The disturbances in Bamunghatce, in

State of the Mehals during the year.

Mohurbhunj, which were noticed in last year's report, had completely subsided with the suspension of the Rajah's authority in the pergunnah and the assumption of its management by the Deputy Commissioner of Singbhoom. The revenue collections and police enquiries both in Bamunghatee and Ooperbhag are now conducted through the heads of peers and villages, and this system had answered fully in restoring order, the aboriginal population having at once returned to their lands and occupations, and the first instalment of rents for the year having been realized without difficulty. The state of affairs in Mohurbhunj itself was still very disorderly; but here also the exertions of the Assistant Superintendent of the Tributary Mehals, who was specially deputed to the place, had succeeded to some extent in making up the differences between the Rajah and the heads of peers and villages, and engagements had been entered into with most of the latter for the payment of a fixed rent in place of the arbitrary and constantly changing assessments hitherto levied from them by the Rajah. In Keonjhur the intrigues noticed in last year's report had ceased. The young Rajah will assume charge of his estate on the 10th September 1867. In Pal Lehra the chief had been as usual at feud with his tenantry and jagheerdars, but the most important of these disputes has been already finally settled. In Athmullick some disturbances were created for a time by a band of men who levied black mail and plundered the villages on the Athmullick and Reracole boundary, but the offenders having been captured and punished the country has remained quiet ever since.* The other estates were also perfectly quiet throughout the year; and a deputation from the Khund Sirdars, which waited on the Commissioner at the beginning of the year, assured him that they were very happy and contented.

In the Tributary Mehals the pressure of famine, which was felt so severely in the neighbouring province of Cuttack, was comparatively light, with the exception of the country at the foot of the hills adjoining the Balasore district in Neelgiri and Mohurbhunj. One of the main reasons for this was that the hill people have many resources in jungle fruits and roots, to which they resort in times of scarcity and thereby eke out their stores of rice. The crops of mangoes and mowa in the hills were moreover abundant, and the rice crop was nowhere an entire failure. The plains adjoining Balasore in Neelgiri and Mohurbhunj however suffered severely from drought, and many starving families from these estates made their way to Balasore and helped to swell the number of applicants who crowded there for relief.

The estates which remained under the direct management of

	Bankee.		Ungool.		Keonjhur.	
	Rs.	As. P.	Rs.	As. P.	Rs.	As. P.
Collections ...	14,368	4 8	31,945	1 11	45,073	10 8

Surplus ...	7,594	3 5	19,228	10 6	16,950	9 6

Mals pay no revenue. The financial condition of the other three estates is shewn on the margin.

Government during the year were, as heretofore, those of Bankee, Ungool, Khund Mals, and Keonjhur. Of these the Khund

The total number of civil and revenue cases on the files of the Superintendent, Assistant Superintendent, and Tehsildars of the estates under direct management was 1,271, of which 1,172 were disposed of and 99 remained undecided at the close of the year. As was stated last year the great majority of these cases came from the estates under direct management, as the Government does not interfere with the administration of civil justice by the Tributary Rajahs in cases where their own subjects only are concerned.

The number of criminal cases under trial in all the Mehals was 598, the total number of persons in custody being 909. Of these 331 were released, 561 convicted and punished, 16 were under trial at the close of the year, and one had died under arrest.

The figures on the margin shew the number of boys at school in Banksee and Ungool. The number of boys attending the Ungool schools had very much decreased, the causes assigned for it being the general scarcity of last year and the prevalence of cholera and small-pox.			
Schools in Banksee and Ungool.			
<i>Banksee.</i>			
School at Churchika	44
" Soobunpore	42
Total	86
<i>Ungool.</i>			
School at Poornagurh	30
" Joroda	14
" Konjora	20
" Paktoonga	31
" Kongola	19
" Zulmool	25
Total	139

A rough and not very reliable census of Banksee, Ungool, and the Khund Mals was taken during the year, the results of which are shewn as under:—

	<i>Banksee.</i>	<i>Ungool.</i>	<i>Khund Mals.</i>
Men	12,776	16,198	11,958
Women	12,953	16,512	11,332
Boys	9,344	14,275	10,076
Girls	7,603	11,923	8,974
Total	42,676	58,908	42,340

The Rajah of Khundpara died in November 1866 and was succeeded by his brother. The Rajah of Banksee, who had been a state prisoner in the Cuttack Jail and was released conditionally in July 1866, has also died, leaving no direct heir.

APPENDIX

TO THE

BENGAL ADMINISTRATION REPORT

FOR 1866-67.

A.

Statement shewing the number of Districts and divisions of Districts in each Commissionership in the Lower Provinces, and the area and population of each District as far as ascertained.

D. 3.

Statement shewing religion, races, height, weight, &c., of the men of the Regular Police of the Lower Provinces on the last day of the year 1866.

Classification according to religion, races, &c.		Average age.	Average height.	Average weight.	General physiognomy and characteristics of each race and caste.
			Feet Inch.	Md. Sr.	
ACCORDING TO RELIGION.	Mahomedans	26·7 years	5 4·7	1 18·5	{ Of Behar are much on a par as far as Police work is concerned. The Mahomedan is perhaps sharper for detective work.
	Hindus	26·7 "	5 5·3	1 22·7	
	Seikhs	28·9 "	5 5·4	1 25·8	Active and energetic, but not fitted for Police work in Bengal.
	Christians... ..	33·6 "	5 6·4	1 24	
	Parsees	:
ACCORDING TO COUNTRIES AND RACES.	Hindustances	26·3 years	5 5·1	1 22·1	Given above.
	Punjabees... ..	30·3 "	5 5·0	1 20·5	Vide Seikhs.
	Afghans	30 "	5 7	1 22·7	
	Beloochees	
	From Western Himalayas	
	" Eastern "	26 years	5 1·7	1 18·0	Quick and intelligent. Suited for hill work, and for guard work in the plains.
	Bengalees... ..	27 "	5 3·3	1 17·1	Good as detectives, but useless as guards.
	From Maharatta countries	30 "	5 4	1 18	
	Telingas	25 "	5 5	1 20	
	Canarese "	
	Tamuls	26 years	5 4·5	1 22	
	Malabars	
	Muchas	20 years	5 3·3	1 16	
	Tipperahs	21 "	5 2·1	
	Ohukmas	22 "	5 3	
	Goorkhas	30 "	5 3·8	1 30	We have few genuine Goorkhas in the Force.
	Munipoorees	27 "	5 4·7	1 17·2	
	Assameese	28 "	5 3·7	Less to be depended upon for regular duties than even Bengalees.
HINDOOS ACCORDING TO CASTE.	Brahmins	29 "	5 3·9	1 20·5	
	Rajpoots	27 "	5 6·2	1 22·6	
	Soodras	27 "	5 4·3	1 18·8	
	Oorahs	24 "	5 0	1 16	Listless and apathetic.

Statement shewing the general result of Police operations with regard to each great class of Crime dealt with by the Police during the year 1866.

CLASS OF CRIME.	PERSONS ARRESTED WITHOUT WARRANT.						CASES PROSECUTED BY INFORMATION BEFORE MAGISTRATES.				
	Number of persons arrested.	Released without trial.	Acquitted, including re-heard on appeal at Sessions.	Ordered to find security.	Finally convicted.	Average number of days occupied by each case.	Number of informations lodged.	Number of persons arrested or summoned.	Number acquitted.	Number ordered to find security.	Number convicted.
